SHOULD CITY SPEND \$85,000 IN EXTENSIONS?

Information for the Electors to positing Their Ballots.

In the by-law, providing \$85,000 for the light plant, the people have very important question to decide, away a misconception as to the

posed extensions to the plant.

It Will Not Increase Taxes. A misconception entertained by good number of voters is that voting for the by-law, a man is vot ing to increase the general taxation. There is not a word of truth in this. All that the citizens do by carrying the by-law is to pledge the general credit of the city for the payment of \$85,000 in debentures which will be issued to pay for the extensions, but these will not be paid out of general taxes; they will be paid out of the profits of the light plant, and the users of the gas and electric light help to pay for these. The citizens The far-reaching results of a simple swear either of the three in the dock need be under no apprehension that injury, and the amazing benchts to be were taking part. He endeavored to

pay a profit on the added amount of capital put into it, viz., \$85,000. tion, therefore, for the taxpayer will the plant, pay a profit on amount of capital invested ? the duty of those interested to give not heal, but there was some deep-

be decided on the merits is by review- tions, salves, etc., as you can tell ing the history of the plant since it from the fact that I had at one time was taken over by the city. We must as many as thirty-two empty bottles judge by its past record of what to or boxes of one kind of ordinary oint-

Will The Plant Pay? fully stated that up to the present effect of Zam-Buk, lost the goose which laid the golden really think it would do you good."

is asserted, at that time lighting gas down, and I seemed to have a freer sold at \$2 per thousand feet. Now it use of my leg. Several ladics at the seing sold for \$1.50 per thousand church, including the minister's wife, feet and the question is can that be hearing that Zam-Buk was at last done profitably? Besides \$85,000 per curing me, helped me with a little year is being added to the burden of money, so that I might continue with the plant in order to pay off this it, and the result of their kindness is \$85,000, and interest in thirty years. That is very true and that is a factor that must be borne in mind in discussing this question. (To be continued).

Real Good Advice Mr. Progressive Citizen, your Cobalt is right here. So use your surplus earnings in the town in which you live as to open the gold mine under your eyes. You risk, perhaps, more than you care by going abroad. At home you can place investments in safe channels. You can oversee things and join in co-operative movements for the common good. By acting from a feeling of loyalty to your own town you can help to create conditions here that make for a rich mine undisturb ed by the manipulation of a broker. and immune from the operations of a board of directors intent on feathering their own nests. These are the days of town building. Show your mettle and loyalty by praiseworthy work in behalf of the community in which the best that is in you becomes an objectlesson for less enterprising fellow

Wheel The Baby Out.

At this particular season of the year iew baby carriages and go-carts are in great demand. The large stock carried by James Reid, the Princess treet undertaker, is varied enough to neet all requirements. Sunshine and resh air are essential to health, and so the advice, "Wheel the baley out one of our up-to-date go-carts or carriages, is very apt. This leading undertaking and furniture firm also news old carriages and does repairing and upholstering of all kinds, but just at present, however, their showing of carriages and go-carts is especially attractive, and many are taking ad vantage of their reasonable prices.
