BABY'S AWFUL SKIN HUMOUR
 Doctors and Hospitals Called it Chronic Eczema and Said Sores Never Could Be Healed—Child Was Getting So Bad Mother Didn't Know What To Do.

CURED BY CUTICURA AT A SMALL EXPENSE
 "Words cannot express my gratitude for what Cuticura Soap, Ointment, and Resolvent have done for my son, who when two years old had eczema as bad as any child could have it. I had several doctors, but when they stopped treating him he began to get sore again, almost the next day. It got so bad I really didn't know what to do. At last we took him to the hospital, where the doctors said he had chronic eczema. They gave me a wash for it, but said it was foolish to think of it ever being cured. The child was falling so I thought I must do something, and reading about Cuticura, I went to the nearest drug store and purchased a set of Cuticura Remedies. I used half of them and found some relief and improvement, but thought the change for the better was only temporary, as it had been with all the other medicines ordered by the doctors. But by the time I had used one and a half boxes of Ointment, one small bottle of Resolvent, and one cake of Soap, the cure was complete and permanent, with not a sign of a sore from that day to this—over two years. I shall never be without Cuticura Soap. I find it so good for the toilet and for the children.—Mrs. J. Scheppele, 218 Frost St., Brooklyn, N. Y., Feb. 9, 1905."

FASHION'S FORM.
 Guimpes a Necessity This Season.

One of the smartest gowns seen East of the Atlantic City was a black tulle dress, with a skeleton waist, having two straps over each shoulder, somewhat in the style of last year's suspender dress. With this was worn a fine eyelet embroidered guimpe similar to the illustration. These guimpes are made on flannel linings, so as not to pack at the bustline or crawl up and thus spoil the fit of the dress, a fine linen being used for this purpose and featherbone run in the front and back seams to hold the body in shape. The embroidery, lace or material used for the guimpe is laid on this lining to the depth required and stitched, and then the lining usually cut away beneath. The sleeves are of the same material, three-quarter length, finished with a band edged with a frill of fluff. The collar can either be attached to the guimpe or it may be made Dutch neck style and a collar worn or not as desired. These guimpe waists are fastened down the back under a flap, or with little eyelets and buttons.

ORDER OF ETHIOPIA
 Very Interesting Movement in South Africa.

Churchmen will remember the interesting movement in South Africa, which has progressed under the name of the Order of Ethiopia, says The Living Church. A large number of natives who had formerly been Methodists were brought into touch with the church some years ago, and the native body was organized into the Order of Ethiopia. A large class from this order was confirmed by the Bishop of Grahamstown in the spring of 1904, and he recently has confirmed a second class from the same order numbering 122 persons. The candidates came from many miles distance. The services extended over three days, during which some 250 persons received the Blessed Sacrament. These candidates had been carefully instructed by the chaplain in charge of the movement, or by the students of the college.

Don't Kill the Hawk.
 County Life in America.
 Man has sinned more than any other animal in trifling with nature's balance. Clover crops and the killing of hawks are apparently unrelated, yet the hawk eat the field mice, the field mice prey on the immature bees, the bees fertilize the clover blossoms. The death of a hawk means an over-increase of field mice, and a consequent destruction of the bees.

Kingston and Ottawa.

London Season Was Somewhat Barren—Finest Play in New York is Said to Have Been "The Music Master."

OSCAR HAMMERSTEIN.
 Composer of light opera, theatrical manager and builder of playhouses in New York, is about to invade the field of Grand Opera. He is a man of remarkable ability and his friends are confident that he will make a success of his new operatic enterprise.

Alta Naimoff, the Russian actress, who created something of a sensation in New York last season, will be seen next season in an English play, under the management of Henry Miller. Preparations for E. H. Sothern's and Julia Marlowe's production of "Joan of Arc," which is to be made next season under the direction of the Messrs. Shubert, are already under way.

Rekindles Life in the Nerve Cells
 And By Increasing Nerve Force Restores Vitality to Every Organ of the Body.
Dr. Chase's Nerve Food

Dr. Chase's Nerve Food is a nerve stimulant and tissue-builder of exceptional power. It rekindles life in the nerve cells and forms new red corpuscles in the blood—the only way to thoroughly cure nervous disorders.

George W. Lawson, a farmer living near Concession, and well favorably known throughout Prince Edward county, Ont., writes:
 "About one year ago I was taken sick and felt myself failing every day. I consulted and doctored with several eminent physicians, but received no permanent benefit. In fact they told me they could do nothing for me except to afford temporary relief, as I was a general breaking up of old age. My nerves were exhausted, and my whole system completely broken up. I was just at death's door, and, thinking my time to die had come, I gave up hope and resigned myself to fate. At this time my wife read in the papers about some of the wonderful cures being brought about by Dr. Chase's Nerve Food, and I began using it.
 "This treatment helped me from the first, and I continued to keep it up for six months, when I was fully restored to health. To-day I am a well man, and made so by Dr. Chase's Nerve Food in a trifling cost. All the doctors in this vicinity were called, but the teachers were attending the teachers' convention in Kingston. The general vestry meeting of Christ church, was held on Monday morning, A. G. Barry occupied the chair. All accounts were found satisfactory, showing a balance on hand. George Gillespie was chosen clerkman's warden, while R. Barry was elected people's warden for the ensuing year."

Dr. Chase's Nerve Food, 50 cents, at all dealers, or Edmondson, Bates & Co., Toronto.

THE YEAR IN PARIS WAS FRUITFUL.

London Season Was Somewhat Barren—Finest Play in New York is Said to Have Been "The Music Master."

Leonavallo and his orchestra, from La Scala, Milan, will open an American tour in New York, October 28th, in Carnegie Hall.

James K. Hackett has obtained the American rights to "Brown at Brighton," a farce which will be presented in New York next season.

At W. Pinero is chairman of the special committee arranged for the performance at Drury Lane Theatre, London, in June, in honor of Ellen Terry's jubilee.

Mrs. James Brown Potter has accepted a play by a new dramatist in which she will appear, "Mary Queen of Scots," and will make another venture in the dramatic field.

Although Mrs. Fiske has finished with "Ladies in Waiting" in America, the play is still being heard from in England. The author, C. M. S. McLellan, has been awarded about twenty-five pounds' damage against Charles Barnard, another playwright, for libel contained in a letter which claimed "Ladies" was more or less borrowed from a play called "The Coachman" which was written by Barnard.

Adelle Ritchie has been voted the most popular actress now playing in New York. The competition was held at the great advertising sale last week at Madison Square Garden. The prima donna of "The Social White" received 10,670 votes, Miss Ritchie came second with 9,600 votes. The next in line were Marguerite Clark, Maude Adams, Blanche Bates and Lillian Russell. As a winner of the contest, Miss Ritchie was given an English bull pup.

Oscar Acche and his beautiful wife, Lily Bragton, are credited with a desire to come to America with a classical repertoire. James Welch, one of the funniest of English comedians, is also said to be planning for an American season, and Cora Potter, who has been so long absent that she was almost a stranger, has also expressed a desire to come to the United States for a time, and appear in any sort of role, not excepting vaudeville, provided she is guaranteed \$50,000.

SUNSHINE FURNACE

Where Does Your Heat Go To?

The science of furnace building is the utilization of all the heat units. The "Sunshine" furnace utilizes all the heat and sends none up the chimney. You can't put your hand over the chimney when some furnaces are in use, because so much heat goes up the chimney your hand would be burned. That is heat wasted, time wasted, because it takes so much more firing up when a large part of your heat is lost.

The "Sunshine" furnace is built to extract all the heat units from the fuel and distribute them through the house. It does not waste heat like common furnaces.

BEARFUL DYSPEPSIA.
 Is it the Complaint of John D. Rockefeller?

New York, June 2.—What are we to believe now? If there is anything in this world that the people of America have believed in, it was that John D. Rockefeller, the great oil king, has been a sufferer from a fearful form of dyspepsia for these many years, and that feeble health generally had made him a thin, attenuated man, just fitting the living-skeleton cartoons that had become the standard works of publishers and readers of the illustrated papers. Many people found much comfort in believing in Rockefeller's dyspepsia. It seemed in some way to equalize matters. He had the money; likewise the dyspepsia. We hadn't the money; neither had we the dyspepsia. But here comes Dr. Allen, Rockefeller's family physician for many years, who declares that Mr. Rockefeller has never been a sick man, and particularly has not had dyspepsia, and that, instead of being a skeleton, he is a man of one hundred and ninety pounds' weight, which, by the way, is within about eighty pounds weight of what Secretary Taft has after a long series of treatment reduced the figure at which he tips the scales. Rockefeller is supposed to know what he is talking about, and his declaration just shakes our belief in anything. If we can no longer have a thin, dyspeptic hantooed Rockefeller, what can we believe in? Have the papers been stringing the public with manufactured ideas of the Standard Oil company's head, and must we conclude that they cannot be believed whenever they talk about the public men against whom the public has a tinge of animosity? Here's Tom Platt, New York's senator, saying he never knew Rockefeller as a reporter, who in an alleged interview made him rip out the strongest kind of oath. It's time this misrepresentation stopped, or when we meet these worthless hantooes, we won't know them. The public has some rights, whether Rockefeller or Platt has or not.

Sea Water For Sprinkling.
 Many European cities on the sea coast, use salt water for watering the public thoroughfares, calling it waste to make use of fresh water for this purpose. They are the more satisfied because certain properties of sea water eliminate the necessity of frequent applications. On the other hand, salt water exerts a very destructive influence on the paint and varnish of vehicles, and merchants claim that the salt is found everywhere and that its deliquescence is attended with harmful results. And again, salt water is destructive to pipes and metallic fittings and the leakage of the pipes kills vegetation in streets, parks and gardens.

Successful Ventry Meeting.
 St. Lawrence, Wolfe Island, May 31.—The vessel Maggie L. moved out of the bay, here, with a cargo of grain for Richardson Bros., Kingston. C. A. Barry shipped eleven hundred bushels of grain, consisting of oats and peas, on the boat, and Capt. La Rush stated that it was the first time in seven years that he had peas on board his vessel. O. Woodman also drew some wheat to the bay. J. Niles is busily engaged pressing hay, but is now nearly done. W. Dignam has taken a trip to New Ontario. On Friday Nerve Food in this vicinity were closed, as the teachers were attending the teachers' convention in Kingston. The general vestry meeting of Christ church, was held on Monday morning, A. G. Barry occupied the chair. All accounts were found satisfactory, showing a balance on hand. George Gillespie was chosen clerkman's warden, while R. Barry was elected people's warden for the ensuing year.

LABATT'S Ale and Porter
 are Nature's Best Tonics. Pure Malt products, made from the choicest barley and best selected hops. They are very healthful and aid digestion. Labatt's are very palatable beverages and agree with the most delicate stomach.
