THE VICTORIA CROSS

Attains This Year, Jubilee of Its Institution. The coveted little bit of bronze

known as the Victoria Cross-worth intrinsically 41d-this year attains the ated in 1866 and abundant opportunities for winning it came with the outbreak of the Indian Mutiny. In the course of the fearful struggle no fewer than 180 beroes were decorated. Durthe fifty years of its existence the cross has been awarded to 522 officers and men, the recent South African war accounting for seventy-eight of these awards. Originally the cross carried with it a special pension of £10 a year to all non-commissioned winners, and in recent years this has been in creased to £50 in case of those who are laid aside from work by advancing years and failing health. Of reviments whose men have rained the trophy, the South Wales Borderers occuny the place of honor with sixteen V C's. At the head of the list of Scot tish regiments the Gordon Highland ers come first with thirteen, followed by the Seaforths with eleven, and the Cameron's and Black Watch each with

WHAT'S A GOOD POTATO? The One That Contains the Most

Most people, I suppose, take it for ranted that the best potatoes are the ones that contain the most starch. On the contrary, it is the ones that contain the most glutten, because starch is much cheaper than albumen. First comes the skin of the potato. n a new potato it is thin and clear;

tuber, which contains little starch and a great deal of water. If this area branches out into the starch the potato will not be a good cooker.

A STCKY HEART

To Be Put in Frees to Preserve

New Orleans Times-Democrat. Considerable interest attaches to cement filling in the trunks of the great oaks near St. Charles avenue, and many questions have been asked about this method of arresting the demy of trees.

Horticulturists have found that they have been able to prevent limbs from decaying by wrapping them in cloth.

This helps to exclude the dampness. Carrying their experiments one point further, it was found that coment would preserve the trunks of trees rom rotting, just as a filling in a

The question arose last year as to what would be done to preserve the great oaks at Audubon Park, which were losing their growth and verdure by reason of big holes in their trunks, end it was accordingly decided to fill the apertures with cement. Several carloads of sand, mortar, and brick were used in the operation, which has been attended with great success. Old oaks regained their strength, new branches began to grow, and altopether they put on signs of renewed

## Instal a Lighting Plant in Your Country Home

Summer residences and country houses have some disadvantages, the chief of which is lighting. That trouble i wholly removed by using

ACETYLENE

which has only one rival—the light of the sun. Even if you were near enough to a central city plant, the cost of gas or clectricity would be enormous. But an Eclipse Generator, with stock of carbide (Shawinigan Brand is the best), will illuminate your home with a BRILLIANT, STEADY, PENETRATING WHITE LIGHT at much less trouble, expense and danger than any other illuminant.

THE FACTS OF THE CASE

Acetylene does not pollute the air. Acctylene burns with a cool flame. Acetylene cannot be lighted in the generator. Acetylene is practically non-explosive. The generator may be handled with safety by a child
