The medical officer of library have been at the disposal The light committee has been given ing committee of three leading phys- ferent insurance officials cians of Toronto. Arrangements have been made with the police authorities whereby persons arrested for drunkenness (when not hardened offenders) may be committed to the care of the society, instead of being sent to jail and forced to associate with the vicious and the depraved. The medical treatment is conducted on strictly ethical lines-no secret remedies being used and it is continued for three weeks, while the probation or parol

is continued for several months. The scheme is a unique economic measure, which for the class referred to renders prolonged detention in an institution unnecessary. It combines maximum efficiency with minimum expense. We wish to put this unique a sufficiently ample scale, to be used as

in object lesson, before the next meeting of the Ontario legislature. The result we do not doubt would be eminently satisfactory, and would more than justify legislation along At the last quarterly meeting

this society, the report of the officers was most gratifying, inasmuch as sixty per cent. of the cases of inebriates treated and cared for were doing remarkably well. In view of this sat isfactory report it was decided to make an appeal to the public financial help to carry on the work efficiently, and as an object lesson before the next session of the Ontario Life Building, or to the secretary, 76 Prince Arthur avenue, Toronto; E.
