Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soar and follow directions In ancient Rome all conveyancing was done on brass tablets.

ries are entrances to the shops snapped, at under 120 pounds, some withstanding as high as 145 pounds'

her Work Places. The blacksmith and machine shops, The first we visit is the shoemaking with their rows of forges and lathes, visitor are they. The room is of bee-hive of industry needs little or no

The steam laundry, in charge of weddell, who has under him about asks Mr. Moore, as you enter. "Yes a metal cabinet huge, tall, narrow drawers run out on overhead sliding wheels. On these drawers are hung the clothes to be dried. They are then swung back into position and hot steam passed through until the materials are completely dried. The baths are also situated in this wing of the building, and under Mr. Moore's care. They are surprisingly neat and clean. Each prisoner is forced to visit them at least once a week, and each has his own shower bath, towels, etc. Everything is systematized through The stone-cutting department is

busy one, as would naturally be expected, with building and repairs be ing constantly carried on, is in charge of Instructor James Lawlor, and al the stone hewn from the penitentiary quarry is here transformed into build ing blocks. The long shop looks quite scaped the perils of the deep. Here an alarm. A convict has broken the presided over by Frederick W. Dicken and hammers. To see long rows of coal, stone, supplies, etc., are received bonds which separated him from free-direct when shipped by water, while dom and the whole countryside must past four years, previously to which klong music is quite fascinating. on the other hand connection can be be scoured till he is brought back he was allied to the same industry at long music is quite ascinating.

Of the engineer's department and of the walled enport the inmates may turn out. As for closure, imposing structures of the rail communication, this is provided when necessary by a sidetrack from the huge dome of the central building the electric car line which runs directing off the surroundings and the electric car line which runs directing off the surroundings and the electric car line which runs directing off the surroundings and the electric car line which runs directing off the surroundings and the electric car line which runs directing off the surroundings and the electric car line which runs directions are noticeable, twine factory is run solely in the interest of the electric and the be bought direct by the farmer, so from which the lights of the institution are controlled, was immaculate

Not a sign of dust or oil on ar part of the machinery, which worked without the slightest jar. Every brass rail, etc., brilliantly polished. To the lay mind, no flaws were visible and as in the other shops visited, nothing but good words remained to be spoken of these departments. Before leaving the building which encloses this busy little world, let us take a little peep into the change room. One wonders what they do in this funny room. The walls are lined with tiers of numbered boxes and their counterparts arise in rows from the

floor. It is the change room, which every convict knows so well. Here he is provided with his change of attire and with regularity he marches to his necessarily be the keynote to all things and Guard Marsh sees that the de partment under his guidance suffers nothing in comparison with the oth ers. Of the farm it is useless to sa anything. This vast expanse of land speaks for itself and for John Mo Caugherty, who superintends its work-

The Prisoners' Cells. And now we pass on through the next building, which is none other than the home of the convict. Tier upon tier of narrow cells run off from another central dome, which is the interesting details from our stay there will, we hope, appear at a later date

And now, bidding good-bye to all we pass once more without the gates The Best Mower

Only \$3.50

The output of the same would interest readers of the Whig in that they might be given, an idea of what daily passes on with meatness and despatch, within the four great stone walls and how the convict spends from day to day when once he has passed the gales and is no longer allowed communication with the outer world, Much might be written on the subject, but the space will not permit that more than the observant merely of the little bechive of industry carried on at the peniters.

The output of the factory when running at its full capacity is about 500 forms per year of the highest standard golf for twine. More of an inferior quality, and only measuring 550 feet, and throught well and the consideration possible under could be manufactured, but the management role to turn out only the best article available. Several tests of incommunication in nearly all the consideration possible under the writer's presence, and while in the writer's presence, and while in the writer's presence, and while on the writer's presence, and while the writer's presence, and while the writer's presence, and while in the writer's presence, and while in the writer's presence, and while in the writer's presence, and while writer in calor, possibly due to the smoke and turnes from the turnees and machinery within. About this dome run guellevies, one on the ground floor, the other on an elevation corresponding to the second storey. From these binding sheafs, yet not one sample with the course world almost every official to make the prisoner better for his life within the part of almost every official to make the prisoner better for his life within the part of almost every official to make the prisoner better for his life within the part of the factory when running at its full expacitly, and only measuring 550 feet, the part of almost every offic and order. The effect of all this can not help but become apparent in inmate's daily life, and the warden should receive due praise for its/ existence. These are the two quistending features that struck the writer. and he was much impressed thereby The outsider has much to learn by visit to Kingston's great penal institution. Many erroneous ideas will be
