"The Perfect Food"

Same Big Package Same High Quality

Malfa-Vifa "The Perfect Food," malt life, as its name implies, stands for that intense vitality that results from the daily use of a food skilfully prepared from the whole of the wheat, of which, after being cooked, each kernel has been subjected to the searching digestive action of the diastase and other enzymes of barley malt. This makes it a "predigested" food of highest nourishment value, which explains the remarkable results obtained in cases of nervous debility, deranged stomachs and constipation. Besides, it is the best "We have used several boxes of Malta-Vita and think it the finest food we

have tried yet. Having used different kinds, we find Maita-Vita has a flavor which excels all others. We had almost despaired to find something our baby could eat without being distressed. He had, since birth, been a constant sufferer from constipation and a general derangement of the stomach and bowels. Since we began feeding him Malta-Vita he has improved wonderfully in health and is entirely cured of constipation. In fact, myself and husband realize a great benefit since using the food, as we have suffered from general debility. We find it gives life and tone to the entire system." Name given on request by Malta-Vita

MALTA-VITA is a food with a "taste." It does not belong to the tasteless variety of "flaked foods" and too great credit cannot be claimed for Malta-Vita on account of the fact that it contains its own sweetening agent-maltose always be present in a proportion exceeding eight per cent and sometimes ten per cent. This is a healthy, digestible sugar, formed by the action of the mait diastase upon starch and it causes the stomach no inconvenience. This is not the case with flaked foods that are sweetened by cane sugar, beet sugar, maple sugar, boiled cider, glucose or grape sugar, as all these cause acidity in the stomach and are seriously injurious.
