BISON FURNACE

With a Bison Hot Water Furnace in the basement, there is little need for brush or scraper.

No place in it for soot or dirt to lodge, and its flues are practically self-cleaning.

In most furnaces the water jackets are constantly covered with soot and ashes, requiring constant cleaning to enable the fire to heat the water—a dirty job.

The Bison has more good heating points than all other heaters combined.

AN UNPOPULAR MOVE

PRESSING APPEAL AGAINST HON. W. S. FIELDING.

The Shelburne Gazette (Independent) Says the Sentiment of the Best Men of Both Parties is Opposed to the Attempt to Harass the Minister.

Halifax, Sept. 6.—The Shelburne Gazette, which is strictly neutral in politics, in its last issue strongly reprobates the proceedings in the courts against Hon. W. S. Fielding and does not hesitate to say that the attack will recoil on the conservative party. The Gazette says: "Nobody can have stronger feeling against corrupt practices at elections than we entertain, and we believe we would be among the first to endorse action against anybody guilty of such whether he were liberal or conservative. But that it should be attempted to hold responsible such a universally esteemed man as the minister of finance for acts done unknown to him by well-intentioned but over-zealous followers will, it seems to us, do the conservative party more harm than good, an opinion that is apparently shared with us by many of the best conservatives in both Shelburne and Queen's. That this is so evidenced by the fact that conservatives in both communities, so we understand, were opposed to carrying the matter to trial, and since Mr. Fielding has been unseated have expressed themselves strongly in favor of his being returned to parliament by acclamation, a graceful and courteous act on their part. We note that appeal is to be taken to the supreme court of Canada against the decision of the lower court dismissing the personal charges against Mr. Fielding, but we hope the finding of the court below will be sustained, a hope universally shared here, we believe, by a majority of both parties."

IRON MAKES NEW BLOOD.

There is more or less mystery and doubt as to the specific action of many drugs, but it is positively and definitely known that iron forms new red corpuscles in the blood, or, in other words, makes the blood rich and nourishing.

But iron alone cannot be taken into a delicate stomach. The great secret of the success of Dr. Chase's Nerve Food is in the way iron is combined with certain other restoratives so as to make a preparation that can be used with the greatest benefit by even the most weak and delicate person.

Dr. Chase's Nerve Food is also slightly laxative as well as tonic in influence, and while building up the system insures the regular and healthful action of the digestive, filtering and excretory systems.

If you would enrich the blood, strengthen the nerves and replace weakness and disease with health and vigor, use Dr. Chase's Nerve Food; 50c. a box, six boxes for $2.50, at all dealers, or Edmanson, Bates & Co., Toronto.

Old folks and young folks and little children, all have found that there's nothing quite so good for breakfast, or at any other meal, as a bowlful of Malta-Vita with cream or fruit. SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba or the North-West Province, excepting 8 and 26, not reserved, may be homesteaded by any person the sole head of a family, or male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Application for homestead entry or inspection must be made in person by the applicant at the office of the local Agent or Sub-agent.

An application for entry or inspection made personally at any Sub-agent's office may be wired to the local Agent by the Sub-agent, at the expense of the applicant, and if the land applied for is vacant on receipt of the telegram such application is to have priority and the land will be held until the necessary papers to complete the transaction are received by mail.

In case of "personation" the entry will be summarily cancelled and the applicant will forfeit all priority of claim.

An applicant for inspection must be eligible for homestead entry, and only one application for inspection will be received from an individual until that application has been disposed of.

A homesteader whose entry is in good standing and not liable to cancellation, may, subject to approval of Department, relinquish it in favour of father, mother, son, daughter, brother or sister, if eligible, but to no one else, on filing declaration of abandonment.

Where an entry is summarily cancelled or voluntarily abandoned, subsequent to institution of cancellation proceedings, the applicant for inspection will be entitled to prior right of entry.

Applicants for inspection must state in what particulars the homesteader is in default, and if subsequently the statement is found to be incorrect in material particulars, the applicant will lose any prior right of re-entry should the land become vacant, or if entry has been granted it may be summarily cancelled.

Duties.—A settler is required to perform the conditions under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of a homesteader resides upon a farm in the vicinity of the land entered for by such homesteader the requirement as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirement may be satisfied by residence upon such land.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

YUKON OUTPUT.

More Gold This Season Than Last Year.

Montreal, Sept. 6.—Rev. Dr. T. E. Potterton, pastor of the Church of Our Father, of Brooklyn, the latest arrival this year from the Alaska and Yukon gold fields, brings the first information regarding the value of the output of the camps. Dr. Potterton said: "The output of the Yukon will be larger this year than last. The most competent authorities estimate that Alaska and the Yukon will between them send out $35,000,000 worth of gold this year. In both these mining regions new discoveries are being made. The dredges that are now in use are going over the ground that has already been worked by hand, and are finding it profitable to work the tailings, which were considered of small account when the gold fever was at its height. A company headed by the Guggenheims have acquired a good deal of gold-bearing land, and will give an impetus to mining on a larger scale than has hitherto been attempted."

Belleville's new Corby library, when finished, will be finer than anything of the kind in any of the smaller Ontario cities. The old Merchants' bank is to be remodelled, and the lawn at the back made in to a park.

Abram Bailey, Foxboro, and Miss Eleanor Thrasher, of the same place, were married, in Belleville, this week.
