SYNOPSIS OF CANADIAN NORTH-WEST
HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba or the Northwest Provinces, excepting 8 and 20, not reserved, may be homesteaded by any person the sole head of a family, or man over 18 years of age, to the extent of one-quarter section, of 400 acres, more or less.

Application for homestead entry or inspection must be made in person by the applicant at the office of the local Agent of Subdivision for entry or inspection made personally at any Sub-agent's office may be filed at the local Agent or the Sub-agent, at the expense of the applicant, and if the agent applied for is vacant on receipt of the telegrams, such application is to have priority and the land will be held until the necessary papers to complete the transaction are received by mail.

In case of "pre-emption" the entry will be summarily cancelled and the applicant will forfeit all priority of claim.

An applicant for inspection must be eligible for homestead entry, and only one application for inspection will be received from an individual until that application has been disposed of.

A homesteader whose entry is in good standing and not liable to cancellation, may, subject to approval of Department, relinquish it in favour of father, mother, son, daughter, brother or sister, if eligible, but to no one else, on filing declaration of assignment under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother if the father is deceased) of a homesteader resides upon a farm in the vicinity of the land entered for by such homesteader the requirement as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirement as to residence may be satisfied by residence upon such land.

Before making application for notice the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

WEST-MINING REGULATIONS.
Coal.—Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 20 cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of \$5 per annum for an individual, and from \$50 to \$100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1,500x1,500 feet.

The fee for recording a claim is \$5. At least \$100 must be expended on the claim each year, and to the mining recorder in lieu thereof. When \$500 has been expended on a claim, the holder may upon having a survey made, and upon complying with other requirements, purchase the land at \$1 per acre.

The patent provides for the payment of a royalty of 2 1/2 per cent on the sale of placer mining claims generally are 100 feet square; entry fee \$5, renewable yearly.

A free miner may obtain two leases to dredge for gold or silver each for a term of twenty years, renewable at the discretion of the Minister of the Interior. The leases shall have a dredge in operation within one season from the date of the lease for each acre, to be paid \$10 per annum for each mile of river leased. Royalty at the rate of 20 per cent collected on the output after it exceeds \$10,000.

W. W. CORY,
Deputy of the Minister of the Interior,
N.B.—Unauthorized publication of this advertisement will not be held for.

WILL THE NEXT WAR
BE FOUGHT UNDER
WATER? HOW THE WORLD
POWERS ARE PREPARING FOR IT

For some time after the attention of naval constructors was turned seriously to the possibilities of submarine, these vessels were regarded as being little more than dirigible mines, their limited range detracting from their value.

Inventors, however, have worked steadily to overcome this defect, and submarines with a considerable cruising radius are now being added to the armories of the world.

Least among the Shark, one of the latest additions to Uncle Sam's fleet, of under-surface destroyers, was given a six days' endurance test with its two-cylinder gasoline engine to determine how long that engine would run the vessel should the regular electric motor break down.

More than 500 miles was the distance covered by the little vessel in this test, during which she went through all the manoeuvres incident to warfare, and demonstrated the terrible murderous possibilities that lurked in her steel shells.

While the United States, England, France, Germany, Russia and Japan are leading in the race to equip their navies with this new style of fighters, not only do several of these nations endeavor to prevent the leaking of information regarding their plans in this direction, but all experiments were conducted with more or less secrecy.

Besseny's Annual—a British marine authority—for 1905 stated that France led all other nations in the number of submarines, having thirty-nine completed and nine in course of construction.

Great Britain was next in order, in possessing seventeen completed vessels, with ten on the ways and eleven more projected.

The United States was credited with eight completed vessels, and had four more in course of construction. Its submarines in service are the Adder, Grampus, Holland, Moccasin, Pike, Plunger, Porpoise and Shark.

During the war between Russia and England, Twelve were shipped in one lot to Russia. It has been stated, and since the conflict has ceased it is understood that the Russian govern-

ment has ordered a considerable flotilla in addition.

Just how many the wily Japs secured is known only to themselves. It is said that they purchased two in the United States and two others in Great Britain, besides ordering the construction of several more in the latter country.

It is said that the Japs have been assimilating the best ideas from all sources and are quietly constructing a submarine fleet at home, about which the authorities of other navies know little or nothing, but which is causing them the most intense pang of curiosity.

This is quite natural, because of the general belief that if the resourceful and ingenious Jap springs a submarine boat of his own design, it will be something well worth watching.

Germany is farther behind in adding submarines to her fleet than her powerful neighbors, but during the last year or so has been devoting more attention to the subject.

The Kaiser is not permitted to spend all the money that he wishes upon his navy, and he may be awaiting the results of extensive experiments being made elsewhere, in order to adopt the best idea.

Italy has also attracted a keen interest in this subject, and is planning to possess an up-to-date fleet of under-surface destroyers. Like France, she is conducting experiments and building her submarines with great secrecy, so that the real extent of her operations along this line are unknown to those outside the government's confidence.

Spain and Brazil both possess a single submarine of rather antiquated type, while Portugal has been testing the lone specimen that is attached to her navy.

United States navy—are expected to do equally as well. All the newest vessels are fitted with devices by means of which the officers can see the surface of the sea and watch the movements of other vessels when the submarines are below the surface.

Fortunately, in its test of this new engine, the American navy has so far escaped loss of life, but both the English and the French have paid a high price.

Two years ago submarine A1, of the English fleet, was struck by a surface vessel of Portsmouth and sunk, carrying down two officers and nine men. More recently fifteen men lost their lives by an explosion on A5 at Portsmouth.

While manoeuvring in the Mediterranean the French submarine Farfadet sank last year, carrying an officer and twelve men to their death. It is rumored that the French have sustained other serious losses of life in connection with submarine tests, but all experiments are conducted so secretly that little is known of results.

C.P.R. IN CENTRAL ONTARIO.
Proposed to Compete With the Grand Trunk.

According to a Belleville, Ont., despatch, the Canadian Pacific railway has started a party out to survey a line from Belleville to Scarborough, passing in all the towns between those points now served exclusively by the Grand Trunk railway. The intention is to build a line southwards from the company's main line at Trenton, to Belleville and then run west to Toronto, where the main line into Toronto will again be connected by a short line from Scarborough to probably Leaside Junction.

The surveyors have been instructed to get as close to the towns as possible. This new line, when built, will give the C.P.R. access to the most profitable fruit district of Eastern Ontario. It will take in such towns as Trenton, Cobourg, Port Hope, Bowmanville, Okanago and Whitby. There is a very large business handled from these places as well as such intermediate points as Brighton, Colborne, Grafton, Newtonville and Keswauke.

Another important feature of the line is that it will furnish the Canadian Pacific with a double track line from Toronto to Trenton, which would probably be extended to Smith's Falls to meet the double track which is projected from that point to Vaudreuil, which would give the company a double track all the way from Montreal to Toronto.

The projected new line is another indication of the intention of the Canadian Pacific Railway authorities to invade all the Grand Trunk's profitable territory in Ontario as a result of the invasion of the Grand Trunk Pacific into C. P. R. territory in Manitoba and the west.

Bean Crop Damaged.
A special report on the Ontario crop says: The extreme drought which had lessened the yield was broken by excessive rain, which, coupled with the extreme heat, caused great damage. In many instances the pods were driven into the moist ground, causing the beans to discolor and rot. In some instances they have been pulled but not housed. The damage is very serious. The quality will be materially affected, and the merchantable quantity reduced. Conservative estimators claim that the government report can be cut in two. Owing to the above conditions the new beans will be soft and not fit for shipment for some time after being threshed.

Ottawa And Return, \$3.60.
Rideau Queen leaves Swift's wharf, Monday, September 10th, at 6 a.m. Returning, leave Ottawa Wednesday, September 12th at 3 p.m., giving passengers nearly two full days and one night to see the Ottawa exhibition, and to return Friday, September 14th.

John Palmer, a respected farmer residing near Glen Bush, died at St. Vincent de Paul Hospital, Brookville, on Wednesday. He had been ill for the past four weeks. Deceased was about seventy years of age and besides his wife leaves a family of two sons, Messrs. Palmer, Athens, and Henry Palmer, Watertown, N.Y.

Piles positively cured with Dr. Shoop's Magic Ointment. Mrs. Clark, widow of the late Andrew Clark, died at the home of her son-in-law, Edward Tennant, Carleton Place, on Thursday last, aged eighty-two years. She was formerly a resident of Drummond.

William Gage, farmer, was accidentally killed near Ridgeway while seaming beams.

Free Treatment for Sick Kidneys
WRITE FOR GIN PILLS

If you have suffered for years with kidney trouble—if you know your kidneys are sick, but have not been able to find anything that will help you—or if you suspect that you have kidney disease, write for a sample of GIN PILLS, the pills that cure. We don't ask you to spend a single penny, or promise to spend any. Simply take the box of pills which we send you free of charge. We leave it to you whether or not you will take any more after the sample box is gone.

REY PORTAGE, October, 1905.
I was troubled for two years with kidney trouble, as common among railway men. I doctored in the regular way and took a great deal of medicine, but received no benefit. My friend recommended Gin Pills, and I am pleased to state that after taking the first box I got relief, and while I am not taking them regularly I feel free of charge. A few doses put me all right again.

CHAR. SIMMONS, C.P.R. Engineer.

This letter is the experience of hundreds. They try doctors and drugs without relief, but they find the cure for their trouble in GIN PILLS. Take advantage of our generous offer. Mention in what paper you saw this, with your name and address, and we will send you, absolutely free of charge, a sample box of GIN PILLS. They are sold by all druggists at 50c a box, or 6 boxes for \$2.50.
