nsects that are lised as food Flying Beetles that Savage Peoples Crave

parts of Africa Chief among insect articles of diet is little winged creature has been

de the food of man. listeric carvings taken from the sets to market, the insects being tied to long sticks. In ancient Athens locusts and grasshoppers were sold as regularly as other produce, and it is recorded that they were preferred as fainties to quail or the choiceste figs. The law of Moses, as set forth in ed in Palestine, where the in-

African races virtually live sts, which are captured in rests in immense quantities. which the insects have lodged, and se smoke suffocates them, so that sey fall to the ground by the bushel. In different parts of the world there is different methods of preparing its dish for cunsumption. Arabians the locusts in the sun, and afte rind the bodies into a kind o ith camel's cheese and dates. ertain tribes of Central Africa pre

e to stew the insects and make them nto a thick soup; in Madagascar they are baked in huge jars, then ried in grease and mixed with rice.

Peasants of Southern Russia regard the locust as one of their staples. of food. The insects are gathered in uantities and smoked like herring. When prepared for the table, the legs and wings are detached, and the bodies are boiled, roasted, fried or stewed, according to taste.

According to those who have sampled the dish, the flavour of locusts, which is strong and disagreeable when

raw, becomes mild under the cooking process, and is readily disguised by the addition of other ingredients to

come years ago P. L. Simmonds ex-rimented with a Rocky Mountain scies. He made a broth by boiling oung insects for two hours. Seasoned with salt and pepper, he selared that the product could scarce be distinguished from beef broth. Some friends whom he induced to

le the dish agreed with him When seventeen-year locusts visited several eastern states, a few years ago a man in Baltimore made locust pies and invited his friends to a feast.

He was the only one, however, who partook of the delicacy. Although he pronounced it very palatable, he could not induce others to sample his It is said that locusts, fried in their own oil and with a little salt added have a decided nutty flavor and have by no means an unpleasant taste.

In countries where the insect is re-cognized as a regular article of food, it is said that persons soon acquire a

the said that persons soon acquire a taste for it.

The food appears to be wholesome and nourishing, at any rate, as members of locust-eating tribes become fat when the insects are plentiful.

In addition to the locust, the ancient of the common cricket. This taste is preserved by the natives in a considerable section of south-castern African family is found, generally dwelling in holes in the ground. The natives cupture these, either by digging them up or watching at the entrances to the little caves.

In a paste of flour, milk and eggs at the worms were fried to a rich golden and served piping hot to about the grub of the May bug. Another wood botting beetle, known as prionus, is one the chrysalides of silkworms are responsed that they called for a second, thelping.

An umbrella carried over a woman, the chrysalides of silkworms are responsed to the marriage, as the grub of the May bug. Another wood botting beetle, known as prionus, is one pleased that they called for a second, the plant of the dinera were along the the dinera were so the grub of the May bug. Another wood botting beetle, known as prionus, is of the dinera were so pleased that they called for a second, the provided feasts for banqueters along the Tane to-day. The popular method of preparation is as follows:

"Roll the 'ver blanes,' which are family is found, generally dwelling in holes in the ground. The natives cupture these, either by digging them up or watching at the entrances to the little salt and pepper, and this may be the small very per late the depth of the dinera were along the theory and an always of salt when the cocoons of yellow silk have been removed, they have provided feasts for banqueters along the triber. When the cocoons of yellow silk have been removed, they have provided as a luxury. When the cocoons of yellow silk have been removed, they are hawked about the streets, and sell, readily at a price equal to about 10c, a pound. There's nothing in the world we're so much interested in as Coal at this time of the year. It may sound queer to speak of coal buying and selling as science, but that's what we've made it. Two important discoveries we have made are that complete satisfaction to our customers pays best, and that the way to win business is to deserve it.
