ON THE FARM.

Notes on the Practical Side of th

The value of ploughing matches has been recognized in many sections of operation, and each farmer ploughs a walking plough so as to do evenly, rather than straight, and the same width and depth. In section of Illinois, where corn grown extensively, the yield has been increased fully thirty per cent. by

Prof. Shaw, of the Michigan Agricultural College, well-known to Ontario farmers, has given excellent advice to dairymen. He spoke strongly against the reckless tendency of crossbreeding their stock. He urged breed suited to his needs, and stick to it, not changing from a sey to a Shorthorn, and then to an Ayrshire, or Holstein, Guernsey, etc.

This year sixteen cow-testin asso ciations have been organized through the initiative of the Dominion Department of Agriculture. Records are being kept of the production of 4,500 coms owned by the 350 members. The results will be published after the senson is finished. This is only the ginning of what should be a great national movement for the improvement

Ontario farmers this fall are testing the all-important question of cost in the production of pork. It has been ascertained already that thrifty shoats may be purchased at a higher rate than the prevailing market price and fattened and sold at a good profit, That coarse grains and second-grade wheat, by judicious feeding can be marketed at handsome profits has been proven beyond a doubt.

A big crop of potatoes was grown in Aroostook county, Maine. Fully 13,000,000 bushels, or an increase of 2,000,000 bushels over last year, will been experienced in getting help to house the crop. The yield is running numerous instances the yield is 300 aging 40,000 bushels a day from this
