Tortoise ____

THIS IS THE STOVE that you hear so much about. It is not so much to look at, but it is truly a wonderful stove. It is what is called a Slow Combustion Heater. It is lined from top to bottom with fire brick, and has no grates to burn out. The fire burns right on the brick bottom, and it consumes its own ashes and clinkers.

Those who use the TORTOISE, and there are thousands of them in service. claim that it is a tremendous heater, and that it will do the work with half the fuel required by any other stove, and that it requires very little attention.

Manufacturer's prices have been greatly reduced. Now s the time to buy.
