TONIC SOL FA How to Start MR. MEDLEY STRONGLY AD-

VOCATES ITS USE. It is Much More Easily Learned Than Staff Notation-No Instrument Needed-In General

Use in England. An important matter to come be the board of education on Fillay night is to report on the petition the public school teachers in regard to appointing an instructor to teach the Toni: Sol Fa system of singing to the pagils of the local schools. W. H. Medley was interviewed, this morning he thoroughly understood both the Tonic Sol Fa system and the common system of staff notation. Staff notation, he remarked, was in vented to teach instrumental music one's notes without accompaniment. "On the other hand," declared Mr Medlee, "the Tonic Sol Fa system consists of what is termed as moveble Do, and takes the beginner through an intelligent and compre hensive system which, in comparison with staff notation, could easily be likened to learning the key of major,'

The time is rive for the introduction of this system into Kingston. Toronto has found it very beneficial, after an experience of some twenty years. In England, said Mr. Medley, five million children are, at present, learning the system at the public schools, and it is also in use through our dominion in the maritime provinces, in Quebee, and in all the important cities throughout Ontario. It has been said that the Tonic Sol Fa system is lead; if foreign news is at all dependable it is easily seen that the system has more advocates to-day than ever before. It has been proved that pupils of Tonic Sol Fa system can sing from the staff notation, but to reverse this is absolutely impossible. Numbers of singers are against this system of teaching, but that is only You can go right ahead with your because they know nothing of the system it being much the easier learned, and, in Toronto, last year's five choruses were sung by 30,000 public school pupils not in unison, but

Mr. Medley closed by saying that he was strongly in favor of the system, and agreed with the teachers that what would prove a little diversion from the regular work would be of benefit to the papils, and would druff, falling hair and baldness, you rest them. An expert to propound the will have no more dandruff, and your system was absolutely necessary. As hair must grow luxuriantly. Students of Hygiene All Agree Tha the Right Kind of a Breakfast Is Essential.

Thinking people are giving more and more earnest thought as to how to start off each new day so as to put themselves in the best possible physical and mental condition for the work of the day. It is an interesting subject, so interesting indeed that it has attracted the attention of a host of the world's leading scholars and authors on hygiene and many different opinions have been written for the suidions have been written for the guid-ance of the people. On one point, at least, all are agreed. This is that the right kind of a breakfast is essential. A perfect breakfast is essential without Malta-Vita, that delicious, crisp, vitalizing, whole-wheat food.

In making Malta-Vita the whole of the wheat, after being cleaned, is thoroughly steamed and cooked in absolute purity and then mixed with malt extract; a powerful digestive agent, which converts the starch of the wheat into maltose, or malt sugar. Maltose is great food and the weakest stomach digests and assimilates it without effort. After being rolled into thin wafer-like flakes the malted wheat it baked under such intense heat that it comes from the ovens crisp and brows—positively the most delicious, most healthful food in the world.
