YOUNGEST OF ITS SIZE IN DOMINION.

in Alberta-Price of turing Process.

The factory represents an invest-ment of \$500,000, and has been in operation for three years. In 1904 likely to increase.

within a short time large areas in are adorned with knobs which would Southern Allerta will be devoted to its production, and in the near future several large factories will be in operation turning out sugar in great known jeweler in Regent street said quantities. Sugar beet raising is past the experimental stage. Beets last year produced from \$30 to \$75 an Drop earrings, which weigh down the acre, on well cultivated lands. Forty dollars is an average profit on beet fields. Sugar beets in Alberta contain two to five acres, some as high as twenty. The soil after the first year yields fifty to sixty tons per acre.

Sugar Factory's Capacity. liquor traffic prevails in the town.

Process of Manufacture. The beet sugar served in the hotel other, though it was rather finer in quality than some. The processes of making the sugar are many and various. Dumped from the wagon the beets are carried into the flume, and thence into the washing receptacles.
After a thorough cleansing they are cut up into what is called "cosette chinery, where they are put through several processes, the juice of the beet being extracted from the water. Clarification by chemical processes then takes place, and the juice is boiled in receptacles from which the air is exhausted, the clear, white sugar being the eventual result. Molasses is a by-product, and the pulp remaining is put into a silo for cattle.

Sending Wheat to Japan. Raymond has other claims to distinction, or will have at some future day. The Milling and Elevator Co., which has a 40,000 bushel elevator only 14 months after the first sod was turned, was grinding wheat and sending it to Japan. Now the company has trade in China, Australia and Vanyielded fifty bushels of wheat per acre. The winter wheat yield has in-creased from 82,000 bushels in 1903 to over a million bushels this year.

A Canadian In India. The Kalamazoo correspondent The Detroit Free, Press is authority sons, so to speak, is now Mayor of Bombay, India. The man in question is Mr. Milton De Witt Girdwood, who events for magazines. He was sent to Europe by the firm which employed photograph the chief scenes at Lord Curzon's Durbar. Later he was the official photographer on the tour of the Prince of Wales, in India. He was so taken with the country that he settled in Bombay as the Asiatic general agent of his firm. The correspondent says he was "appointed Mayor." say, but at all events Mr. Girdwood is doing pretty well, thank you, and the United States correspondent admits that the fact that Mr. Girdwood is a Canadian by birth and never renoun-ced his British citizenship aided him in his rapid advance. There are times when it pays not to be a United States

Raymond, Alberta, is the youngest | The old-fashi ned two-button glove the townsite was a bare prairie. Now man's hands. Twenty or twenty-four buttons measure the exaggerated length of her driving, morning or scented white kid "at home" gloves. Boots have doubled their height, while the simple laces on walking warehouses and public buildings, and has a population of 2,500 people.

It is the headquarters for some of the largest ranching and cattle enterprises in the Canadian West, and of the Knight Beet Sugar factory, the only one of its kind in Canada west shoes have been replaced by ribbons tied in enormous bows.

A reporter who visited well-known London forms to learn the extent of this craze for magnificent adorn-

operation for three years. In 1904 this factory sliced 11,900 tons of beets and manufactured 3,160,000 pounds of sugar. Bags on bags of sugar are kept

Alberta are especially adapted to the growth of the vegetable in question, and land in the vicinity of the sugar town is rapidly increasing in price.

Ranch land is worth \$4 and formal town. It seems odd to talk of "beet lots,"

The sugar factory has a capacity requiring 400 tons of beets per day. These are contracted for at \$5 per ton, though the sugar factory itself owns 260,000 acres. A great deal of hand labor is employed, children working in the fields thinning out is quite out of date, and has been on the inventor of the invento the rows. The Mormon men hand over the money they earn to their wives, who are the financiers of the family. Raymond is the headquarters of the Taylor Stake of Zion, according to Mormon definition. This denomination has built a meeting house which will seat 1,500 people, and eventually they will erect a tabernacle and temple. Prohibition of the

Canada's commercial agents in Eng-land report that Canadians are not vigorous enough in teaching Britons to eat our products. The two articles much more energetic. They ask at shop after shop for "American" peaches and corn and tomatoes and if storekeeper that no other kind will do, and also where they can be got by wholesale. If the articles are kept they purchase a few cans and distribute them among their friends, or More than 8 per cent, of all sea-far-ing men are afflicted with rheuma-might do worse than take a leaf out

FLY ACROSS OCEAN.

thyst in the rough. Cable chain bracelets bear a close resemblance to territory. The Auto Car, an automobilmade in Great Britain. The Graphic

Whaling In Scotland. A visitor who has spent the last two tsman the Norwegian whale fishing industry carried on in that British island. He writes: "Every part of the whale is made use of. The blubber is run down into oil. The flesh is boiled, dried and ground into cattle food; the bones and offal are boiled, dried, and ground into guano. Only the liquid that escapes during cutting up, and a little overflow from the offal boilers, even among the blades of whalebone spread out on the grass to dry. I un-derstand the workmen regularly cook and eat the whale fiesh. In Denmark ber," she told an interviewer once, "on one occasion playing in Dublin. It was Juliet. In the death scene, when I seized the dagger and stabbed myself, a very excited Irishman in the ed several hundred barrels. Regarding the kinds of whale killed, there are two. The finner, 60 to 80 feet long

to kill. The Height of Wavesitself on top of between 2,000 and 3,-000 fathoms of water, will completely

change its character on coming into shallower soundings. The drift is curtailed and the crest becomes peaked Near the Eddystone lighthouse, where the depth steeps within the range of but a few miles from 200 fathoms to 300 fathoms, the sea has been known to heap up into a solid wall of green water to a height of more than 100 feet. Such a procession of billows bearing down upon the famous light-house leave nothing but its lantern

visible above their frothing ridges. The expression, "green water," or "green sea," by the way, is used to denote the actual wave body, as dismay throw up on breaking. Thus the years. A fresh bottle was used each time, being uncorked in the room; the King, whose hair was short and water, but on bursting they will fling their crystalline showers to a height of substantially over 100 feet.

Military Moustaches.

quite white, would place his head over the ewer, a large towel having been tied around his neck, and the sweet on its red tape, and Irish officers have being clean shaved, contrary to the think at that moment I wished I was King a regulations. This provision may be regarded as merely a sentimental time. After the ablution came the drying on a soft towel; then the coat "the hair of the head is to be kept one, but the further requirement that "the hair of the head is to be kept and waistcoat were donned, and with a rosy and sweet-smelling face, the old King, after kissink his small chil-dren, would walk into the breakfast moderate length," suggests practical considerations. Shaggy locks and patriarchal beards have proved highly inconvenient things to have on the battlefield. Does not history record that Alexander ordered the Macedoniof offenders by force."

Light Is Life. The extraordinary resuscitating power of light recently received a curious illustration in the silver mines at Laurium. A mine had been abandoned 2,000 years, when some poppy seed was found beneath the slag. The slag being removed, in a short time the engorgeous show of poppies. After their twenty centuries' rest they had bloomed as vigorously as if they had been borne by flowers of yesterday.—London Tit-Bita.

Only 24 Hours From London to New

From London to New York in 24 hours is the latest prediction arising from the air-travel fervor. Walter Reid, the expert adviser of the Aero Club of the United Kingdom, who makes the prophecy, says that its fulfilment only awaits the production of well designed aerial motor. All the elements for the construction of the notor exist. A motor weighing less than five pounds per horse-power can be easily constructed. Its structural material would be infinitely stronger than any in the organic world. A hats. The minute chenille spot is re- bird's wing is a marvelous structure, placed by black velvet patches the but it is heavy compared with the pedo, ought not to be difficult. Steer-ing would then be effected by diverting the machine from its normal balance. The offering of prizes for aerial contests is proving contagious. The owners of the British rights of the Antoinette engine, with which Santos-Dumont's aeroplane is fitted, offer £2,000 to the winner of the Daily

ring hog, which is found much closer inshore, is not taken. It only yields about one barrel oil, and does not pay

The British War Office seems to be as keen on the military moustache as should give a handle to their enemies? Peter the Great was also a friend of the barbers, for he not only ordered all ranks to be shaven, but caused of ficers to go about to cut off the beards

There are still in existence some JAMES McPARLAND -

COLD SORES

The condition of the skin during the cold weather has an important bearing on the general health as well as on the comfort. Sore chapped hands, coldcracks, chilblains-all these, besides being painful and unpleasant, have a detrimental effect on the subjacent tissues. Zam-Buk is more than a mere salve. It is an antiseptic dressing composed of the best herbal essences. Applied to cracked places, chaps, sores, etc., its antiseptic properties come into immediate operation. It kills disease germs, prevents inflammation and suppuration, and then it heals. A leading chemist has proved that the antiseptic power of Zam-Buk is greater than that of crude acid, yet Zam-Buk works without pain. Its healing properties are such that even chronic sores yield to its power. Ask your friends about Zam-Buk. Better still, try it yourself. See free sample offered below.

HANDS SO SORE DARE NOT WASH.

Mrs. H. H. Rankin, of Appin (Ont.), says :-"My hands had big cracks on them which caused me such pain I could hardly work. Whenever I tried to put them near water they would smart and burn as if I had scalded them. They did not seem to be benefited by anything I tried until Zam-Buk was introduced. To my great pleasure, within a very short time Zam-Buk closed up the cracks and healed the sore places. My hands are now white and smooth. "I recommended Zam Buk to a f iend who had a sore

finger, and it cured that, too. I think it a splend d household

Zam-Buk cures cuts, burns, bruises, ulcers, sores, abscesses, boils, ringworm, scalp sores, blood poison, etc. Rubbed in it cares rheumatism and sciatica, and rubbed on the chest cases tightness and aching due to cold.
