All Is Satisfactory. Brewer's Mills, Jan. 21.-The sleighing has almost disappeared and wheels are again in use. F. Anglin held his annual cheese factory meeting on the

TO BREAK UP A COLD IN 24 HOURS AND CURE ANY COUGH THAT IS CURABLE

Two ounces of Glycerine and half a pint of good Whisky. Shake well and use in teaspoonful doses every four hours.

Dr. Leach, the famous throat and lung specialist, who established a camp for consumptives in the Pine Woods of Maine, and whose wonderful cures there have attracted the attention of the civilized world, declares that the above formula will strengthen weak lungs, relieve the cough, heal the bronchial tubes, and cure any case of lung trouble that is not too far advanced, providing the patient will assist by taking plenty of outdoor exercise, inhaling long deep breaths every few minutes.

It is said the mixture will break up an ordinary cold in twenty-four hours, and being free from opiates and drugs, is far preferable for use among children to the ordinary cough mixtures.

The ingredients can be secured from any good prescription druggist at small cost and easily prepared in your own home.

Inquiry at the prescription department of one of our leading druggists elicited the information that Virgin Oil of Pine (Pure) is put up only in half-ounce vials, securely sealed in a round wooden case, with engraved wrapper, showing the name—'Virgin Oil of Pine (Pure)'—plainly printed thereon. There are many rank imitations of Virgin Oil of Pine (Pure), which are being put out under various names, such as concentrated Oil of Pine, Pine Balsam, etc. Never accept these as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea, and never effect the desired results.

A local physician who is familiar with the treatment used by Dr. Leach in his camp in the Pine Woods, says it is undoubtedly the most effective known to medical science at the present time and save for the open air life in the forest would prove just as effective if used in the home. He says that the formula given above is the one used by Dr. Leach and that it has the unqualified endorsement of the leading physicians of the country.

The physician added, if this formula was known and used generally by the people, throat, lung, and bronchial affections would rarely reach an acute stage.

The Pure Virgin Oil of Pine is also a perfect neutralizing agent for uric acid. A few drops taken on sugar night and morning will heal and regulate the kidneys and relieve the most obstinate case of rheumatism if caused by uric acid in the system.

Journal, to meet at Parham, March 2nd.

Busy At The Mines.

Verona, Jan. 22.-The recent rain storm took off most of our snow and the frost made the roads very slippery and hazardous. The snowfall has placed them in excellent condition and the farmers are busy getting up their wood and drawing spar from the mines at Desert Lake. Mr. Peunypacker, superintendent of the feldspar mines in this district, has returned from Philadelphia and is looking after this part of the work. There are several hundred tons of beautiful clear spar to be hauled to the railway track while the ice on the lakes is good, and a large gang of men are working at the Fourteen Island Lake mine. The Baudez mine will soon be opened again, giving work to a number more. This is a great help to the men of this part of the country, when other work is scarce. Our village has not escaped the prevailing epidemic of grippe. Mr. and Mrs. Belmont are recovering from a lingering illness. Mrs. Sanderson is also on the mend. Eddie Grant is ill with typhoid fever, and Rev. John Ferguson is also on the sick list. Rev. Mr. Tanton, Sydenham, has started Anglican service in the Workman hall; there is talk of a new Anglican church being built in visit to Dr. Claxton's. Miss Harmer, the near future, W. A. Claxton and Mr. Leaser, Kingston, paid a short visit to Dr. Claxton's. Mr. and Mrs. Montgomery, at Buchanan's; Eddie Carl has purchased a new piano, James Paine and Eli Walroth are leaving for New Ontario. The Free Methodists held their quarterly meeting this week, commencing Saturday evening.

Gown Of Silver Gray Crepe.

A graceful frock is shown in the accompanying drawing, the model being practical for almost any soft, clinging material. Pale grey silk crepe was used for the original gown, the trimming consisting of a ribbon which velvet ribbon exactly matching the shade of the gown. The skirt had three attached tucked flounces, each edged with a band of the ribbon, which also formed a lattice-work design above these flounces. The bodice had a round yoke of Chantilly lace, and was trimmed by bands of the ribbon and narrow pinked tucks, shown by a study of the drawing. Three little velvet buckles were used in the middle of the belt, just below the yoke, on each sleeve and down the girdle in the back.

Fee Soap And Electric Baths.

Louisville Courier-Journal. Two savants have just announced the discovery of a means of prolonging life indefinitely. A Frenchman says a certain sort of electric bath solves the problem, and a Massachusetts man declares that pea soup is the elixir so long searched for. The French physician is a comparatively young man, who employs the bright vocabulary of youth in which, it is said, there is no such word as "can't." The New Englander is ninety-three years old, and has been growing younger so he asserts, since he discovered the rejuvenating qualities of pea soup and eschewed all other meat and drink with a view to turning back the hands of the clock.

Olive Oil For Appendicitis.

New York Press. "General," said Hill, "you are in fine blood. You neither drink nor smoke, nor chew; you have never dissipated. Don't go to an hospital and be sliced upon for a little thing like appendicitis. Have you any olive oil, something genuine, something made of olives? Yes? Well, take three or four tablespoonfuls of it right now, and repeat the dose every three hours. Fred, took the strong man's advice, and was perfectly well in a few days; and has been well ever since."

The Lapse Of Time.

Everett's Magazine. Mrs. Hooligan was suffering from the common complaint of having more to do than there was time to do it in. She looked up at the clock and then slumped the iron she had lifted from the stove back on the lid with a clatter. "Talk about time and toid waitin' for no man," she muttered as she hurried into the pantry, "there's times they waits, an' toimes they dont. Yisterday at this blessed minute, 'twas but tin o'clock, an' to-day it's a quarter to twelve."

Art Of The Orator.

Washington's Magazine. "What did you think of our friend's speech?" asked the veteran statesman. "It was a remarkable literary study," answered Senator Sorghum. "I never before realized how completely the meaning of words could be effaced by a judicious manner of arranging them in sentences."

Not Lynched Often.

Philadelphia Public Ledger. "We don't lynch a man often, anyhow," remarked the visitor from Iowa. "Neither do we," volunteered the man with the southern accent; "never, in fact, but once."

Every eatcrpan that has been used and finished with should be filled with cold water, a lump of soda put into it, and set to boil out.
