5000 LIVES SAVED YEARLY BY MODERN METHODS IN TREATING CONSUMPTION

In New York since 1881 there has been a reduction in the death-rate from tuberculosis of 40 per cent; that means an

Before a German scientist discovered the germ of this disease, it was considered the visitation of an avenging Providence. Our fathers gave it up as hopeless. Modern methods of treatment, however, have done much towards eradicating the terrible disease.

A noted specialist, whose camp for consumptives in the Pine Woods of Maine has attracted great attention because of the remarkable cures he has effected there, and whose methods have been indorsed by the highest authorities, says his treatment was very simple, consisting of open-air exercise, deep breathing and nourishing food. Every four hours the patient was given one teaspoonful of a mixture of the Pure Virgin il from the White Pine Trees, combined with Whiskey and Glycerine, in the following proportions : One-half ounce Virgin Oil of Pine (Pure), two ounces of Glycerine and eight ounces of good Whisky. Shake well and take in teaspoonful doses every

This treatment strengthened the lungs and healed the bronchial tubes. He claims this formula will break up a cold in twenty-four hours, and cure any cough that is curable. The ingredients can be secured from any good prescription drug-

Inquiry at the prescription department of one of our leading druggists elicited the information that Virgin Oil of Pine (Pure) is put up only in half-ounce vials for dispensing. Each vial is securely sealed in a round wooden case, with engraved wrapper, with the name-"Virgin Oil of Pine (Pure)"-plainly printed thereon. There are many rank imitations of Virgin Oil of l'ine (Pure), which are put out under various names, such as Concentrated Oil of Pine, Pine Balsam, etc. Never accept there as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea and never effect the desired result.
