INTEMPERATE HABITS INCREASE THE LIABILITY TO CONSUMPTION.

The susceptibility of people to tuberculosis is just about

trebled by intemperate habits. This is the estimate of scienti-The disease is not caught as you catch scarlet fever or smallpox, but by germs from dried sputum getting into the lungs. If our bodies are strong and healthy the germs are resisted successfully by the operation of nature; if weakened and depleted the germ will make headway, and death is in-

evitable, unless proper methods of cure are followed. Temperance lecturers could well make use of these facts. Neglected colds are also a prolific source of consumption, as they leave the lungs in a peculiarly receptive condition for the tubercular germ. A simple remedy, which is said to break a cold in twenty-four hours, and cure any cough that is curable, can be obtained from any good prescription druggist at small cost: Take one-half ounce of Virgin Oil of Pine (Pure), two ounces of Glycerine, and eight ounces of good Whisky.

Shake well and take in teaspoonful doses every four hours. To avoid substitution, it is best to purchase the ingredients and prepare the mixture yourself. The Virgin Oil of Pine (Pure) should be purchased in the original half-ounce vials, which are securely seal ed in a round wooden case, with engraved wrapper with the name-'Virgin Oil Pine (Pure''-plainly printed thereon. There are many rank imitations of Virgin Oil of Pine (Pure), which are put out under various names, such as Concentrated Oil of Pine, Pine Balsam, etc. Never accept these as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea and never effect the desired result.
