Beck Explains the

KINGSTON.

Power Scheme. Hon. Adam Beck, chairman of Hydro-Electric power commission power that could be procured from various waterways of the province. The be \$2143 a horse power a year, or and self-maintaining. enerate a horse power of energy

Mr. Beck came to Kingston on sentative gathering of citizens, eager to hear an exposition of the power dethe city was to go ahead.

In introduction Mr. Beck said that t: is as to the advantages that would deal with only one or two. gara power. Since then government that the commission would not commissions have been investigating tribute the power to individual ports. One report dealt with Niagara at the city's distributing point. The commission has under report three horse power, it would not pay and a balf million horse power. This that, but only for what it used.

perhaps the best asset Ontario has, be ent take care of 4,000 horse power. cause Ontario has no coal, and is de- As to street railways, the governpendent upon a foreign country for its | ment proposed to charge such comcoal supply. Hence the value of the panies a higher rate than the municiwater power to the province's indus- pality, but still low enough to make tries can readily be seen. Niagara it to the benefit of the companies to old guard were on their feet, shouting power can be generated for from 88 use water instead of steam power. The to \$10 a horse power, pay interest at profit above cost would go to the the rate of 41 per cent. and pay the credit of the city to which the railway who are a very strenuous lot of play operating expenses and sinking fund, belonged.

steam. This applies to all the waterten million of horse power available from the waterways in Ontario. The water power of this province will, in the years to come, make Ontario the just as Pittsburg is the steel manufacturing centre of the states, be-

The Cost One Half. was not one case in which the price of electricity for power and for lighting had not been reduced at least onehalf. Just as soon as it was demonstrated that the waterways' power can be distributed at a low cost, would Ontario's ores become more valuable because of the ability of the province to develop them. The same would apply to pulpwood, which, instead being exported, would be manufactured into paper, etc., right here.

The transmission of electrical power it were told the people that some years hence power could be supplied in Kingston from Niagara Falls at half the present cost, it perhaps would people hardly be believed, but such would Dr. come true. In one county, electrical power was being distributed 700 miles listant from a waterway at a low cost. European counties were away in advance of Ontario in the way of electrical supply from their waterways which were not nearly so good as those of this province. Ontario had magnificent waterways for power sup-

The Ontario commission's reports had been criticized, but Mr. Beck said e believed the estimates of the engineers to be well within the mark. Windsor would soon have cheap power, from Niagara, but it would not be so cheap as Kingston would get power for. It was necessary for the peogenerations that are to come. The future should be looked to, rather

How To Get The Power. Under the act a municipality has for power. The commission will then report and give the price that the power can be supplied for. Kingston is in a fortunate position in owning its own plant for the distributing the power, and is thus ready to ahead and give the people the vantage of the low cost. Deseronto and Belleville have definite applications for power.

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally and acts directly on the blood and must us surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best tonics know Catarrh Cannot Be Cured. gredients is what produces such wonderful results in curing Catarrh. Send for P. J. CHENEY & CO., Props, Toledo, Sold by Druggists price 75c.

mission for the supply of power neces sary at a cost not to exceed a certain amount. Port Arthur had voted upon it, and the majority in favor of the contract was eighty per cent.

If the government decides to both develop and transmit, Kingston, for instance, would be charged the direct cost of development at the Trent. The the Ontario government, addressed a be charged four per cent. for interest seting of citizens last evening in the and a yearly amount for sinking fund, the full amount to be payable in thirty years. At the end of that time took 2,750 horse power the rate would and collementaring of self-sustaining certainly improved since they played

Mr. Beck came to Kingston on in-vitation of the board of trade, whose er from Trent the rate will be reduced The game started the meeting. On the platform were tric lamp is ready for service, the minutes the puck was on the move also Mayor Mowat, E. J. B. Pense, cost will still be reduced, because this from one end to the other. Queen's won out. The teams were.

the chairman said that the question of for energy for its flour mills. If in rapid succession. The first goal wing. cheaper power was of great importance Kingston gets power for \$25 to \$30, it came on a scramble from in front of to Kingston, which must have it if can easily compete with the other Queen's net. H. Raphael did the places in regard to flour mills.

the power question and making re- sumers. It would supply the power and another with Trent river power. Kingston made a contract for 3,000 water power for electrical purposes is was told that Kingston could at pres-

power can be delivered at one-half the that the citizens were very much incost it would take to develop it by debted to Mr. Beck for his valuable address. He pointed out that the rate for a horse power was for twenty-four hours a day. Most of the industries in Kingston required the power for only ten hours, so that the city cousd sell some of the power over again. Mr. Beck said that in one western place 18,000 horse power was being bought, whereas the municipality was selling 24,000. If Kingston took 3,000 was called, Crawford scored the last horse power, it might sell 4,000, but that was a matter that the commission didn't say anything about. was left to the arrangement of

Mayor Mowat moved a vote thanks to Mr. Beck for his valuable tario's public men would follow in Mr. Beck's footsteps and devote more in matters affecting their interests, iustead of paying so much time to party politics, the better it would be for the country. The mayor said he was pleased to note Mr. Beck's robust optimism and abiding faith in the future of the province. Ontario had private industries the valuable rights of water power development. of the province should be kept for the

Dr. Ryan seconded the resolution and stated that the people of Ontario owed a debt of gratitude to Mr. Beck to the question of water power development in the public interest. trusted that Kingston would take Mr. Beck's advice and get a little more electricity so that the city might

move along a bit faster. The resolution was standing vote, and with hearty applause. Mr. Beck thanked the meeting for its resolution of appreciation, and the gathering broke up at half past ten o'clock

Afterwards, a banquet was held in the British-American hotel, with Mr. Beck as guest of honor. There were ple to take control of the waterways sixty in attendance. Only two toasts were given, "The King" and "The country's natural resources. The duty Legislature." The latter was proposof the legislators was to preserve ed by Dr. Ryan, and responded to by these resources for the people, for the Mr. Beck and Mr. Pense.
