COMMERCIAL MATTERS.

What is Going On in the Business World—The Markets.

C.P.R. traffic earnings for the second week of April increased \$121,000. The revenue of this company amounts to \$2,000,000 a week of business. The C.P.R. is the largest of the United States railway companies and the largest of the Dominion Railway companies.

Argentina during the past 12 months has as a whole enjoyed exceptionally flourishing conditions, as nearly all the commercial and industrial relations.

Grand Trunk Railway System's trade earnings from April 1st to 14th: 1907, \$229,001; 1908, \$765,879; increase, \$536,878.

The directors of the Dominion Steel Co. are continuing their campaign against the Dominion Coal Company.

The total production of coal in Great Britain in 1906 amounted to 265,204,719 tons, against 249,782,254 tons in 1905. The number of mine employees increased from 329,373 to 362,245.

The world now produces 6,500,000 tons of beet sugar yearly, and the total production of this article is estimated to have fallen to 225,000 tons. A hundred years ago the West Indies supplied sugar to half the world.

The Grand Trunk Railway management will install the electric system on their line between Toronto and Niagara Falls. The distance is about 84 miles, and the plant will cost about \$175,000.

The new office building which the Manufacturers Life Insurance Co. proposes to erect at the corner of Bay and Maltona streets, Toronto, will cost at least \$500,000. It is to be a fourteen-story structure and is to be entirely fireproof in so far as modern architectural science can make it.

Mill has come to be one of the great cotton-textile markets of the world. During 1906 Millan sent to the United States cotton yarn worth \$45,000,000 and cotton waste worth nearly \$120,000,000. To the Philippine Islands it sent \$100,000,000 worth of textiles. The records show that whereas the cotton fabric trade with the United States in 1905 was \$45,000,000 they were less than \$5,000,000 in 1905, nothing in 1904, and 1903, and one sale was recorded of about \$15,000 in 1902. The Philippine trade in this line did not exist until 1905.

TO STAY IN TOMBS.

This is Likely to Be the Fate of Thaw.

New York, April 19.—No attempt has yet been made to secure the release of Harry Thaw on bail, and none is likely to be for some time. That Thaw and the members of his family are resigned to the fact that Thaw must spend another summer in the Tombs is, apparently, indicated by the departure from the city of New York of the members of the family. Mrs. Evelyn Thaw visits the prisoner daily and declares that she will continue to do so as long as he is in jail.

THE BARRIEFIELD CAMP.

Army Service Corps Making Preparations.

Present indications point to a monster camp here this year. The camping ground will be the same as other years, and, at present, arrangements are in charge of the Army Service Corps. The regiments to go into camp here are not all known as yet but it is certain that the number of troops that will receive instruction will be greater than in some years.

Queen's Gym. Closes on 24th.

Queen's University gymnasium will close on April 24th, for the summer months. It is expected that Pevsner, Director Palmer, and "Alfie" Pierce will be engaged on the track at the athletic grounds during the summer months.

CITY BASEBALL LEAGUE.

Matters Are Now Progressing Favorably.

Matters are now progressing quite favorably with the City Baseball League. Six teams will be entered in the junior series, and already three teams have signed their intention of joining the senior series and the same number has also been secured for the intermediate series. The time for the entering of teams in the junior series has been closed, but at a meeting held last night, it was decided to extend the time for the other two series, as it is desirable to have more teams enter.

The schedule will be drawn up at a meeting to be held on Thursday evening next.

PROF. W. G. MILLER

TO RECEIVE LL. D. DEGREE FROM QUEEN'S.

He is a Man of Whom Ontario is Proud—Was Formerly Professor in Queen's School of Mining.

Only one honorary degree will be conferred at Queen's University on occasion, next Wednesday, and that will be upon Prof. W. G. Miller, geologist of the Ontario government, who will receive the LL.D. degree.

Six feet three in height, sturdy in frame, blue-eyed, dark-haired, somewhat slow of speech because he thinks while he speaks and does not talk for the sake of hearing his own voice, Prof. Miller, the provincial geologist, is an excellent specimen of the best type of Canadian manhood. His work and his present reports in which he presented his views are known in many lands among those interested in mining and geology; the man himself is personally known to hundreds in this and other countries.

A native of Norfolk county, in Ontario, and another of the greater part of his life's residence at Kingston, at the University of Toronto in 1890, with first-class honors in the natural science department, has been spent in public service. A fellow in mineralogy at the university, a field assistant with the Dominion geological service, a lecturer and later professor in geology in the School of Mining at Kingston, in those various capacities he did excellent work, growing in knowledge, practical and theoretical, and gaining a reputation among scientists in his own country and abroad.

Time at this period to take post-graduate courses at the Universities of Chicago, Harvard, and Heidelberg, Germany. In the summer of 1897 he began special work for the provincial bureau of mines, and in 1902 resigned his post at the School of Mining to become provincial geologist.

Prof. Miller has had the experience of developing to speciality by his work and discoveries, two unique mineral fields, namely, the corundum deposits in Eastern Ontario, beginning with 1897, and the new world-famous cobalt silver field, from 1903 to the present time. Until he went to the present time, he has been a geologist, and examined the latter no one had any conception of the importance of the daily discoveries; in fact, they thought the "finds" were copper and other minerals. Many factoring offers have been made to Prof. Miller to leave the public service to join with men controlling millions of non-ferrous mining enterprises. His special knowledge, if not such an eventful one, would in his hands be not only prove of immense financial benefit to those with whom he threw in his lot in a business capacity, but also to the province of Ontario, which he has, although in his present position he cannot have interests in any mines.

His choice is deliberate; he has devoted himself to public service and to science, and seems determined that his devotion shall not be broken. The people of Ontario ought to be proud to have such men as Prof. Miller serving them. The professor is a life member of the American Institute of Mining Engineers, a fellow of the Geological Society of America, and one of the council of the Canadian Mining Institute.
