LEY SHAW MILLING O., LIMITED nes, Thorold, Kif ton

Early Dividends for Stockholders-Machinery now being instal led for rapid development of underground workings of famous Lead and Zinc property-Stockholders enthused over new strike of rich ore- Steam Drills and Hoist operated by great power plant will bring riches from earth-On behalf of the public. The Kansas City Post investigates the mine and prints magnificent endorsement of this mighty co-operative enterprise-Big advance in price of stock coming.

Powerful Machinery Installed.

The directors of the Sunburst Mining Company authorize the announcement that the machinery for the underground workings made was February 1st. is now being installed. This consists of the latest type of powerful steam boiler, steam hoists and steam drills. The contract for the hoister house for Shaft No. 3 has been let and this will be to the work. Drifting is being rushed to connect Shafts No. Press tons of rich ore are being piled up on the dump, spelling McCarthy, president, and R. W. Bailey, Secretary and treasurer. sure dividends.

A number of other Omaha citizens are interested." This immensely rich property lies four miles from Baxter Spring, Kas., and is just across the State line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill On every side we are surrounded by ies that run into and through our section, and, from the reports of experts and engineers, are actually richer and nearer the surface than at any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of Thousands of dollars were expended

Installing Machinery, Shaft No. 3.

drilling and shaft sinking have demonstrated a uniform bed of ore over the en- I tire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the sure of any timbers whatever, pillars of ore being allowed to support the roof, which is | d and extremely rich ore extracted, making great returns for the owners.

DIVIDENDS; OF 120 PER CENT. ARE PAID.

The Baxter Mining Company, operating in the same district and with the same officers as the Sunburst Company, has declared dividends of 10 per cent per month; the first payment Read the following from the Omaha Bee of February 3, 1907:

DIVIDENDS ON BAXTER MINING STUCK. "A 10 per cent Monthly Dividend has been declared and paid erected immediately. The steam drills will give immense impetus to the fortunate owners of Baxter Mining Company stock. This 2 dividend, we are informed, will be regularly paid on the first of and 3, and in this work a great body of rich ore has been struck each month. Owners of this stock are to be congratulated. The that has created wide excitement in the camp. As this goes to property of this company lies in the new wonderful lead and zinc district known as the Baxter Spring Camp. The officers are E. T.

THE SAME ORE BODY THAT MAKES OTHERS RICH.

No other district can produce so as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known proper ties. To the west are the Sunnysid (the oldest mill in camp), White Eagle, Indiana, Avers and Sloan. To the south the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore were taken out by the Hobo. This mine is 135 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sun-

burst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo. and is into the same ore bed. To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proved to be so heavy. On these properties mills are erect-

READ THIS LETTER

Omaha, Neb., March 25th, 1907, Mr. W. A. Fisher, Kansas City, Mo. Dear Mr. Fisher: I have just returned from a two days' visit to the Baxter camp, and while down there took in nearly all of the properties of the camp, and I want to say to you that I never saw such ore taken out of the ground as they are taking out of the Sunburst mine. The stockholders of this Company are certainly to be congratulated for getting in before this stock goes to a higher price, 'which 576,571.00 ... eed have no hesitancy in making your 198,579.00 statements strong relative to the possiblities of the Sunburst mines. 6,062,494.00 I saw ore taken out of the ground 223,799.00 there last Saturday that, in my judg-234,490.00 ment, will run 50 per cent zinc; not 1,573,593.00 one piece, but a great many large 193,613.00 blocks that I could hardly lift. 456,006.00 I note what you wrote me relative 120,319.00 to stock roing so rapidly, and it is 120,324.00 only an indication of how quirkly the 1.261.551.00 onblic appreciates a good thing when ,025,650.00 it has an opportunity.

82,887.00 With best wishes, I am. Yours very truly.
R. W. BAILEY

Why Stock is Sold at 10 Cents. a Share.

Gramby Mining and Smelting Co., 1906.

This issue of fully paid, no nassessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery and continue development work and put day and night shifts to work-in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends, and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard, on the contrary, of the fortunes taken out right in this district, by practically all mining plants, in the last few years? Have you ever had opportunity to get in on the ground floor of such an investment? At this price the immense profits depend on this: Are the facts such as we have stated? Now, this we prove in detail-we will even arrange to take you to the mine-we refer you to any of the reports on this property-to banks-to engineers-to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sumburst stock will not remain long at the pres-

Every step forward in the workings of the Company is attracting wide attention and is justifying the most liberal expectations. As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent of the full price of the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificates will be sent you for the desired number of shares, fully paid and nonassessable, no matter how much the price of stock may have advanced during You will thus become a stockholder in this company on equal terms with

all the other stockholders, and by payments so small as to be hardly noticed. The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, \$50.00 now and remitting only \$5.00 you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole \$50.00 worth, although your first payment is but \$5.00. . You really invest \$5.00 and get all the benefits of an investment of \$50.00.

In order to secure the benefit of this offer, it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to draw it if further investigation fails to convince you of the

tificate for the amount paid for. Stock now 10 cents per share; par value \$1.00.

Map of District Showing Sunburst Mine.

Stock Advances to 15 Cents May 22nd.

Buy now at 10 Cents a Share, par value \$1.00 and reap the profit of this 50 per cent advance-\$50.00 profit on every \$100.00 -Only a limited number of shares offered. If you are not satisfied with your investment within 30 days of your first payment every cent will be refunded you.

BUY ON EASY PAYMENT PLAN.

A rise in the price of these share to par means 1,000 per cent for every \$1.00 invested, besides the dividends Subscriptions will be accepted for 200 shares and upward, either cash infull, with reservation, or by 10 per cent down and 10 per cent quonthly for The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will

immediately on disposal of this blockof stock, you can reap the immediate profit. Your whole reservation will receive the benefit of every advance in price, even while you are paying for it. Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish the payments, you will receive, upon request, cer-
