The Spring is Here

bringing with it to thousands "that
spring feeling"—lack of snap—uncer-
tain digestion—occasional headaches.
It is simply that the organs are stuffed up and
poisoned with the winter's overeating and living much
indoors without sufficient exercise.
Abbey's Salt goes straight to the root of the
trouble by putting the Bowels, Stomach and Liver in
good working condition.

That means pure
blood, buoyant
health and plenty
of energy.

Lace Waist Made After a Smart
Imported Model—Gown With
Spangled Paillette of Silver—
One of the New Shades.
New York, April 20.—Better one
good suit and several stunning waists
than many costumes and fewer, less
impressive "tops," especially if those
latter are not of the transferable sort.
When in doubt what to wear it is
safe to select a lace waist made after
a smart imported model. Not one of
the cheap, elaborate sort that too
many women buy, for a lace waist of
this grade is one of the most happily
common looking garments in existence
and should be tabooed by any woman
with claims to good taste. The only
desirable waist in the lace class that
can be had ready made at a low fig-
ure is built of net, either plain Brus-
sels, point de Paris or the square
meshed "filet" net that just now holds
the lead in fashionable favor. These
waists can be had in excellent mod-
els at very moderate prices, and can
easily be made distinctive by the addi-
tion of trimmings of velvet ribbon,
bits of embroidery or, perhaps, some
sort of a "harness," that matches
the skirt worn.

In these times when all the fashion-
able shops make most extensive show-
ing of models from the ateliers of
world famous artists in dress creation
the who will can give suggestions that
will enable her to transform simple
"ready-mades" of plain materials into
"tops" that may be worn with dis-
tinction in any company.
The French are adept in making
smart use of the simplest means. It is
only the few who can hope to rival
them in this faculty to create elegance
by the combination of ordinary ma-
terials, but there are any number of
amateurs who are successful in making
it is no harder to copy from really
artistic sartorial creations than from
ordinary productions from less auth-
oritative sources. The basis of all
extra waists is a simple, good-fitting
blouse, and the woman who has time
and is willing to take the trouble to
follow the directions that come with
any one of the many patterns that can
be had for a few pennies, and can't
turn out a good plain blouse is the
exception.

Given this, the rest is only a mat-
ter of decoration. Every family or
individual who is in any way inter-
ested in clothes, should possess a
"Jaane" case of fabric samples. These
forms that can be had at from fifty
cents up, and on which the waist can
be slipped and adjustments made at a
great saving of time and expended
language.

Coral jewelry and coral embroidery.
A gown of primrose yellow is trimmed
with bands of silver gowned with
seal coral. Coral is also mingled
with white and with "with
topaz and turquoise. Pendant ear-
rings are crocheted in slowly, but sur-
ely. They are not like the old-time ear
drop which fell from a gold wire,
which pierced the ear. The new pen-
dant ear ornaments all have a stud
fastened close to the ear, and from
this the pendant falls. A mixture of
gems is fashionable—an ear stud of
pearls or turquoise or sapphires with
a pendant of diamonds, for instance.
Most of the pendants are formed of
several stones, but a few single pear-
shaped gems are seen.

Very dainty pendants are of em-
erald, with deep full flounces of wash-
ing tannour net, lavishly embroidered
in colored linen.
Shades of rose, wine and purple are
among the "best" colors being worn.
A white net evening gown is spang-
led paillette in silver, and embroidered
in trails of raised valenciennes
flowers of shalwar pink and nacre se-
mites, touched with bronze, and made
over a white silk foundation, veiled
in softest plush rose. The corsage,
which was cut very low, was almost
entirely of the embroidery, and was
finished with an Empire sash of knot-
ted ruche satin. The blending of
color is perfection.
Necklets and bracelets of coral are
affected by decided bracelets or
blouses. The smartest necktie is made
of a series of coral carvings strung
together with gold links. The "me-
dallions" represent roses or leaves
and are delicately and beautifully
wrought.
A China blue rajah has a beautiful-
ly cut, but perfectly plain skirt. The
bodice has a square plastron of blue
silk crocheted lace engraving a chemi-
sette of cream guipure lace. A won-
derful factor—a fantasy of cream and
blue coque plumes, forms the chief
ornament of the cream chiffon hat that
accompanies this costume.
A chiffon evening gown is of the
new shade, known as Terre d'Egypte,
made over white, the folded flower and
the centre panel painted in flowers of
Wedgewood blue and Romney pink,
and outlined on each side by a panel
of fine lace, a high sash of cream re-
producing the flowers in more vivid
tones, the very fussy lace and net
sleeves tied with gold tissue.

Another evening gown has of white
crepe de chine, with a deep insertion
of painted chiffon, the pink and yellow
rows lightly touched with silver,
giving the misty effect of moonlight
seen, the chiffon draperies of the de-
colletage drawn through two large

THE GUILLOTINE

FRENCH POET'S QUEER EX-CUSE FOR BLOCK.

Its Use Proves That France Has
Not Yet Become a Weak and
Decadent Nation—General Gal-
liffet's Reply.

In a newspaper symposium of the
best known French authors on the
question of whether or not the death
penalty, recently practically abolished
in France, ought or ought not to be
restored, some interesting and original
replies have been evolved.
Almost all the literary men who at-
tempt to answer the question declare
against the guillotine. They cite as a
principal reason the frequency of mis-
carriages of justice, and take the view
that it is better that many misde-
ants go unexecuted than that one in-
nocent person should suffer death.
Taking the contrary view of the
subject, Mistrail, the Provencal poet,
who holds an enviable reputation and
esteem, makes an astonishing reply in
verse. He holds in his stanzas that a
strong person always will require
strong-handed justice. The law, he
states, is in the mind of the people,
and he that is in the mind of the
people should be executed. He is
delicate scruples on the subject of
beheading, and become so squeamish
and molly-coddled that the law, he
says, is in the mind of the people,
and he that is in the mind of the
people should be executed. He is
delicate scruples on the subject of
beheading, and become so squeamish
and molly-coddled that the law, he
says, is in the mind of the people,
and he that is in the mind of the
people should be executed.

Gen. Galliffet replies, humorously:
"Whether it comes to me from God or
from man, death will be no penalty
to me."
Brother Doukhobor.
If any sect in the west is about due
for trouble, Brother Doukhobor is its
representative. Unlike Brother Mor-
mon, he will not obey the law, but
has lost his momentary because he will
not perform his settlement duties. So
he and Canada are even on that score.
But that is not the only indictment
against Brother Doukhobor. He has
been charged with the murder of a
Canadian settler. The Doukhobors
are permitted to cut
from government timber limits all the
wood they require for their own use.
But they must not go into the forest
wood business and cut wood for sale.
It is the fashion in the west to be
law-abiding, and Canadians, Galicians,
Russians and everybody but Brother
Doukhobor has cut no more than en-
ough wood for himself. When com-
plained against, the Doukhobors
these offenders, these childlike and
peaceful gentry chased them away with
pickforks and rescued the prisoners.
However, the mounted police, too, a
hand in and a few of the offenders are
in jail.

PROPERTY OF SERBIAN KING.

Natalie Inherits Rumanian Estate.

Belgrade, April 20.—Ex-Queen Na-
talie, mother of the late king of Ser-
bia, has inherited a fortune of \$100,000
by a decision of the Bucharest courts,
which has given her the possession of
the Obrenovitch estates in Rumania.
By this decree Dr. Petronovitch, the
late king's secretary, is reimbursed
and entitled to claim compensation for
his wrongful imprisonment. It will be
remembered that he was accused by the
revolutionary cabinet of having illegal-
ly disposed of part of the revenues of
these estates in favor of the king, and
was condemned to two years' impris-
onment.
The Rumanian courts have now af-
firmed that the lands in question were
the personal property of the king, and
that the king was perfectly justified in
directing his secretary to employ the
revenues for his majesty's private use.

Don't Be A Rheumatic.

The distressed condition of the
system which leads to rheumatism, easi-
ly becomes a chronic condition. Rhen-
umatism does not cure itself and if not
cured causes injury to the joints and
internal organs that will remain even
though the disease be cured. The time
to treat any case of rheumatism is
now. The remedy to use is Dr. Hall's
Rheumatic Cure. This remedy thor-
oughly expels the disease from the sys-
tem. Don't wait a day in beginning
its use. It has cured the worst possi-
ble cases and will cure you. Scores of
people of this locality recommend it.
Ten days' treatment. Price 60c. at

Business Show A Success.

The Sixth National business show
in Chicago recently drew 15,000 per-
sons the first night. Two hundred ex-
hibitors were present. The exhibits
include all sorts of time and labor-
saving devices that did everything but
think and that are made and sold for
the purpose of making office work eas-
ier and the acquiring of money and
business more simple. Systems and
machines that were marvelous in the
extreme were seen at every step and
turn.

Anticipating Trouble.

On lower Broadway, just below the
post office, a vacant store was recently
altered and redecorated for a new ten-
ant, and a freshly painted sign an-
nounced, not a glorious opening, but
the advent of somebody with the best
line of something, but a closing out
sale. Closing out before starting?
Evidently the author of "To arrive
you must start" reckoned without his
host.

No more Alcohol

INTENSIFIED FRUIT JUICES

AN IMPROVEMENT ON NATURE

A Discovery that is Revolutionizing Medicine.
Remarkable Success Attends the Finding of a New
Medicinal Compound by Combining the Juices
of Apples, Oranges, Figs and Prunes.

Fruit helps to keep one healthy.
Fruit, in itself, will not cure disease.
The medicinal principle—or that part
of fruit which has a curative effect—
is in such infinitesimal quantities,
that it is unable to overcome a diseas-
ed condition of the stomach, liver,
bowels, kidneys or skin.
Just here is where science stepped in.
An Ottawa physician did what nature
could not do. He first found that some
fruits were stronger medicinally than
others—and that apples, oranges, figs
and prunes contained all the healing
properties of other fruits. There are
two principles in fruit-juices—bitter
and sweet. After extracting the juices
of the four fruits mentioned, this phy-
sician succeeded in replacing one atom
of the sweet principle by one of the
bitter. This resulted in an entirely
new combination being formed. This
new compound was many times more

active medicinally than the fruit juices.
Where eating fruit only helped to keep
one well, this compound actually cured
disease.
To make it more valuable still, this
physician added the finest tonics and
antiseptics, and then, by evaporating
the entire compound to a powder, made
it into tablets.
This, in short, is the method of mak-
ing "Fruit-a-tives"—these wonderful
tablets—the most reliable cure for
Constipation, Biliousness, Stomach
Troubles, Kidney and Bladder Disease
and Skin Affections. Being made from
fruit, "Fruit-a-tives" may be taken
by women and children without fear of
ill-effect.
Don't take a substitute. If your
druggist does not handle them, send
50c for a box to Fruit-a-tives Limited,
