MOONEY'S PERFECTION CREAM SODAS

When "sweets" lose their sweetness—and "substantials"—their charm—there are always MOONEY'S PERFECTION CREAM SODAS to coax back the appetite.

Do YOU know how good they are?

NERVOUS and WEAK COULD NOT SLEEP AT NIGHT

To the thousands of people all over this land who are tossing on sloping pillows night after night, or who pass the bedroom floor with nerves unquiet, and to whose eyes sleep will not come,

MILBURN'S HEART AND NERVE PILLS offer the blessing of sound, refreshing slumber.

They restore the equilibrium of the de-
ranged nerve centers, and bring back the
shattered nervous system to perfect con-
dition.

Of course it is more than sport to us,
for a bad shot means three or four
pairs of skin boots swimming away
and a loss of dog food, fresh meat
and blubber which we sell for fat. Here
in this stage life half a dozen huge
carcasses weighing from three to four
hundred pounds each. One in every
three is a man who can pull out on an
ice edge, and this all in vain till help
was forthcoming.

Old Seals Frozen.

"A stranger, peeping into one of these
stages, would be sorely surprised to
see the floor covered with old seals
lying side by side, apparently alive.
Really, however, they are frozen and
will have to be brought into the
house by the fire for several hours be-
fore they are fit to eat. After that the
skins will be well scraped from fat and
stretched out in a frame on the house
top to dry, out of the reach of dogs.

Earlier on these will be steeped in
boiling bark from the fir trees in the
large cauldrons in which we bark our
nets. They will then be made into one
class of skin boot. In spring, how-
ever, when the ice is set, the boots
made of green skin, for these will
keep out the water much better.

When the snow is cold and dry the
tan boots are better, being softer, for,
by allowing frost to cover the toes,
they are much warmer, nor will they
freeze, being quite dry."

RATIONAL SUNDAY LEAGUE.

Organization to Oppose the 'Lard's Day Alliance.

With a view to countering what was
termed the "Lard's Day Alliance" and
restrictive efforts of the Lord's Day
Alliance there was organized in Tor-
onto recently the Canadian Rational
Sunday League, which aims to be an
extension of the National Sunday League.
The following committee were appointed
to formulate the definite plan of organ-
ization: Dr. Goldwin Smith, Messrs. H.
Dwight, James Hughes, Major W. H.
Archard, G. A. Graham, L. Robertson,
W. C. Fox, W. J. Moody, J. S.
Granstein, D. W. Livingstone,
D. G. Loran, E. Meek and J. Knoch
Thompson.

A resolution which was passed fully
outlined the result of the discussion
among those present. It reads:
"That it is desirable to organize an
association similar to the London Na-
tional Sunday League for promoting
healthy and innocent recreation on
Sundays, and to oppose tyrannical
and restrictive legislation regarding
Sunday, and it is felt that recent
legislation on this subject has been
carried too far, interfering with in-
dividual liberty to an extent unknown
in any other country under the British
flag. That this association be called
Rational Sunday League, and that its
declared objects be: To promote
rational Sunday recreation, to
secure the opening of picture galleries,
museums and reading rooms on
Sundays, to provide music on Sunday
afternoons in the parks or other con-
venient places, to obtain legislation al-
lowing charges to be made for popular
Sunday lectures or concerts, and to
oppose restrictive legislation regard-
ing Sunday observance."

In the Wild East.

The courtesies of journalism in
Nova Scotia are prominent. Thus we
find The New Glasgow Chronicle re-
ferring to The Pictou Standard in
these endearing terms: "A friend, who
is not careful as to what he reads,
tells us that The Standard's zoological
specimen of the muskellunge carnivores
of the genus Vepithis and allied gen-
era, the variety known as Mephitis
Americano or common skunk, is again
on the rampage. This is the time of
year they generally make their ap-
pearance from the hiding places under
old barns, and should be chased back
with a shotgun if necessary; they are
a menace to the public health."

A Better Sign.

Them let the circus lift its head,
The bluebird have its fun;
I'll watch the maple tree instead
When sap begins to run.

The Verucular.

Accum—Does he own an automo-
bile?
Tallum—No, but he can talk it.

SHORE SEAL HUNT

EXCITING SCENES IN NEW-
FOUNDLAND.

The Hunt is Carried on in Two
Sports—"Swatching" is Keen
Way in the Moving Ice.

Just at this season on the New-
foundland coast the seal fishery is
in progress. The seal are floating
south on the huge ice floes from the
north and they are hunted for their
skins, blubber and flesh. The hunt is
carried on in two ways. From sealing
steamers which carry several scores
of men and which count by the hun-
dreds by thousands and from the shore
by the inhabitants of the coast who
are content with much smaller tak-
ings. It is the latter hunt which is
described by a writer in The London
Standard.

"Old Harp Sobs Up.

"The sealers, or two-year-old
seals, have already passed by, and
now through the ice the occasional
head of an old harp will bob up,
and after blinking his eyes clear of
the ice and water, standing on his
tail, will blantly survey the horizon.
"I clear the seal will then roll
over on his back, raising the ice wa-
ter into the air over his chest, as if
he found it almost impossible to get
cool enough. Some of the men are out
now on the ice, waiting for the harp
den behind game of ice, they are
waiting for a shot at protruding
heads. Seals are now fat enough to
float, so that there is a reasonable
chance of getting them if one shoots
straight.

Swatching Process.

"This process is called 'swatching.'
It is really keen sport for the danger
of the moving ice and the chance of
getting ashore again on a headland
further south, in which direction the
ice is running, lends the element of
risk which prevents any sport from
being too easy.

"Of course it is more than sport to
us, for a bad shot means three or
four pairs of skin boots swimming
away and a loss of dog food, fresh
meat and blubber which we sell for
fat. Here in this stage life half a dozen
huge carcasses weighing from three to
four hundred pounds each. One in
every three is a man who can pull out
on an ice edge, and this all in vain till
help was forthcoming.

Old Seals Frozen.

"A stranger, peeping into one of these
stages, would be sorely surprised to
see the floor covered with old seals
lying side by side, apparently alive.
Really, however, they are frozen and
will have to be brought into the
house by the fire for several hours be-
fore they are fit to eat. After that the
skins will be well scraped from fat and
stretched out in a frame on the house
top to dry, out of the reach of dogs.

Earlier on these will be steeped in
boiling bark from the fir trees in the
large cauldrons in which we bark our
nets. They will then be made into one
class of skin boot. In spring, how-
ever, when the ice is set, the boots
made of green skin, for these will
keep out the water much better.

When the snow is cold and dry the
tan boots are better, being softer, for,
by allowing frost to cover the toes,
they are much warmer, nor will they
freeze, being quite dry."

WINNIPEG'S BOULEVARDS.

Big Street Improvements Made in
Prairie City During Year.

Winnipeg is proud of its parks and
boulevards, of which there are a great
many. All the urban parks are now
practically beyond the stage of pri-
mary improvements and expenditures
on these in future will be chiefly for
maintenance. In Assiniboine Park
temporary shelters have been built
for the animals, which include nine
buffaloes, two moose, two jumping
deer, one elk, three bears and three
coyotes.

The boulevards maintained during
the past year have a total frontage
of over 60 miles. The average rate of
maintenance is less than five cents
per front foot, which is fully 50 per
cent below the average rate of last
year.

Cost of Construction.

This year boulevards were construct-
ed on 24 streets, having an aggregate
frontage of over twelve miles. The
average cost of this work per front
foot was slightly over 32 cents, which
is considerably higher than last year.
This is accounted for in the fact that
the boulevards laid down this year
are of a greater width than those put
down last year. The average cost, per
yard, was less than 15 cents, or nearly
four cents less than the average cost
of last year. Of the 12 miles laid
down about two and a half were
sodded, while the balance was
sodded. Experience gained in the
past shows that the sodding pro-
duces a boulevard superior in every way
to the boulevard that is sodded, while
there is very little difference in the
cost. And while it might be advised
to sodding them, yet each year sod is
becoming more difficult to obtain and
the quality inferior, so that it is only
a natural consequence and a question
of time when all boulevards, for the
most part, will be sodded.

Miles of Trees.

The properties benefited by tree
planting extended over seven streets,
with a total frontage of about three
miles. The average cost of the work
was less than one and three-fifths
cents per foot frontage. Great care
is exercised in the planting and han-
dling of the trees, and the cost of re-
placing was much lower than in any
other previous year. Following the
custom established some years ago
flowers from the parks were sent from
time to time to the hospitals and the
various other charitable institu-
tions throughout the city.

POLITICS IN ALBERTA.

Candidates Lining Up Already For
the Next Election.

Alberta's voting force in the next
Parliament of Canada will total sev-
en, and already candidates are lin-
ing up in the various constituencies.

A new constituency, taking in a
great expanse of territory, is Victoria,
and rumor tells us that Duncan Mar-
shall, manager of The Edmonton Bul-
letin, and the prince of stump orators
in Sunny Alberta, will be the Liberal
nominee. Marshall, who is known to
most people in Ontario, "caught on"
very quickly in the West, and an an-
nouncement that he is going to talk,
fills a building.

Dr. McIntyre, the present member
for Strathcona, will surely be a can-
didate again. J. R. Lavell, ex-P.M.
for one of the Lanarks, is now prac-
ticing law in the city of Strathcona,
and he is mentioned as the man who
will carry the Borden banner.

The Scramble For Nominations.

In Red Deer there is already a
scramble for the Liberal nomination.
J. T. Moore, M. P. P., once a Tor-
onto alderman, and the man after
with Moore Park, a Toronto suburb,
is mentioned as a strong following.
"John T." as he is best known here,
is an orator. Words fall from his lips
as freely as water passes over the
falls at Niagara and he is ambitious.
Another Red Deer man, George V.
Smith, a native of Nova Scotia, is
eager to wave the Liberal flag.

The Tories of the Red Deer riding
are led by A. G. Gillmer, of Lacombe,
son of a former Commons' representa-
tive for one of the Middlesexes.
Cornelius Hiebert, one of the two
Tories sitting in the Alberta Legis-
lature, also has his eyes on the Ot-
tawa seat.

Chosen by Patriarch.

By the way, it is said that Robert-
son, the Tory leader in the Alberta
Legislature, was chosen by the patri-
arch of the House, J. P. Macdowell,
of Fincher Creek, Robertson and Hie-
bert, who constitute the party, led
the choice to Marcellus, a red-hot Lib-
eral, who claims to be a descendant
of the Romans.

Calgary is now represented at Ot-
tawa by Maitland S. McCarthy, a re-
lative of the late D'Alton McCarthy.
He was elected an M. P. after less
than two years' residence in the
West.

He is generally admitted to be the
strongest man in the party in Alberta,
and is mentioned as leader of the
forces in the next provincial elec-
tion. That he will again contest Cal-
gary is certain, and that he will be
opposed by Dr. Stewart, who was the
Liberal candidate in 1904, is also ad-
mitted.

Frank Oliver is a strong force in
Alberta, and this province is pretty
certain to give him at least five out
of seven seats.

Canadians' Adventures.

Two wealthy Northwest Canadians
who went to England in December
holidays, were robbed at London in
January of £215. By pawing clothes
they secured the stolen bills, and
walked to Cardiff, where they expect-
ed money from Canada. It did not
arrive, so they got work on a tramp
steamer for a voyage to the Mediter-
ranean. On their return, destitute,
they were kept several weeks by a
man in humble circumstances until
the arrival of long-delayed funds, and
have just sailed for Canada.

Reporting Progress.

"Anything going on in society now,
Mrs. Leader?"
"Nothing but time—and that's go-
ing most awfully slow."

SANTAL-MIDY

Standard remedy for Gonorrhea,
Gonorrhoea, and other diseases of
the urinary tract. Cures in
48 hours. Does not
injure and does not
return.

Apollinaris

"The Queen of Table Waters"

SUNSHINE FURNACE

The Sunshine is differently and better
constructed than common furnaces. It's
stronger, safer, more healthful.

The dome, the two sections of the fire-
pot and the frame of the ash-pit are all
securely fastened together by our famous "cup
joint." Three "cup joints" in all, you see.

All sections, you will notice, fit together
perfectly, and are lined with a layer of asbes-
tos cement, which unites them so firmly together that they
become, in every purpose, one solid piece of metal. Can
never spring or fall apart.

And that's not all! The top of
the dome is fastened to the sides with
cement and boiler rivets, making the Sunshine just
as smoke, gas, heat and dust tight as a steam boiler.
From a hygienic standpoint it takes pre-
cedence in the furnace world.

Notice, too, the Sunshine is equipped with an auto-
matic gas damper. This damper automatically opens
when the gas in the furnace reaches a certain pressure
and allows it to escape up the chimney. Eliminates all
danger of an explosion or gas escaping through
the registers.

Safest as well as most healthful, easiest man-
aged, cleanest, greatest labor-saving and fuel-
economizing furnace you can buy.

If your local dealer does not handle the Sunshine
write direct to us for free booklet.

RIGHT THIS WAY EVERYBODY FOR THE BEST SHOES

Unhappy feet come into this store all the day long.
Some had their shoes fitted carelessly—some were fitted without sense.
A busy man ought surely not to be thinking of his feet.
But how is he going to help it while that little toe is yelling "Murder!"
You see the necessity of being fitted by

A Shoe Man Who Really Knows How

Of course you know that there is a great difference in material and the
way shoes are put together.
Feet that are not absolutely tough should not be expected to feel com-
fortable in shoes that were not made for sensitive feet.
You can get what you need and want here—Shoes that will give com-
plete ease, and made in the correct style.

TRY US FOR YOUR NEXT PAIR.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion
Land, except sections 8 and 20, not
reserved to the local Agent by any
person the sole land of a family, may be
settled over 18 years of age to the extent of
one-quarter section, of 160 acres, more
or less.

Application for homestead entry or the
petition must be made in person, or by
applicant at the office of the local Agent
or Registrar.

An application for entry or inspection
must be made personally at any time-agent's office
may be made to the local Agent by the
settler, at the expense of the applica-
tion, and the local Agent will issue a
vouch on receipt of the settlement and
application is to have priority and the
cost will be held against the necessary
papers to complete the transaction are
issued by mail.

In case of "prevention" the entry will
be summarily cancelled and the appli-
cant will forfeit all priority claim.
An applicant for inspection must be
eligible for homestead entry, and only
one application for inspection will be
received from an individual until that
individual has been examined and found
eligible for homestead entry. A homesteader
whose entry is in good standing and not liable to cancellation,
retains it in favour of father, mother,
son, daughter, or other person, if
eligible, but to no one else, on filing of
declaration of abandonment.

Where an entry is summarily cancelled
or voluntarily abandoned, subsequent
to the date of cancellation, the
applicant for inspection will be
admitted to priority right of entry.
Applicants for inspection must state in
particulars the homesteader is in
possession of the land, and the state-
ment is found to be incorrect in mat-
ter particulars, the applicant will lose
all priority right of entry, and should
land become vacant, or if entry has been
granted it may be summarily cancelled.
Duties—A settler is required to per-
form the conditions under one of the
following plans:

(1) At least six months' residence upon
a cultivation of the land in each
year during the term of three years.
(2) If the father (or mother, if the
father is deceased) is a settler, the
residence upon a farm in the vicinity of the
land entered for such homesteader
the requirement as to residence may be
satisfied by such person residing with
the father or mother.
(3) If the settler has his permanent
residence upon farming land owned by
him in the vicinity of his homestead,
the requirement may be satisfied by
residence upon such land.
Before making application for notice
the settler must give six months' notice
in writing to the Commissioner of Dom-
inion Lands at Ottawa, of his intention
to do so.

SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS

Coal—Coal Lands may be purchased at
20¢ per acre for soft coal and 30¢ for
anthracite. Not more than 300 acres
can be acquired by one individual or
company. Royalty on the net of 10
cents per ton of 2,000 pounds shall be
collected on the gross output.
Ore—A person eligible in years of age,
or over, having discovered mineral in
place may locate a claim, 1,500x1,500
feet.
The fee for recording a claim is \$1.
At least \$100 must be expended on the
claim each year or paid to the mining
recorder in lieu thereof. When \$500 has
been expended or paid, the locator may
upon having a survey made, and upon
completing with other requirements, pur-
chase the land at \$1 per acre.
The patent provides for the payment of
royalty of 24 per cent on the sales.
Fluorine mining claims generally are 100
feet square entry 90, renewable
early.
An applicant may obtain two leases to
drill for gold of five miles each for a
term of twenty years, renewable at the
discretion of the Minister of the Interior.
The leases shall have a dredge in operation
within one season from the date of
the lease for each five miles, and 10
per cent annually for each mile of river
however when the net of 10 per cent
collected on the output after it be-
comes \$10,000.

W. W. CORRY,
Deputy of the Minister of the Interior,
N.B.—Unauthorized publication of this
advertisement will not be paid for.
