

PE-RU-NA DR. HARTMAN'S FAMOUS PRESCRIPTION THE TALK OF THE CONTINENT.

READ AND BE CONVINCED.

Just A Few Of the Sincere Letters Written To Dr. Hartman By Honest People.

MRS. ANTHONY RAUCH 458 Johnston St. Bucyrus, O.

MISS LORETTA WALL 350 N. Dale St. St. Paul, Minn.

MRS. M. S. DAVIS Nashville, Tenn.

MRS. JESSIE SMITH 408 Buttes Ave. Columbus, Ohio.

Keeps Pe-ru-na in the House.

Owes Good Health to Pe-ru-na.

Miss L. Wall, 850 N. Dale street, St. Paul, Minn., writes: "Last spring I had a very severe case of catarrh of the stomach and bowels. I was very much run down in strength and lost my appetite. I took three bottles of Peruna and found myself gaining very quickly in every way. I also had catarrh in my head, which has been entirely cured. I thank Peruna for the health I am enjoying."

The World's Greatest Medicine

The rapid growth of the Peruna Medicine Company is so phenomenal in the business world as the universal popularity of their famous remedy, Peruna. The plant covers a number of acres, and employs several hundred people. No other medicine firm in the world reaches anything like the volume of business done by Dr. Hartman's firm.

Although Peruna is a proprietary medicine, the details of its compounding are in strict accordance with pharmaceutical discoveries and nothing gives Dr. Hartman greater pleasure than to show his intimate professional friends through the laboratory where Peruna is made.

A Doctor's Prescription.

For years Dr. Hartman used Peruna in his private practice as a regular prescription. He had no thought of manufacturing it or advertising it as a proprietary medicine until there was a demand made upon him by his many friends, who clamored for the original prescription.

Forty Thousand Patients.

Dr. Hartman estimates that he must have prescribed Peruna for over forty thousand patients before it was advertised as a proprietary medicine. Relieved in Four Weeks of Severe Cold on Lungs.

Miss Josie Schmetzel, Gen. Del., Appleton, Wis., writes: "I contracted a severe cold which settled on my lungs in very short order and it was not long until it developed into a serious case of catarrh. Every morning I would raise a lot of phlegm, which was very disagreeable. My digestion was poor and my lungs sore."

"After a few doses of Peruna I began to mend, and felt that if I kept on taking it, it would not be long until I would be well. I was right, for in four weeks I was well again. I think Peruna is a grand medicine, and wish to add my testimony to the many others who have."

Peruna's Popularity.

Peruna is not like so many other remedies that pass away as soon as the first few bottles are used. The longer Peruna is used in any community, the more popular it becomes.

Followed Doctor Hartman's Advice - A Grateful Letter.

Mrs. Anthony Rauch, 458 Johnston street, Bucyrus, Ohio, writes: "I was suffering from obstinate constipation and torpid liver when I took your advice and purchased six bottles of Peruna and Manalin."

"When I had taken only one bottle I felt much better and since I have taken two more bottles I feel entirely well, but I will continue taking the medicine for a short time to make sure of my cure."

"I think Manalin is one of the finest remedies for constipation that I ever tried. I will never be without it. It has made me so strong. I can do a day's work and never tire."

"I am so glad I do not get those dizzy spells any more. I haven't had one since I took your medicine."

"I cannot thank you enough for what your medicine has done for me. All sick people should give it a fair trial."

Peruna's Popularity.

Peruna is not like so many other remedies that pass away as soon as the first few bottles are used. The longer Peruna is used in any community, the more popular it becomes.

Finds Relief in Pe-ru-na After Suffering Twenty Years.

Mrs. M. S. Davis, 1505 Buena Vista street, Nashville, Tenn., writes: "After having been a constant sufferer from catarrh for more than twenty years and after trying almost every remedy advertised, and having lost all hope, I very reluctantly began the use of Peruna about two years ago."

"Everybody says I look younger now than I did twenty years ago, and I actually feel younger and better, and weigh more. I am recommending it to my neighbors and all with whom I come in contact."

Pe-ru-na Removes the Cause of Catarrh.

Peruna has no bad effects upon the system and gradually eliminates catarrh by removing the cause of catarrh. There are a multitude of homes where Peruna has been used off and on for twenty years.

Pe-ru-na Actually Relieves.

The reason why Peruna has become a standard catarrh remedy the world over is simply because it eliminates catarrh.

There are a great many catarrh cures in the world.

The most of them are local applications. Few of them are to be used internally. Unfortunately, a large number of these catarrh remedies, especially the ones prescribed by the doctors, contain narcotics of some sort. Cocaine, opium, and other narcotics are used.

These remedies give temporary relief. The patient thinks he is better right away. In a few weeks, however, he discovers his mistake. Not only is his catarrh no better, but he has acquired the habit of using some narcotic.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind.

Peruna is perfectly harmless. It takes according to directions on the bottle. So used, it can be taken any length of time without acquiring a drug habit.

wagon stopped. He was badly injured, and was in a hospital for some time, but not from an explosion of dynamite.

Oil-well shooters, when working, are in momentary danger of their lives. After a hole has been bored in the ground the shooter very gently pours into it nitro-glycerine. This must be done with extreme care. When a sufficient quantity has run down, he takes a "go-devil," a steel object, and drops it into the hole, running for dear life, so as to reach a safe distance before the steel strikes the chemical at the bottom and the explosion occurs.

Electrical engineering is a trade fraught with danger. Working about electrical machinery and meshes of charged wires, the engineer is always in danger of a fatal shock. While attempting to repair a defective fan in the power house of the Philadelphia and Reading Railway company, at Philadelphia, Henry H. Dotterer, an engineer, touched a part of the machinery that was heavily charged and fell writhing in a death agony across the switchboard.

While working about an electric fan in an ice-cream parlor in Frankford, Philadelphia, an electrician stepped on a wet spot on the floor. Immediately a current passed through him, he was thrown to the floor and shortly afterward died.

Men employed on railroads, as engineers, signalmen, speed testers and in other capacities never know when an accident will plunge them into eternity. There are thirteen hundred thousand railroad men in the country. Within one year, according to a report of the Interstate Commerce Commission, 69,191 were killed and injured. A dangerous occupation is that of a speed tester, who rides on the front of a locomotive.

In the making of modern sanitary ware, porcelain, china and terra cotta, thousands of men sacrifice their lives. Many potters die of consumption. Fine particles of dust from the ware enter the lungs and work insidious destruction.

THE HOUSE FELL.

Families Owe Their Lives to Woman's Dream.

New York, May 3.—A dream—that the house in which she lives, No. 226 Third street south, had collapsed and that all the tenements were buried in the ruins. Mrs. James Martin, who lived on the second floor, started to stay in the house longer. The other tenants hearing of her dream also moved. The house collapsed, yesterday afternoon.

Workmen were excavating on the adjoining lots, at Nos. 228 and 230 Third street south for a new building when the crash came and many of them had narrow escapes from serious injury.

Several children playing in the street were hit by flying timbers, but none of them was seriously injured. The house at No. 226 is owned by Samuel Sloat, of Manhattan. L. Marcus, a contractor, started excavating and sent away to Sloat that he had better stop up his house, as the excavating might weaken the foundations. The shoring was not done.

Mrs. Martin on Sunday night had the dream about the house falling in upon them. She insisted that they move immediately, and did so on Monday night. The family of Ralph Nicola, who lived in the basement, left at the same time.

LARDER LAKE ORE

From Blue Bell Shown at Cobalt and Assayed.

Cobalt, May 3.—J. G. Magee, the consulting engineer of the Blue Bell gold mine of Larder Lake, arrived here, to-day, with a bag of gold ore, weighing about two hundred pounds, taken from the Blue Bell properties. The free gold can be plainly seen in every piece. Assays taken here show close to \$8,000 to the ton. Mr. Magee says he put in six inch shots at various places on the Blue Bell properties and found gold in every instance. Mr. Magee is on his way to Toronto to purchase boats and complete camping outfit in order to prepare for the stamp mill to be installed by the company at once. Mr. Magee will return to Larder Lake and take charge of and push the development of the Blue Bell properties.

Mr. Magee is a mining engineer of known reputation and reliability. He believes the Larder Lake district will prove one of the greatest gold fields in the world and that the Blue Bell will make a great record as a producer.

Intended To Pay.

Harper's Weekly. The kindly old lady from the country had purchased a pair of gloves in a department store. "Cash!" shouted the saleslady. "My hand!" exclaimed the old lady, fumbling in her valise. "I'll give it to you just as soon as I find my pocket book."

There are 168 packs of foxhounds in England and Wales. A strict Mohammedan will not sell a printed copy of the Koran.

OCCUPATIONS ABOUT WHICH GRIM DEATH LURKS

According to a declaration of Dr. Josiah Strong, president of the American Institute of Social Service, more lives are sacrificed among the workers of the United States each year than were lost in any one year in the civil war, plus those of the Spanish-American and Russian-Japanese wars combined.

Yet men willingly place themselves in the way of death to earn their bread. In fact, those who enter extremely dangerous occupations lose all fear of harm, and pursue their work with a nonchalance that is staggering.

Many, indeed, take up dangerous occupations of which there is really no need—placing themselves in jeopardy for the amusement of other human beings.

One of the most thrilling spectacles of a modern circus is the somersaulting automobile. In this case, usually, a young woman is strapped in a seat the machine is taken up an inclined rail and let fly down at a rate of twenty-eight miles an hour.

Striking a curved railing at the bottom, the machine vaults into the air, completely turning over and righting itself on a collapsible platform. No accidents are said to have occurred, but, wheels of machines have been crushed by the terrific impact when they landed.

Men who soar skywards in balloons are confronted by death and serious injury every time they go on their aerial journey. There is always a possibility of the gas bursting, some accident to the parachute or physical illness on the part of the aeronaut.

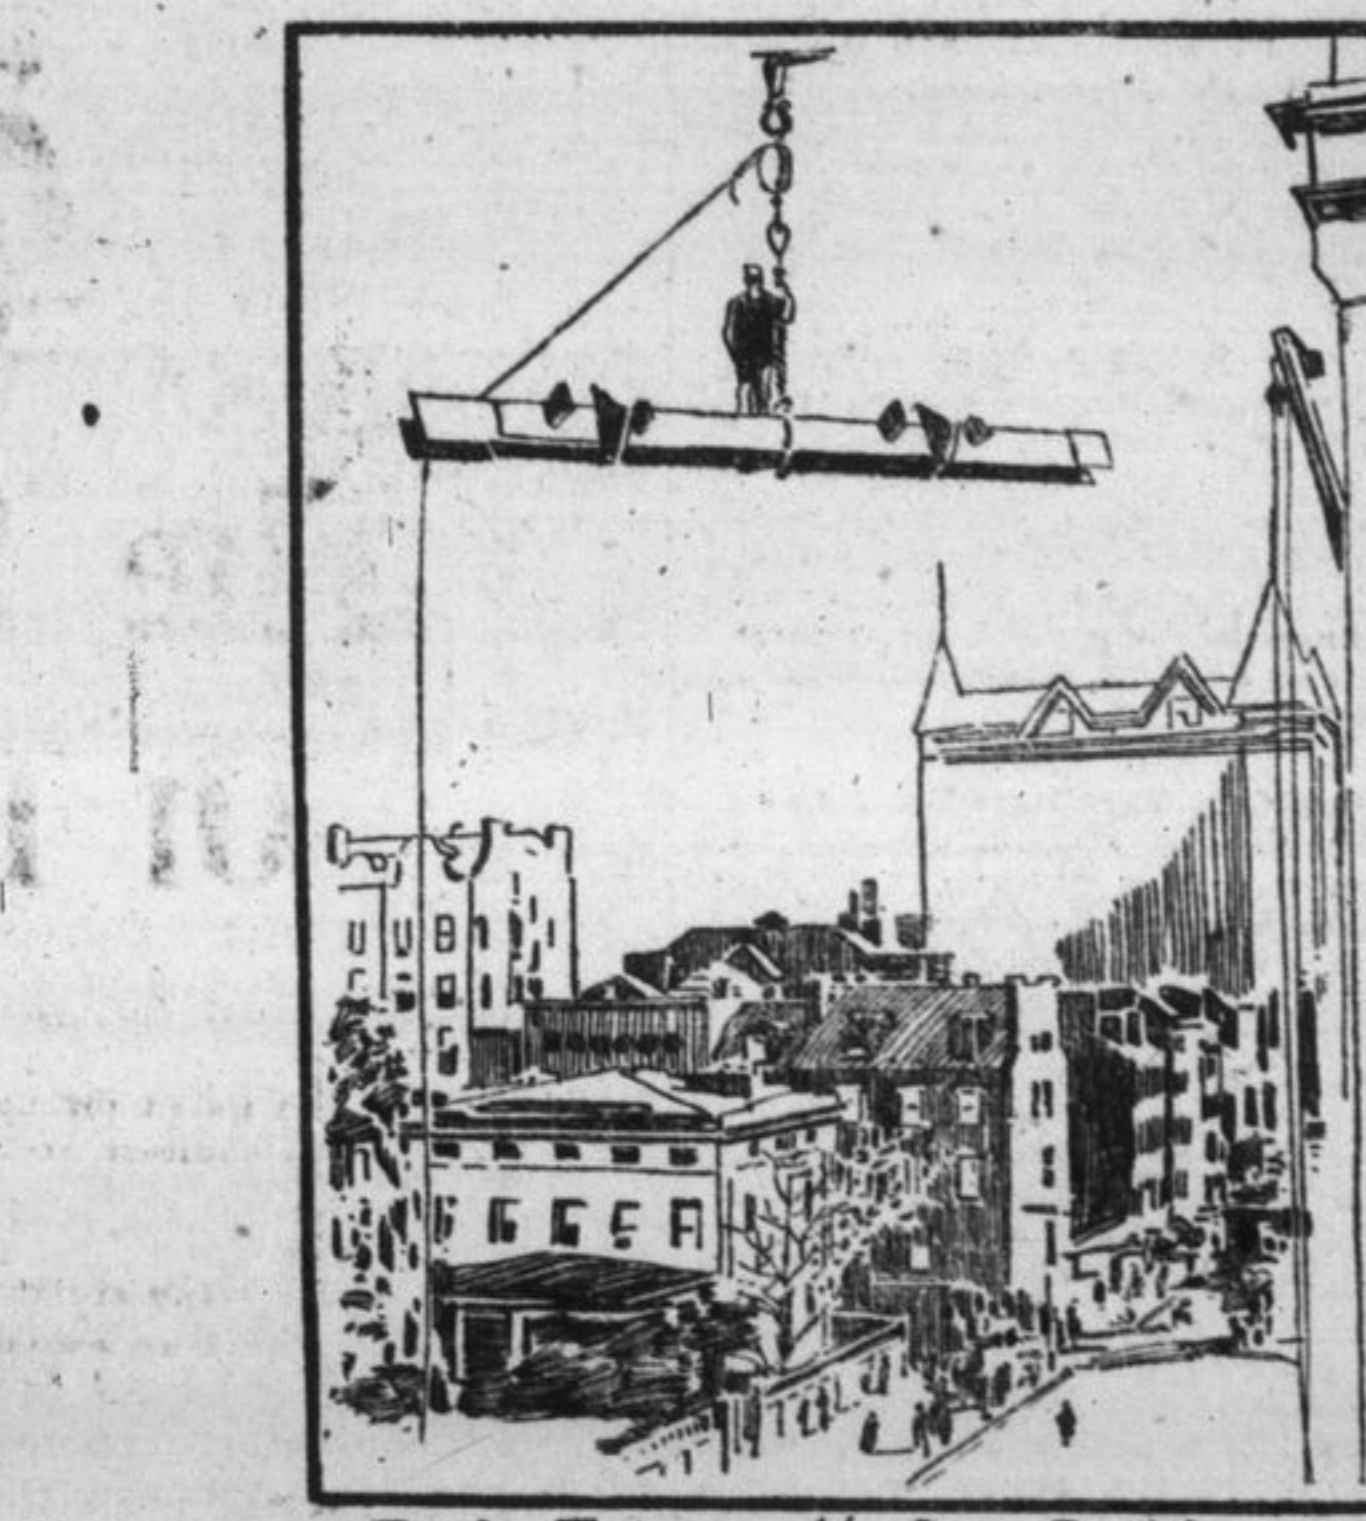

During a carnival of the Structural Trades Alliance, near Baltimore, two years ago, an aeronaut lost his life. When 2,000 feet in mid-air the man endeavored to raise himself upon a bar, on he hung by his hands, but was evidently overcome by weakness.

Dr. Hugo's Health Tablets for Women Make Healthy Women.

Whether you believe it or not, this incontrovertible fact remains. These tablets will change weak and diseased organs into strong, healthy organs; fast with some, more slowly with others, but sure and abidingly certain with all who persist in their use, except the few beyond the help of medicine.

Disease, even chronic, will then disappear as these organs are restored to their normal conditions. These tablets are now recognized beyond doubt or question as best adapted to the special needs of women.

Risky Trip of a Modern Builder

In sight of thousands of people he let go and plunged downward. Every bone in his body was broken. Down in the ground for twenty feet chimney-jacks often go right to the foundation of a tottering chimney. They climb the slippery, uncertain work laboriously while sitting on a frail plank, supported by a wedge driven between two bricks.

First he climbs along the side of a chimney on a tall, thin ladder, carrying another with him. At the top of the first ladder he drives a wedge between bricks, raises the second ladder and ties it to the wedge with tarred rope, and begins the ascent, carrying the lower ladder with him. Thus he reaches the top by raising the ladders alternately.

One of the most difficult feats is to fill a chimney. Of course it would be impossible in cases of old, tottering chimneys to begin at the top and remove them. So they must be belled-in in small sections of ten feet, built-in on both sides of them.

The steeple workers cut into the brick on one side and insert wooden props. Every precaution must be taken so the props do not weaken and the chimney fall on the workmen.

Perilous Work of the Speed Tester

wield immense hammers and pneumatic punches. When crossing a long span of iron, the worker, with eyes straight ahead on his goal, speeds across the narrow girder, a distraction or jar of the iron likely to cause a mis-step and plunge him to death.

Some time ago, in New York, two steel workers got into an altercation while sitting on a girder. One raised his mallet to strike the other. In dodging the blow the second man lost his balance and fell. He caught the girder and swung from it with both hands. His opponent also swayed and went reeling over the girder. He also caught himself. With great difficulty both men climbed up on the iron beam, and, with the anger gone from their eyes, silently shook hands.

The Newest and Best

The old Ayer's Hair Vigor was good, no question about that. But your own doctor, the one you have great confidence in, will tell you that Ayer's Hair Vigor, new improved formula, is far better. The one great specific for falling hair and dandruff.

Few Would Care for the Sceptic's Job

As you see men standing on a sill washing the windows of tall office buildings, you perhaps do not realize the danger of this work. Yet it is said a man is killed every day in the large cities of the country by losing his balance as he polishes the glass.

The purpose of makers of explosives is to make one that shall have as great power as possible, and also be safe to those who handle it. From the making to the using, dynamite is death-dealing.

Men work in the factories in silence, they move slowly, handling things carefully, always feeling they are in the presence of death. In the tunnels about New York it is said a man is killed daily in dynamite explosions. In the anthracite coal regions of Pennsylvania explosions are common.

While driving a wagon containing dynamite up Scootac Mountain, eight miles from Lock Haven, Pa., Albert Metzger escaped death miraculously, about a year ago. In the rear of the wagon was a box of dynamite, for use in a clay mine at the top of the mountain.

While ascending a steep side of the hill the traces parted, and the horse, freed from the wagon ran ahead, while the vehicle began running backward down the rocky road. Below, 100 feet away, a little bridge spanned a deep chasm.

Terrified and motionless, the man sat in the wagon, the vehicle gaining mo-
