GILLETT COMPANY | \$600 to \$800. They do not require to insulate very much, except the ice chambers, and in most cases they can put the ice-room inside the present curing room. Regarding the actual value of this system, it is well to publish again a letter received by Mr. Ruddick last fall from one of the leadimporters stationed in Mancheser, England. It was as follows : "On going through a line of white and colored cheese to-day, September a few hundred boxes for a very particular buyer. We got him fixed up but he was not altogether satisfied with the quality, and kept repeating that they were not up to our usual standard. On going to the colored lots we picked 400 or 500 boxes without turning down a factory, and our buyer expressed the pleasure that it was to have cheese of this kind offer-

We have 50 Second-Hand ed; every lot was as near perfect as "On going into the matter to try and find the difference we at once saw that the colored had been cured in a government cool-curing room at Brockville, while the white had been cured in the ordinary way. "If any of your farmers had been in our warehouse, to-day, they would have had an object lesson in the value and importance of having their cheese all cured in the same way. In our minds it makes a very much bigger difference than people imagine, and if this plan was adopted generally Canadian cheese would hold a very much

GUNSHINE FURNACE >

NOT SHAKING. JUST A GENTLE ROCKING OF THE LEVER.

Shaking is a hard, back-breaking exercise, peculiar to common furnaces, while you can stand crect at the Sunshine-and moving the lever, to and fro, about half the length of your arm, a few times, is mere play. A child can

easily do it. Grates of the Sunshine are in two sectionsright and left. By gently rocking the lever, a few times, the ashes are released from the right. Repeat the operation on the left and the ashes from that side drop into the ash-pan, too. You couldn't wish for anything easier than the Sunshine Method.

When this lever is not in use it can be disconnected from the grates and the opening capped. But when connected it fills up the opening so snugly that no dust from the falling ashes can escape.

Every detail is thought of on the "Sunshine"-that's what makes it If your local dealer does not handle the "Sunshine," write direct to
