ONLY IMITATION VINE GROWERS START WAR ON BOGUS WINE.

Chemically Prepared Stuff Sold in London Threatens French Industry With Ruin. Marseilles, May 14.—An extraordinary demonstration was held, to-day, in the little town of Capestang, near Béziers, where 15,000 vine growers gathered to hold a monster meeting, with the object of protesting against the fraudulent imitation of claret, which is said, in raising the wine trade of the south of France.

QUEEN VICTORIA'S HAIR

Its Great Profusion Was Always a Cause of Wonder. Even at the age of eighty years, Queen Victoria's hair was a marvel of luxuriance. The court physician, following Prof. Ullma's discovery, undoubtedly, treated her majesty's scalp with a germ destroying preparation, that was not made public. It is now known, however, that the remedy for dandruff, the germ destroying element is embodied in Newell's Herpicide, the only hair preparation on the market that does not destroy the dandruff germ.

What a Farmer's Wife Owes to Bileans

Mrs. John Whitfield, Swan Lake, (Man.) writes: "I can hardly describe how bad I felt before I took Bileans. I could not eat but what it caused pain. There was a constant tightness in my side and my liver was entirely out of order. I could not sleep at nights, suffered also from kidney trouble, and was altogether in a very serious condition. I had been failing in this way for years and it is gratifying to find that Bileans were equal to my case."

What To Eat and When to Eat

Two Important Questions Answered. Every nutritive element of the best white wheat flour is found in Maltiva. This food is prepared in the whole of the wheat thoroughly steamed and cooked in absolute purity and mixed with the finest malt extract that has ever been made, thus it is the richest, strongest food in the world. You understand, of course, that the cooking its starch, and that the cooking a powerful digestive agent, quickly converts this starch into maltose, or malt sugar. Maltose is great food, the weakest stomach digests and assimilates it without effort.
