EFFECT ON SCHOOLS
PRINCIPAL ELLIS DEALS WITH THE QUESTION

Of the Relationship of the Faculty of Pedagogy and the Schools—Four Factors Enter Into the Problem.

The following is a summary of the report of Principal Ellis, of the Collegiate Institute, on the relation of the faculty of pedagogy to the schools prepared at the request of the board of education special committee.

The progress of the classes used for practice by the candidates in the proposed school of pedagogy will be affected adversely in the following ways:

1. The attention of the regular teacher will be divided even during the class period; because, instead of looking after the advancement of the pupils alone, he will have to keep in mind, for the benefit of the students-in-training, the demonstration of the processes employed.
2. The mere presence of strangers will have a disturbing effect on the scholars by diverting their attention, and by making them self-conscious and backward in class discussions.
3. The chief detriment will arise from the substitution of the efforts of regular teachers, who have not at first the act of teaching, for the work of regular members of the staff.
4. It is reasonable to expect that discipline, both in the classrooms and in the school as a whole, will be more difficult to maintain, and relaxed discipline means less rigid attention and less effective work.
5. Interference with the regular teaching through masters being absent to supervise practice lessons in other departments.

Some advantages which may fairly be claimed for the effect of the school of pedagogy upon the city schools are:

1. Greater efficiency among those members of the teaching staff who act as instructors in methods, because they will have to give extra attention both to the subjects taught and to the ways of presenting them.
2. A wholesome effect upon the entire teaching staff of the city on account of the character being carried on in their presence, and because of the ideals and inspiration arising from it.
3. There would be a possibility of securing for the practice schools teachers of high professional standing if the extra work and responsibility were paid for at an adequate rate.
4. The prestige that would attach to the only public schools in the province staffed and equipped for this work, would be a matter worthy of some consideration in a city that claims to be an educational centre.
5. The personal experience gained in reference to the capabilities of a large number of teachers, and the opportunity for selecting only the best, would do away largely with the lottery element which is now so objectionable in the selection of applicants for vacant positions.
6. Extra teaching help in schools would permit of greater attention in the way of drill and personal help being given to weak and backward pupils, if room could be found for extra classes. This individual attention is probably the element whose lack forms the greatest weakness in our graded schools.

Principal's duties.—In all matters relating to the organization and administration of the schools, in so far as the work of the students-in-training is concerned, the principal of the School of Pedagogy will be complete master of the situation. For his duties in this position he is held accountable by the government, so cannot forgo any of his rights or privileges.

The only safeguard for the schools along this line seems to be that a man shall be selected in whom the Board of Education shall have entire confidence as regards his sanity in educational work, his good judgment in dealing with men and institutions, his acquaintance with the duties of teachers and the details of school organization and work, and his careful consideration of the welfare of the children, as well as of the candidates in training. If the university insists, as it has a right to, that the members of the staff shall be competent, the Board of Education has a still greater right, because of the larger responsibility it has, to insist that the man who is to guide the training school, and who is largely to be a dictator in the city schools, shall have qualification beyond call.

Reorganization.—Since the Collegiate Institute and Victoria school, at least, will be required for practice and observation, these schools will have a double function, connected on the one side with the city system, and on the other with the university; they will, therefore, require to be adapted to meet the new conditions. This will call for a great deal of reorganization to ensure the necessary opportunities for observation and practice with the regular school work.

Equipment. Model teaching cannot be done without appliances suited to the kind of work. Giving a complete knowledge of a subject and demonstrating to teachers the methods and apparatus by which the subject may best be taught are two entirely different things. A considerable outlay—of at least \$500—will be needed in order that the candidates may get instruction in that work.

Accommodation.—Since the students-in-training will have to be in the schools for a considerable portion of the teaching hours it will be necessary for them to have accommodation in the way of cloakrooms and waiting rooms for both practice and observation. Domestic Science will have to be provided for, and both instruction and practice in art work are required. These cannot be given in ordinary classrooms.

Staff.—The request that the staff of the schools used for observation and practice be made proficient and kept so seems entirely reasonable from the standpoint of those who are making it, because the function of the teacher will be materially altered by the new duties imposed, and a high grade of service is essential to the success of the undertaking. There should be a guarantee of sufficient financial inducement to bring the very highest class of teachers to our schools and to retain them there.

General Expenditure.—If the arrangement under discussion is carried out there will be, in various ways, a considerable expenditure for accommodation, appliances and fitting up new departments. This work will be undertaken mostly for the benefit of Queen's University, but partly too for the general educational good of the province it seems hardly fair, then that the taxpayers of this city should be called upon to foot the bill, or any part of it, especially as the scheme will at best be of only questionable advantage to the classes in the schools.

Other Considerations.—It is only fair to say that there are other considerations that should be taken into account in settling this matter. Kingston has the reputation of being an educational centre, and without doubt everyone would like to have the city worthy of such a name. An institution like the School of Pedagogy, would be a desirable acquisition from this point of view, and it would be worth some sacrifice to secure it.

Queen's University is a local institution in whose progress it may be assumed every good citizen has a personal interest. Circumstances have arisen which make it desirable that a training school for teachers should be established in connection with the university; and for success, it must have access, for practice purposes, to the whole question of the financial basis alone. Each member, responsible to the people, must decide for himself just how he will balance the four factors, viz.—the effect on the schools of the city, the financial considerations, the good name of the community, and the benefit of the university.

VINOL SETTLES THE COOL LIVER OIL QUESTION

No one will dispute the curative and strength creating value of cod liver oil. For centuries it has been recognized as the grandest of all healing and body-building agents for wasted human strength and vitality.

Yet, owing to the heavy, greasy oil which envelops the medicinal elements, and which has no value either as a food or medicine, many patients weakened by disease cannot digest it either in its raw form or an emulsion, and others will not take it on account of its disagreeable odor and taste, consequently its value is lost.

Now, the process discovered by two eminent French chemists—Morgues and Gautier—should interest every person in Kingston, for all of the toxic body-building and curative elements of cod liver oil are now separated from the greasy, useless oil, and given to the people in delicious Vinol. For this reason it is fast superseding old-fashioned cod liver oil and emulsions.

As a body-builder and strength creator for old people, weak women, delicate children, and after sickness and all pulmonary diseases, it is recommended by over 5,000 of the leading druggists of America as the best.

Your money back if it does not do all we claim. Geo. W. Mahood, druggist.

Hymn Written In Prison.

The Quiver.—A popular hymn is Theodolph's "All Glory, Laud and Honor," belonging to the ninth century, and said to have been written by the great while in an Anger prison.

The author of "Hymns and Their Makers" quotes a legend in relation to its use on Palm Sunday, 821, to the King of France, was at Angers, he took part in the usual procession of laity and clergy, and as the procession passed the place where St. Thomas, the Bishop of Orleans, had long been incarcerated, he was seen standing at the open window of his cell, and there, amid the silence of the people, being hymns to the deity, he set to set at liberty and restored to his see. In some minor details this legend is referred to by other writers as well.

The original is too long to be sung in modern services, as it has no fewer than seventy-eight lines. The verses usually found in our hymnals are but the first two, which are well known, and which, with more or less abbreviation, has been used as a processional for many centuries.

At Sea In A Coffin.

It was the French assassin Lupi, who escaped to sea from Cayenne in a coffin. He managed to get some nails, tar and cotton, and one dark night he got into the coffin shed. He selected a fine launch and sawtooth coffin and fastened the lid in order to turn it into a deck, leaving a coak pit sufficient to enable him to crawl in. He called all the joints as well as he could, and when this work was finished he made a pair of paddles out of two planks. Then he brought out his craft with great precaution. Without much difficulty he reached the water's edge. Silently and slowly he proceeded in the hope of reaching either Venezuela or British Guiana, 150 nautical miles distant. Fortunately or unfortunately for Lupi, the steamer Abelle, returning from the Antilles, off Paramaribo, picked him up, half drowned and almost in a fainting condition, and a few hours later he was in irons in his cell.

A Creditable Paper.

Journalism in Western Canada has kept pace with the advance made in other lines of enterprise, and some of the daily papers would do credit to constituencies many times the size of those served. The Special Spring Building Number of the Regina Leader, this paper owned by Hon. Walter Scott, the premier of Saskatchewan, contains fifty-six pages, and is profusely illustrated. The class of buildings being erected in the capital city gives it a substantial and prosperous appearance. As a supplement a colored map of Saskatchewan, showing the divisions of the electoral districts is given. Considered from a typographical standpoint, the issue is a credit to Regina.

Ferguson's Falls Notes.

Ferguson's Falls, May 15.—Thomas Rothwell has started to put up his bath barn. Charles Hollinger's thoroughbred horse took first prize at the annual horse show in Perth. The remains of Miss Anna Rodgers, who died in Manitoba passed through here last Friday, to be interred at the Catholic cemetery at Macdonald's Corners. Thomas and William Quinn visited friends in Perth on Thursday last. Miss M. Stafford is visiting her friends in Perth.

News From Athens.

Athens, May 15.—The people of Athens have sent \$125 to the Chinese Famine Fund. At the May meeting of the official board of the Methodist church, the board placed on record a hearty vote of thanks to, and appreciation of the pastor, Rev. S. J. Hughes, M.A., and extended to him a unanimous invitation to remain for a fourth year. The relations between pastor and people are most agreeable.

Bibby's \$1 Shirts, Bibby's.

Our \$1 shirts wear longer, fit better, are made in better patterns than any other shirts we've ever seen at the same price. The H. D. Bibby Co.

THE SPORT REVIEW.

Notes on Baseball, Lacrosse, Racing and Fighting.

The annual international cricket match between teams representing Canada and the United States may take place in Ottawa this year.

The Midland Baseball League opens on Saturday, 18th, when Cobourg plays in Oshawa. The return game will be played on May 21th, on which date also Port Hope plays Bowmanville.

Longbath seems to have made the post Indian popular in sporting circles. Montrealers are trying out a couple of Caughnawagas, and now Hamilton has a Six Nation chap who is touted as a whirlwind.

At a meeting of the Ontario Jockey Club held the following officials were appointed for the Toronto Woodbine meeting: Stewards, Francis Trevelyn and Major William Hendrie; judge, Alfred S. Post; associate judge, Francis Nelson; starter, A. B. Dade.

The Washington American League Club has sold "Jake" Stahl to the Chicago American club for a price said to be \$4,000. The action is the result of a recent decision of the national commission requiring the Washington club to dispose of Stahl within a week.

Toronto World: Toronto will be well represented in the N.I.L. this season, the Toronto team being Toronto. The Indians are stronger than ever, and will be decidedly in the running, while the Torontos will not be as weak as was first thought, and the chances are the winners of the city championship will be the winners of the Minto Cup.

Jack O'Brien has quit the ring for good. He is all broken up over the scandal in connection with his recent battle with Burns, and he realizes that no fight promoter will want his services now. He has lost no time in telling some of his old friends that he would never fight again. O'Brien intends to sell out his hotel in San Francisco, and return to Philadelphia where he will devote his time to his real estate business.

J. C. Miller, ex-president of the C.L.A., has received a cablegram from Australia, that the whole of the promised guarantee for the visit of a Canadian lacrosse team had been posted. The following players will accompany the Canadian team to Australia: Kearns, Arthur, Gilbert and Atton, Toronto Junction; Campbell, Coombs and Graham, of Bradford; Arves and Curran of Orillia; Hanley, Stratford; Boyle, Newmarket; Hanley, Midland; Green, Arnprior; Murton, Teumessie; McDonald, Port Arthur, and Backus, Shelburne.

A despatch from Oswego, N.Y., says: "Fifteen members of Oswego's baseball team tried out today. Manager Elliott expressed himself as highly pleased at the prospects. He says that the present aggregation is fully fifty per cent, better in hitting than the team of a year ago. They are still four men to report. McGuire, the Toronto shortstop; Wall, first baseman from Ogdensburg; Wallace, a catcher, from Niagara Falls, and Galvin, an outfielder, from Washington. Chase, a pitcher, arrived here today from Providence, giving Manager Elliott six men from whom to choose his twirlers."

From 100 To 125 Men.

Will be employed by zinc and lead smelters; at least 100 families added to our population. Dwellings are scarce now. You will see a building boom in Kingston shortly. Vote for smelter by-law.

Scott's London.

A hat that is not only the choice of royalty but is the choice of good dressers everywhere. Sold in Kingston only at Campbell Bros., Kingston's style centre for men's hats.

Have Made Their Deposits.

The smelter people have made their deposits. It is up to you, friend, to vote for the by-law on May 28th.

Handsomeness shirts, \$1, at Bibby's.

Prevost, Brock street, has received three cases of imported goods for his order clothing department, consisting of Scotch and English tweeds, serges, chevots and vicunas. A great variety of them to choose from.

John R. Laing, assistant engineer at the M. C. Refractory, was caught in some machinery and seriously injured.

You need look no further than right here for the best line of hats the town affords. Bibby's "Ladies' Suede gloves in tan and grey's, worth 50c., for 25c., at Corrianna's.

It takes a very thorough education to deprive some people of their natural sense.

Fooled the Doctors and Got Well

GIN PILLS CURE RHEUMATISM

They certainly were a surprised lot of doctors out Tyndside way. They had been treating Mrs. Harris for years. Gave her about everything that was ever heard of for Rheumatism—and then told her the disease was chronic.

A friend told Mrs. Harris about GIN PILLS, just to oblige her friend, Mrs. Harris took a box. When that was gone, she dismissed the doctors and bought another box of GIN PILLS. By the time these were gone, she was so much better that she bought the third box and laughed every time she saw a doctor.

Tyndside P. O., Aug. 6, 1906.
 As there was only enough for a trial I got a box from your druggist, and now I am taking the third box. The pain across my back and shoulders has almost entirely gone. I don't think I have been for years. It was a great relief from Rheumatism, but it has left me well. Mrs. J. Harris.

The doctors can't explain it. They don't try to. They said Mrs. Harris could not be cured. GIN PILLS cured her. Proof beats explanation all to pieces. Do YOU want proof? Write, mentioning this paper, for a free sample of GIN PILLS and try them yourself. Then you will see what GIN PILLS will do for YOU. Write now to the Bole Drug Co., Windsor, for a free sample.

Sold by dealers everywhere. 50c a box—6 for \$2.50.

Dewar's Whisky
 The Biggest Seller Because the Best.

Ellis Spring Needle Ribbed UNDERWEAR

THE NEEDLE DOES THE TRICK

The absolute elasticity of our garments is obtained by a peculiarity of their construction—Ellis Underwear being manufactured by a patented method known as the "Spring Needle Process"—which ensures a springy, elastic material, such as cannot be produced by any other factory in the Dominion—the Canadian rights being controlled by us.

Your dealer probably has Ellis Underwear. If not, write us. Write us anyway and get a free booklet.

Sole Makers in Canada:

THE ELLIS MFG. CO. LIMITED
 HAMILTON, ONT.

THE RECORD CALORIFIC

Our warm air heat producer for churches and large public buildings, possesses a very important feature in the fact that it has two air courses—the air travels up through both the inner and outer castings. All products of combustion come in direct contact with surround the hot air columns, thus making the largest amount of heating surface to every square foot of grate surface ever achieved in a warm air heater. The flue construction admits of heat being forced direct to the most distant and most exposed part of the building to be warmed.
