Most people always use—and will always use WINDSOR SALT. Pure—fine—perfect in subtle savour.

Real Estate Headquarters. If you want to buy or sell City Property, go to a man who makes a specialty of same.

GEO. CLIFF, 95 Clarence St., Opposite Post Office Phone 325

A HURRY CALL FOR COAL— Even if it reaches us via phone— will meet with immediate response with a ton or more of fine free-burning fuel. But it will be better for your peace of mind to order as far ahead as may be, for it's likely that others, like yourself, are getting things of odd the last minute.

R. CRAWFORD Phone 9 Foot of Queen Street Coal that suits.

THE WHIG, 74th YEAR. Daily Whig published at 300-310 King Street, Toronto, Ontario, at 10 per year. Weekly British Whig, 12 pages and over, published in parts on Wednesdays and Thursdays at \$1 a year. Attached to one of the best Job Printing offices in Canada; rapid, stylish and clean work; also improved presses.

The British Whig Publishing Co., Limited EDV. J. B. PENNIE, Managing Director.

Daily Whig.

LESSONS FROM EXPERIENCE.

There is a longshoremen's strike at Halifax, and it is proceeding along very much on the same lines as the longshoremen's strike in Montreal. That is the men decided that their labour was worth a certain sum an hour (30c.), and because the steamship men did not grant the demand there was an immediate cessation of service. At once the Montreal men became alive to the folly of the situation and the president of their union telegraphed to the Halifax strikers to seek the aid of the board of conciliation under the Lemieux Act.

The course is clear. It is not hard to understand. If there be a difference of opinion between the employer and employee it should be referred at once to the labour department. Each side appoints an arbitrator, and these two appoint a third, or if they cannot agree as to the third, the labour department selects him. One side may be willing to arbitrate, and the other not. The one that is willing reports to the labour department, and names its representative. The labour department does the rest. But there has to be an appeal to it in any case, or from some party to the dispute, before it can interfere.

WHERE THE MATTER STANDS. The revised offer of Queen's College trustees is now before a committee of the Board of Education, and will be reported upon promptly. The university offers to pay a bulk sum of \$2,450 towards the changes in salaries which will be occasioned by the establishment of the School of Pedagogy. The board of education will have complete control, as heretofore, of its teachers, and they will be subject to it at all times.

If the question of efficiency arises it will be reported on by the dean of the School of Pedagogy, the principal of the school, and the inspector of high or public schools, as the circumstances may suggest. For the present the institute, Victoria school, and the classes in the Orphans' Home will be used for practical instruction and observation, but if others are required, they will be asked for on terms to be arranged. The whole of the equipment is to be provided by Queen's College.

It will thus be seen that the proposition has been very much changed, since last it came before the Board of Education, and that now it is in more acceptable form. The desire is to have it take effect as soon as possible—the School of Pedagogy to open in October. The Whig does not see any advantage in this rush to education. The work has to be deliberately approached. The lecturers have to do a lot of preliminary work. They cannot be organized until it is determined how the special duties can be assumed, and a make-shift policy is not calculated to give very much satisfaction. This remark applies to Toronto as well as Kingston. In short the education department is likely to sadly disturb the pedagogical system by abandoning the Hamilton Normal College, for its work has been amply and satisfactorily provided for.

FICTIONS OF THE DAY.

Mrs. Florence Maybrick has been heard from in an unexpected manner. The press, in some way, became possessed of a story concerning her that was depressing enough to say the least of it. In essence it reflected the thought that the British government, though convinced of her guilt, had given her a liberty which she was not appreciating; that she was, however, simply on parole or under police surveillance, that her career as a lecturer and authoress had been a failure, and that (on one account) life had been so discouraging, so different from what she had expected, that her place in the English prison would be welcome.

The origin of this statement is a mystery, but that it is based on fiction has been made apparent by the letter of Mrs. Maybrick to the press. She has called the attention of certain papers in Canada, to the quite evident misunderstanding of the facts and asked them to make the necessary correction. The public records show that Judge Stephens said there was a doubt about the conviction when it was made; the home secretary, after mature consideration, recommended

that her sentence be commuted, and the chief justice of England advised that she should go free, as "the history of the case reflected discredit on the administration of the criminal law."

Mrs. Maybrick points out that she is not on parole, and is not restricted in her movements. She is free to go where she likes, and last year visited England and received courtesies from its people. Otherwise, she appears to be enjoying her freedom, and to be happily and profitably employed. How she came in for the wonderful criticism to which she was recently subjected passes comprehension. Some highly imaginative person indulged his propensity to the disadvantage of the press, for all the papers which published his lucubrations are now under obligation to give the correction with all the humility that this service entails.

The press is often imposed upon. It was so in this case, and in the Cayuga alleged murder case, when references were made to a woman who, being acquitted, had gone in pursuit of her critics, and in a way it is surprising to behold.

EDITORIAL NOTES.

The smoke nuisance greatly offends some people. Smoke is a nuisance, but, as an evidence of industrial activity the pity is that we do not see more of it.

The coal bins are being replenished out of season. There is great complaint because of the inclemency of the season, but it is not coming from the coal men.

The teachers are co-operating with the board of health in seeking to guard against the spread of contagious diseases. Measles are not alarming, but scarlet fever is greatly dreaded.

Some of the latest arrivals from Europe in immigrants are not very welcome. They are likely enough persons, but they don't want to go in to the country and that is where their labour is most in demand.

"Our railways" is the manner in which the local gossamer refers to the Temiskaming. The liberals projected the road, and at the outset very much against the mind and will of the conservative party in Ontario.

Leader Graham makes the point that Mr. Whitney has changed his tactics since he was in opposition. His talk at one time was free books; now it is cheap books. Why not free? Is that proposition completely abandoned?

SPIRIT OF THE PRESS.

Not A New Thing. Guelph Mercury. Mrs. Mary Baker Eddy can rule thousands of Christian Scientists successfully, and hurls it when she has to manage her own household.

Getting His Deserts. Ottawa Free Press. Irish Nationalists say that Mr. Birrell has not returned and unsettled everything. Some time that eminent statesman may become a member of the judicial committee of the privy council.

No Chief Guesser. Toronto Mail. A pale face means pale blood. Pale blood means low vitality. Pale makes you look badly and the poor feel badly. There can be no happiness without health and energy, and these conditions can be secured by building blood and vitality with Wade's Iron Tonic Pills.

Bound To Have Trouble. Peterboro Examiner. Conservative governments do not shine as nation builders. Under a conservative government's misgovernment we had, in 1885, a little rebellion in the Northwest, under a conservative government's misgovernment we have, in 1907, a portion of Ontario threatening secession. "Be just, and fear not"—either rebellion or secession.

Much Sympathy Being Wasted. Hamilton Spectator. Much sympathy is being wasted on the R.M.C. cadet who is doing time in Kingston for cutting off his moustache, contrary to the order made and published. It is not likely that the moustache amounted to much, but the cutting of it off was a disobedience of orders, and that cannot be permitted in military affairs. If a young fellow thinks he can do as he pleases he has no business being in the military college.

Biblical Blunders. New York Post. Mr. Bellamy's recent blunder in Biblical allusions has recalled similar slips. A rural politician urged his followers to be firm, lest they meet the fate of Lot's wife, who "looked back, and was turned into a pillar of salt by day and a pillar of fire by night." The "howlers" of school-boys are mostly those of rash interpreters. Thus a youth was asked to explain "The tale of bricks ye shall lay upon them," and wrote: "They should be whipped with the tale of the bricks for not working faster."

Prevents constipation, stomach and kidney trouble. Makes everything digestible. That's what Hollister's Rocky Mountain Tea does. 35c. Tea or Tablets. Mahood's Drug Store.

The Erie Railroad company announces that owing to the present labour trouble at Galesburg, Ohio, the company has determined to remove its machine and repair shops from Galesburg to Marion, Ohio.

NEW YORK SKIPPER

ROCHESTER PICKS HANAN FOR THE HANDLER.

Will Defend Canada's Cup With Bristol-Built Boat and New York Sailingman.

In Utica it is claimed that Morris Steelman is the best backstop in the New York State League. E. A. Patterson, of Toronto, played great tennis for Oxford and will meet Brookline, Australian expert. The New York and Chicago teams are having a great fight for the championship of the National Baseball League.

The championship season in the N. L. E. opens on Saturday, with Shabrook at National, and Montreal at Cornwall. Kelvin, the winner of the Ontario king's plate, will be among the entries at the inaugural meeting of the Jockey Club at Blue Bonnets, Contraband, Brooklyn's new catcher, Butler, drafted from Jersey City, is very good on foul balls, and is one of those catchers who is always in the game. Addison G. Hanan, New York, has been selected by the Rochester Yacht Club as skipper of the new yacht Seneca for the Canada cup races next August.

Ottawa roller hockey teams are anxious to induce All Smith to turn out with them, and it is likely that he will do the big act, rollers and get into the game in the course of a fortnight. Montreal Gazette: Judging from the score they piled up after getting ashore in the ancient capital on Saturday, the Capitals have taken the Quebecers for one of the old country teams.

Pitcher Joss, of Cleveland, "the human slat," has won nine straight games to date this season. Chesbro made a mark of fourteen consecutive victories with the New York Americans.

Charley Patch, the North End Athletic Club runner, Toronto, is negotiating with the promoters of a twenty-mile race at the Jamestown Exposition, and may be a competitor. Patch is now in better form than when he ran at Boston and Collingwood.

Frank Delahanty, who for a time played good ball for the New York Americans, is with the Cleveland, and will within a few days don a uniform and play in the outfield. The former New Yorker, with Pitcher Clarkson, was given to Lajoie in exchange for Pitcher Moore.

A Hamilton despatch says: In spite of the reports to the contrary sent out by the press agents of the Montreal Jockey Club, practically all of the big stables now racing at Toronto will ship to Hamilton after the close of the Woodbine meeting. The Hamilton meeting will open on Tuesday, June 10th, and will continue for eleven days. The opening day feature will be the first Ontario Derby, in which all of the good three-year-olds racing in Toronto and many others are entered.

A Missouri newspaper comments on the fact that hay in the neighborhood costs \$14 a ton, and that the wheel "is coming in" again. The editor agrees that the horse is too much of a luxury, and that the cheapest and most convenient vehicle for annihilating space, therefore, is the bicycle. "The bicycle," continued the editor, "is good for business and pleasure. It is good for the people of the country roads and city pavements again filled with healthy, happy cyclists. The revival of the exercise will be an excellent thing for all parties concerned. It is good for the people who ride, for it is doubtful if any other benefit has become popular in more than cycling, properly indulged in."

Twin Foss To Happiness. A pale face means pale blood. Pale blood means low vitality. Pale makes you look badly and the poor feel badly. There can be no happiness without health and energy, and these conditions can be secured by building blood and vitality with Wade's Iron Tonic Pills.

They are a great nerve strengthening and blood-maker. In boxes, 25c. at Wade's drug store. Money back if not satisfactory.

Dog Sounds Alarm. Oxford Pa., May 30.—A trike caught a pet collie dog by the children saved the family of William Beattie, farmer, from death by fire. The dog being able to bark, the household by barking, grasped the rope to the dinner bell, as he had been taught to do when summoning the hands from the fields, and in an instant the wild pealing of the gong was arousing the neighborhood.

Short-Cut Curing. When you have a severe strain, or lumbago, pain in the back, or twinges of rheumatism or neuralgia, you want relief in the shortest possible time. Nothing can relieve and cure quicker than Smith's White Liniment. It penetrates deeply and relieves congestion, inflammation and pain-like magic. Large bottles 25c., at Wade's Drug Store.

For Starving Chinese. Shanghai, May 30.—The proceeds of the International Bazaar, amounting to \$60,000, have been handed over to the famine relief fund. This was the first occasion in which there was co-operation by the Chinese with foreign aid of all nationalities, and indicates improved relations. The fund will be formally closed at the end of May.

Kansas Bug Damage. Junction City, May 30.—From different parts come reports that outcrops have been completely destroyed by green bugs. The farmers say that yesterday morning their fields looked fine, by evening their entire crop had been destroyed. To-day farmers west and north began ploughing up their outcrops and sowing other crops.

"Laxative Bromo-Quinine" for grip and colds. Fresh at Gibson's Red Cross drug store. Erie's chocolate are made fresh every day.

MILLION DOLLAR COMPANY.

Expansion of Slater Shoe Trade Requires It.

The capitalization of the Slater Shoe Company will be increased to \$1,000,000. Much of the new stock will be taken up by present shareholders, the announcement naturally caused some enquiry. President Charles E. Slater said that the increase was rendered necessary by the phenomenal increase in the demand for the trademarked and price-marked shoe, a demand which received a new impetus when the enormous increase in the cost of leather and shoe manufacturers to cheapen and weaken their product. The people sought security in a shoe which bore the maker's seal and the maker's mark of worth.

From a trade of \$500,000 in 1904, and \$600,000 in 1905, the volume of business of the Slater Shoe company has since leaped by compound increases of twenty-five per cent. each year, and will go well over the million mark in 1907. Such a rapid expansion of trade calls for a larger capital investment, more particularly as every sign points to an increase of over one million and a half (\$1,500,000) before the end of 1908.

Applications for new Slater Shoe agencies are received almost every business day. It is the intention to increase double present factory capacity. The Montreal factory, equipped with modern plant and machinery, is devoted exclusively to the making of fine Goodyear welt shoes.

For the six months of the spring season 1907 the orders taken were total well over \$575,000, or more than the whole year of 1904. One traveller in one year booked orders for a quarter of a million dollars' worth of shoes. The Slater business was founded fifty years ago in Montreal, and was taken over by the Slater Shoe company eight years ago. In ten Canadian cities there is, to-day, a market for a million dollars' worth of Slater Shoes.

It is said that some of the seven per cent. preferred stock of the company may be offered to the public. As a sound, substantial Canadian enterprise, conducted with initiative and creative talent, there is much in this splendid corporation of which Canadians may be proud.

MOTOR CAR CHARGES CROWD.

Twenty Persons Injured and One Dies. Berlin, May 30.—The chauffeur and occupants of a private motor car narrowly escaped lynching at Magdeburg last night at the hands of an infuriated crowd of 100 persons, into whom the car had dashed without warning. Twenty persons were injured, several seriously; one had died.

Another fatal motor accident occurred in the Thames region, yesterday, along the course of the forthcoming race for the Kaiser's prize. A chauffeur who was taking a Bolkan car for the first trip along the course, turned a sharp curve at high speed. The car dashed violently into a tree, and the driver, who accompanied the chauffeur, was instantly killed. The driver himself escaped with serious internal injuries.

The Cost of Paper.

Montreal Gazette. The consuming public is so used to receiving the information that every kind of raw material has been advanced in price by those who control the supply that buyers of printing will not be greatly surprised to learn that nearly all the paper advanced in price from eight to ten per cent. One week printers receive notice that wood pulp boards have gone up; another week that all book papers have advanced; then comes notification that coated or enamelled papers have been raised in price; that cardboard stock is on the incline; that print paper is to be elevated a notch in the cost of paper advanced prices in the cost of paper must necessarily fall upon the consumer at large, for the printer has already all the burdens he can possibly carry in the form of advance of labor and supplies. Buyers of printing may, therefore, reasonably look for an increased cost in all kinds of printed matter, and the duplication of orders at former prices is scarcely to be expected to continue.

At Oso Station.

One Station, May 29.—The farmers are about through seeding. Owing to the cold weather there has been a very poor growth. The ballast train has started to draw gravel along the K. & P. railway. A number of the men have started to work on K. & P. ballasting gang. Campbell Greer has the sympathy of many friends in his sad bereavement of losing his wife and infant daughter. John A. Bourk has returned home after spending some time in New Ontario. Mrs. Price and Mrs. McIntyre, of Carleton Place, have returned home after spending a few days with friends here. Robert Wilson, Lanark, spent the 24th of May at S. C. Bourk's, Robert and Sarah Butler have returned to their schools at Parham and Bolingbroke after spending the 24th at home.

Chown's Drug Store, for perfect fitting glasses. Gen. Methuen is to command the British forces in South Africa.
