Sold Everywhere. In boxes 25 cents.

TENDERS.

TENDERS ADDRESSED TO THE undersigned at Ottawa, and endorsed on the envelope "Tenders for Lighthouse Supply Steamer," will be received up to the

TENTH DAY OF JUNE, 1907, for the charter of a suitable steam vessel, to deliver supplies to the Lighthouses above mentioned, commencing at Montreal on the 24th of June next.

Each tender must be accompanied by an accepted cheque on a chartered bank equal to ten per cent. of the whole amount. The tender which shows will be forfeited if the party declines to enter into a contract or fails to perform the conditions.

Particulars as to vessel required can be obtained on application to the Department here, and at the Customs House at Montreal, Kingston, Toronto, Hamilton, Barrie, Owen Sound, Sarnia, Collingwood, and Sault Ste. Marie. Newspaper insertions in this advertisement without authority from the undersigned will not be paid for.

DEPUTY MINISTER OF MARINE AND FISHERIES. 18th May, 1907.

Department of Railways and Canals.

RIDEAU CANAL.

NOTICE TO DEALERS IN CEMENT. SEALED TENDERS ADDRESSED TO A. T. Phillips, Superintendent General, Ottawa, and endorsed "Tender for Cement," will be received until 6 o'clock on Friday, the 21st June, 1907, for the supply of 100,000 barrels of Portland Cement to be delivered at the Ottawa Power House, in the City of Ottawa, by the 21st July, 1907.

Specifications can be procured at the office of the Superintendent Engineer of the Rideau Canal, Canadian Building, Ottawa, on and after this date. The Department does not bind itself to accept the lowest or any tender.

By Order, J. R. JONES, Secretary. Department of Railways and Canals, Ottawa, 25th May, 1907. Newspaper insertions in this advertisement without authority from the Department will not be paid for.

COAL!

The problem changes in weather should to augment the winter supply. It is a good idea to get your coal now. It is a good idea to get your coal now. It is a good idea to get your coal now.

WHY OLD COUNTRY PEOPLE LIKE IT.

Settlement in the Garden of the Province-The Eastern Townships a Fine Place to Locate In.

While the great rush of immigrants to the Northwest, there is a quiet movement going on in the Eastern Townships, organized by prominent citizens there, and supported to some extent, by the Provincial Government, which has for its object increased settlement in the "Garden of Quebec."

The lure of the West, and especially of the Klondike, caused a certain exodus to occur some years ago from the Eastern Townships—a depletion which was deeply regretted by prominent citizens, who were well persuaded that in this favored portion of the province the chances of making a comfortable living were equal to those in any other part of the Dominion.

Though the Townships might not have sold (and even this has yet to be tested), it had the character of the most alluring scenic aspects, composed of hill and valley, lake and river, with the soft and serene atmosphere which is the mark of the region.

To improve the situation it was resolved to direct the attention of small farmers and farm laborers in the Old Country to the Eastern Townships, and although there is no rush in response, the movement has met with a steady measure of success.

Hundreds of English families have been settled in the Townships during the past few years, and considerable numbers are expected this season.

All are selected on the other side by the emigration societies there, and communication made with either Mr. Marquette, the provincial immigration agent, or the local committee in the Townships. It thus happens that when the farmer or the laborer, with his family, come out, there is a place for them, sometimes it is the place of their hand, and sometimes, where there is a little money in the case, it is a farm ready for working.

The chief interest of this movement for British settlers consists in the fact that the Townships mimic, in many wholesome ways, the life of the Old Land. The sense of business and order is all-prevalent. The farmers give the idea of care and pride.

The hedgerows, in great part, have been settled in the same form. Before every house, whether in the country itself or the nearby village, there is a garden plot, where grow the simple things which, in the Mother Land, are so dear to love and memory.

The English, no doubt, know a good deal more about Canada now than they did thirty years ago. On the other hand, in a proclamation of the Privy Council, it is stated that the special circumstances of any Canadian case such as would affect the interpretation of the law may not be present to the mind of the judge.

Westminster. There seems to be no good reason for any longer encountering the expense and trouble of the case in an case in which neither Imperial right nor any question between different colonies is involved.

Goldwin Smith in Weekly Sun.

St. Wilfrid's Prophecy. The following paragraph from Sir Wilfrid Laurier's speech at the Guildhall in London is worthy of being read, and re-read, and then passed in the mind.

"In 1802 a strong pressure was put upon the British Government to send out to the Cape Colony a number of British soldiers, which was done, and that nation is England. Now, the wisdom of this policy has been fully vindicated. We have an impression that there is a good deal of bumbast about this flag business.

Patriotism that goes no farther than a lot of blustering does not amount to much. In the time of the Boer war, we have paid little attention to flags, and yet were about as loyal a people as there is any need for. If patriotism is to be taught to the schools, it should be by means that appeal to intelligence, not merely to the eye.

Let the children be taught the responsibilities of their country, and the duties of their citizenship. Let them be taught that while it may be occasionally necessary to fight for their country, it is always necessary to care for their country, and that this is to be done by patriotic and all good work.

It is this lesson, is thoroughly instilled into the minds and hearts of children more good will be done than by unlimited flag-flying.—Walkerton Telescope.

Would Import Russians. The Prairie is a weekly paper published at Calgary, and contains some vigorous views and breeziness of expression. A contributor called "A. G." proposes to settle the coal strike by importing 3,000 Russians.

These Russians are to be treated in a manner which will make them feel that they are still under the Czar. Confiscation of all his property and deportation are among the wild punishments to be inflicted upon any Russian miner who joins the union.

The editor mildly says: "Augustus has opinions on the coal situation which he airs in this number. You may not agree with him; but his remarks are at least readable."

Nothing Lost. He swore off half a million. Yet he didn't feel bereft. He had the property all right; The tax man 'was got laid."

What Happened to Sam. There was a young fellow called Sam. He closed the door with a slam. His aunt said, "Dear me!" And his mother said, "Gee!" But his father, he only said, "Sam!"

Dispepsia in its worst forms will yield to the use of Carter's Little Liver Pills, aided by Carter's Little Blue Pills. They not only relieve present distress, but strengthen the stomach and digestive apparatus.

A girl has such an imagination, she can fall in love with a man by pretending she is going to marry him. The average man can write a lengthy long letter unless it's to his own family.

Scottish Bowlers Pleased With Reception Received Everywhere.

The following reference was made to the tour in Canada by the Scottish Bowling Association: "An event of great importance during the tour was the visit of a team of British bowlers to Canada."

It was a return visit for one which a team of Canadian bowlers paid to this country in 1904. The British team consisted of 40 players, of whom 25 were selected from constituent clubs in Scotland. The team played 23 matches, winning 21 and losing 2.

After deducting the 22 shots which were lost in the two matches referred to, the team's majority of shots numbered 1,087. In their tour the team played in 21 towns, and engaged in contests with 17 clubs representing 67 clubs. A synopsis of the results of the various matches has been issued to constituent clubs.

The reception which the team received at every place visited was cordial in the extreme, and from the time of arrival in Canada until the time of departure for home, the greatest kindness and hospitality were extended to every member of the team by their Canadian hosts. The committee desires to record their appreciation of the most generous and cordial reception which they received at the hands of the Scottish representatives who contributed so largely to the success of the tour.

"Such intercourse as that which took place between the British and Canadian bowlers cannot fail to be of benefit to the Motherland, as well as to the great colony which was visited. The date for a return match by the Canadians will be considered by the International Board, and when they get a hearty welcome, which will be sent shortly, will be for eight rinks in 1908."

PRIVY COUNCIL APPEAL.

Canadian Courts Should Suffice in All Ordinary Cases.

If the members of the Imperial Conference wish their labors to bear any practical fruit, let them turn their attention to the jurisdiction of the Privy Council in Canada.

The colonies had not in early days, but each of them now has a satisfactory bench and bar of its own. In colonial Imperial interests or law suits between members of different colonies it may still be necessary to have an Imperial court.

But in cases between citizens of one colony and another, or between a citizen of one colony and a citizen of another, it is not necessary to have an Imperial court.

Let the Imperial Government grant subject to the condition that no British subject shall be heard by the Privy Council in any case in which neither Imperial right nor any question between different colonies is involved.

Goldwin Smith in Weekly Sun.

TO BE BEAR-ADMIRAL.

Captain Kingsmill, Promoted to Command of Home Fleet. Captain Kingsmill, son of former Judge Kingsmill of Toronto, has been promoted to the command of the home fleet, special services division, at Devonport.

The Right Sort of Patriotism. The Ontario Government has voted the sum of \$75,000 to purchase flags for the public schools of the province.

These flags are to be used as objects of patriotic instruction. We have an impression that there is a good deal of bumbast about this flag business.

Patriotism that goes no farther than a lot of blustering does not amount to much. In the time of the Boer war, we have paid little attention to flags, and yet were about as loyal a people as there is any need for.

If patriotism is to be taught to the schools, it should be by means that appeal to intelligence, not merely to the eye.

Let the children be taught the responsibilities of their country, and the duties of their citizenship. Let them be taught that while it may be occasionally necessary to fight for their country, it is always necessary to care for their country, and that this is to be done by patriotic and all good work.

It is this lesson, is thoroughly instilled into the minds and hearts of children more good will be done than by unlimited flag-flying.—Walkerton Telescope.

Lord Milner's Views.

It is extremely unfortunate that the one form of Imperial partnership, the one new tie of a practical kind, which all the colonies, including Canada, are as yet unanimous in desiring, should have met with no better reception in the Mother Country.

Formerly only a limited number of coolies could be sent annually from Japan to Canada. Now as many will be sent as can pay the price. A great influx of Japanese has already begun into British Columbia.

TO SAVE TIMBER WOODS.

Old Settler's Method of Solving Re-forestation Question.

The subject of re-foresting cut-over lands is becoming one of the most important in Canada. It is a question of national importance, and it is one which has given this matter considerable attention.

For many years past I have been trying to impress on the authorities the fact that the question of re-forestation is simply a matter of burning all the evergreen brush and logs and lumber.

The fact that tens of thousands of acres of land, practically worthless for agricultural purposes, but specially adapted to supply the world with pine, juniper and spruce, are now a large and barren waste, owing to simple neglect, is a sad sight.

It is no pity that the people of this country have in their hands a power which they have not used, because the power of the idol of their heart, because they believed he had betrayed his trust. Now what have we to-day?

There are some men, such as Sir Wilfrid Laurier and Mr. R. L. Borden, who are absolutely above all thought of wrong. They, however, are not the whole Parliament. Now how are we to wipe out this evil?

By individual effort and by exercising our vote and our influence for the return of men of honor and uprightiness.

SHORT TOMATO CROP.

Much Wheat Killed and Fruit Trees Backward Through Cold.

This has been a very disappointing month to fruit-growers of the Niagara Peninsula. Owing to the remarkably cold weather in April, fruit trees, vines, etc., are not in good condition as they were a month ago.

The fruit trees, owing to the unseasonable weather, are very backward in growth, though apparently not otherwise harmed, the growers say, and wheat around here looks decidedly bad.

The cold nights during the past week are what killed the wheat, for in the early time the weather was comparatively mild, while at night there was heavy frost.

Hundreds of acres of wheat will be plowed up around here, says a prominent grower to your correspondent, and he says: "Then the weather has been so dry of late that grass is decidedly backward, and the farmers are seriously handicapped by lack of pasture for their cattle. This has caused high prices to be phenomenally high for this time of the year."

Many New Arrivals.

The number of immigrants who came into St. John, N. B., during the season which ended with the arrival last week of the steamship Montreal Antwerp, which met her at 30,000. The list is not yet tabulated, but it is known that the C. P. R. Liverpool boats brought over 16,000.

Then there is the great number of passengers arriving at St. John during the winter of 1905-6 was about 17,000 so there is an increase of upward of 10,000 for the season now at an end.

PLUM RIVER LEAD AND ZINC MINE.

This MINE is situated on the Lead and Zinc range running across the north-western corner of the state of Illinois. You can leave Chicago a.m., and return same day, and have 54 hours at the mine.

The owners are not mined men, neither are they paupers, but they are decent, honorable men.

Development work for three months past has revealed large deposits of Cog and Sheet Lead, and from present appearances it is within six weeks.

If YOU are interested I will furnish fuller particulars. I am offering a limited number of \$1 shares for twenty-five cents each, until further notice, in this paper. I will allow one week to inspect the mine, and return your money, if you are not absolutely satisfied with your purchase. I will not sell less than 500 shares to one person. The mine is clear of debt and has an area of 215 acres. Apply at once by mail or in person to

M.P.'S SWORE TERRIBLY.

Used Torrent of Oaths and Blasphemies Says Mr. Blackstock.

"I stood in a hotel some time ago whilst a lady was signing the register, and at the same time I heard a torrent of oaths and blasphemies proceeding from some members of the House of Commons. So long as we allow that to go on, so long will we be in the greatest risk of destruction."

Mr. George Tate Blackstock, K. C., made this remark in the course of an address delivered recently before the Canadian Club, Toronto, on "Same Tendencies."

"Democracy works better in Great Britain than in any other country on earth, because it is an evolution, and the old grandee system which governed at one time has been broadened out and has become democratic, and you have an aristocratic governing body, which at the same time that body is in constant touch with the democracy."

He proceeded to point out how the House of Lords, although aristocratic, was yet a characteristic of the present age, and that because the present age is an age of industry, perseverance and ability rise to a seat in that high body, and many had so risen.

In 1876 the people of this country rose in their might and hurled from power the idol of their heart, because they believed he had betrayed his trust. Now what have we to-day?

There are some men, such as Sir Wilfrid Laurier and Mr. R. L. Borden, who are absolutely above all thought of wrong. They, however, are not the whole Parliament. Now how are we to wipe out this evil?

By individual effort and by exercising our vote and our influence for the return of men of honor and uprightiness.
