evidence of wrongdoing in connection with the administration of the liquor license-system. They returned reporting that they had gone back five years, Who is this Courtney recommended particularly over Hon, J. R. Stratton's term, and could find none. One can imagine the government and the commission saying, "Go out again, even if you go back ten years, we must put ome evidence in before the commission of wrongdoing." Again the scouts go orth, again they return and report that everything appeared to have been properly conducted, and no go-betweens, lawyers or others were allowed to interfere unless upon strictly legal work. Then there is consternation. Ten would have saved even Sodom and Gomorrah. but ten years back does not save the provincial secretary or the premier from their "We'll show you" rash threat on the floor of the House, (Applause.) True, they always did, treating the Back again the scouts are ordered and this time they are given a fifteen year limit. "Go back over the last fifteen years of Liberal rule, but find some evidence of crooked work you must. their brows and redoubled determination. In vain they search, not one transaction is found wrong in the long period of fifteen years-no crooked work whatever. (Hear, hear.) Again they return crestfallen and empty-handed. The government now have reached the point of desperation. "We must have evidence of something that looks at least shady." "Yes, an eye for an eye, a tooth for a tooth, life for life, and we must have mud for mud." "We some to throw at the other fellows." And so by going back a full twenty years they bring some evidence of a subscription by license holders, and thus crestfallen they attempt to answer the "We'll show you" threat made on the floor of the House. Ask for the brand-

Address MRS. M. SUMMERS BOX H. 11.

THE LARGE DOUBLE FEED DOORS

on the Sunshine furnace provide an opening deep and wide enough to admit great rough chunks structed furnace. It of wood that would either have to be wasted, or chopped up for an ordinary furnace.

As for putting coal in the Sunshine, why, it's the easiest thing imaginable!

Such a generous opening would be next to impossible to miss. And you can easily deposit the coal in any spot you desire.

After you have experimented with small feeddoors, and hit the edge of the door frame a few

times, you will recognize more completely the ease and advantage of the Sunshine method. The illustrations hint at the difference.

If you will examine the fire-pot of the Sunshine you will notice that the sides are straight up and down.

On many furnaces the fire-pots slope, forming a rest on which the ashes accumulate.

As ashes are non-conductors of heat they prevent the fire-pot from radiating as much heat as it should; they clog up the draft and deaden the fire.

But the Sunshine fire-pot is a wonderful radiator of heat. No ashes can cling to the straight, sheer sides of its fire-pot. The live, red-hot coals are always snug up to them. There is nothing to prevent the radiation of every unit of heat produced by the fuel.

The Sunshine is the most scientifically and perfectly con-

radiates most heat with less consumption of fuel. It is the easiest-managed, cleanest, greatest labor and fuel economizer you can buy.

If your local dealer does not handle the Sunshine, write direct to us for Free Booklet.
