ASCENDING WILDERNESS RIVER IN NORTHLAND BY PIROGUE.

"Dug-Out" Makes Model Craft for Navigating Shallow Streams—Country Teeming With Moose—Caribou and Black Bear Afford Sport—Discomforts of Wild Fowl Shooting—Some Grand Scenery.

There are varied methods employed in traversing the Canadian Northland, all of them fascinating enough to those who appreciate the wilderness. But have you ever ascended a wilderness river by "pirogué"?

### BERMUDA

Summer Excursions, \$25 and upwards, by the new Twin Screw SS. "Bermuda," 5,500 tons. Sailing from New York every alternate Wednesday, commencing 5th June. Temperature cooled by sea breezes seldom rises above 80 degrees.

### Synopsis of Canadian Northwest HOMESTEAD REGULATION.

Any even numbered section of Dominion Lands in Manitoba or the North-West Provinces, excepting 80 and 90, not reserved, may be homesteaded by any person the sole head of a family, or male over 18 years of age, in the eastern or western section of 160 acres, more or less.

### Submarine Phones.

Many vessels on the great lakes are being equipped with wireless submarine telephone apparatus, by which danger signals can be received in time of storm or fog, and other danger points the Government maintains lightships, or buoys equipped with big bells, which are automatically rung during thick weather. It frequently occurs, however, that during storm and fog these warning signals are not heard, and as a result vessels go ashore.

### LONDON "BUS."

Favorite Vehicle of British Metropolis Severely Criticized.  
Did you ever see a fat man losing ground as he runs to catch a train? Probably if so you have seen the most humorous equivalent of the speed of a London omnibus. The London omnibus—or "bus," as it is commonly termed—is not a thing to be considered lightly. There is something so solemn and awe-inspiring in its steady lack of speed that words fail the passenger who fails would hurry; and anyway his thoughts coast have no legitimate expression under existing laws.

### DIAMONDS IN CANADA.

Richest Field in the World May Be Developed in Great North Land.  
According to the opinion of scientists and experts northern Canada is destined to become the greatest diamond producing country in the world, while after railway communication has been established, be developed in the great north land. At different points important finds have been made by prospecting parties, and the fact that vari-colored natural carbon gems, white, yellow and black, have been found scattered over a wide area, is held to indicate that the north, that point, wherever it may be, whether in Ontario territory or Quebec territory, is so rich in diamonds as to warrant the expenditure of considerable money to say, would be the mother lode.
