DESCRIBED BY VARIOUS **EXPLORERS**

During a Polar winter the average thickness of ice on the ocean when no storms or strong tides interfere eaches six feet or more. Nansen There is really no warm season. Even quent, while winds bring low tem-peratures. Nevertheless, the summer graphy" as having clean, pure, crisp air, free from dust and with little

The monotony and darkness of the Polar night are decreased a good deal by the long twilight, due to the high tures. The sun actually appears and disappears some days before and after the times which are geometrically set for the change. Light from moon and stars, and from the aurora, also relieves the darkness. Optical phenomena of great variety, beauty, and and less brilliant in the Antarctic

than in the Arctic. Sunset and sunrise colors within the Polar zones are described as being extraordinarily brilliant and impressive. Thus the rawbacks, is in some respects a easant and healthful season. But the Polar night is monoton

essing, repelling. An everlasting uniform snow covering, rigidity, elessness, silence — except for the the ice. Small wonder that the Polar night has sometimes unbalanced men's minds. The first effects are often a strong desire for sleep, and in- Lieut.-Col. Cruikshank, who undoubt ifference. Later effects have been edly knows more of the history of sleeplessness and nervousness, tend- the war on the frontier than any othing in extreme cases to insanity, anse- er living man.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical will smile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "dream," a flash in the pan," "a bubble," somebody was 'crazy'; but now it is different. These crazy men are now classed among the smartest and ke enest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for mining properties now known to us tending from the Montreal River striking it rich" never stopping to subscription we appeal to the good and other properties which we may ac-through Northern Ontario, eastware hink for one instant that the greater judgment of sensible persons as to its quire for the mutual benefit of all in- into Quebec, and will include proper part of their money never reaches the vestors in this Company.
