

York Ginger Ale

is made of ideally pure York Springs Water and sugar, with pure vegetable aromatics and Jamaica ginger-root.

The quality of the ginger and aromatics used accounts for the spicy pungency, the fragrant aroma, and the delicious flavor of York Ginger Ale.

But all ginger ale doesn't owe its flavor to ginger root. Too much of it gets pungency from cayenne pepper (capsicum).

Too much of it has the harsh, corrosiveness of vitriol, instead of the healthful acidity of lemons.

Some ginger ale is sickly-sweet with saccharine. The use of saccharine is prohibited in those countries where pure-food laws are enforced.

You run risks when you drink cayenne-peppered ginger ale—and the more of it you drink, the dryer your throat gets.

You run risks when you drink ginger ale dosed with glucose or sugar-substitutes,—upsets your digestion, affects your kidneys.

But you run no risk when you drink this pure, honest, wholesome York Ginger Ale, though you pay about the same for it as for spurious ginger ale.

York Ginger Ale

Is better—yet costs no more

Made of York Springs Water and purest ingredients, under conditions of scrupulous cleanliness. Ask for York Aromatic, York Sweet, or York Dry (not sweetened) Ginger Ale.

Ideally Pure York Springs Water is the basis of these beverages: York Springs Water (natural), York Sparkles (York Springs Water charged with purified carbonic gas), York Ginger Ale, York Saraparilla, York Soda, York Potash Water, York Aperients (the perfect laxative).

Advertisement for The Color of Your Blood. Demotes exactly the condition your body is in, but it requires a sharp and penetrating eye to discern it.

ARE NOT BACHELORS

FROM CHOICE SAYS WRITER OF NON-BENEDICTS.

Some Girl Threw Them Over, Shattered Their Ideal, and They Refuse to Enter Matrimony.

More men turn to bachelorhood on their first refusal by the girls they love and ask to marry than would be easily imagined in this unsentimental age.

But it must be remembered that this first fancy in a young man's life, when it is strong enough to steer him to matrimony on a small salary, is one of the very strongest impulses of his life.

And usually one of the most generous and finest. Turned back into the heart, soul, brain or wherever first love is, it frequently becomes a destroying influence.

But in most cases it turns the unselfish impulse to provide a home for two out of his small income into a more selfish channel. He sets up as a non-marrying man.

This, whether he is a sentimentalist who may suffer from being thrown overboard, or a practical fellow who can meet the matter philosophically, telling himself that there are other fish in the sea.

He will never be so quick to fall in love or so eager to marry again. He will quite likely go in for business success, anxious to eliminate the possibility of his being refused again because his purse is not big enough.

Hurt pride makes men bachelors. The selfishness that sets in with condition is only a secondary symptom. Turn back an unselfish impulse, and it will always become a self-love one.

Let us give men the belief, when they offer themselves to us for life, that their money is more important than they are and they will set out to make money, and women will never count for as much in the scheme of their lives again.

Girls never reckon with these facts. When they refuse a young sweetheart because he is poor, they fancy a Prince Fortunatus, who is to come along by the roadside and pick them out of the factory or office or shop to set them on a throne.

So women go on mooning and idealizing all through life, marrying over-mannered nonentities, posers and rich vulgarities rather than men. They are always waiting for a man to come along, with a higher level. After his address he was talking with his hostess. "I hope the day is not far distant, my dear Mrs. Blank, when you will exercise the voting power," he said.

A higher level, not particularly anxious, was the calm response. "I don't believe it's worth very much. Mr. Blank says that ten dollars was all that some men get in the last Dominion election."

During a brief ocean voyage near the coast of Newfoundland, one of the passengers was so seriously disturbed that he was sure his death was approaching. He was so melancholy in his firm assurance on the subject that another passenger said to him, half-facetiously: "Well, have you any wishes regarding your remains?"

The sufferer, regarding him languidly, "I don't believe," he said, faintly, "that there's going to be any remains."

The Little Peach. Express Field, 1890. A little peach in the orchard grew—A little peach of emerald hue; Warmest by the sun, and wet by the dew, it grew.

One day, passing that orchard through, The little peach dawned on the view Of Johnny Jones and his sister Sue; Warmest by the sun, and wet by the dew, it grew.

Up at that peach a club they threw—Down from the stem on which it grew Fell that peach of emerald hue. Mon dieu!

John took a bite, and Sue a chew, And then the trouble began to brew—Trouble the doctor couldn't subdue. Too true!

Under the tart where the daisies grew They planted John and his sister Sue, And their little souls to the angels flew—Too true!

What of that peach of the emerald hue? Warmest by the sun, and wet by the dew? Ah, well, its mission on earth is through. Adieu!

Your Blood Filters. The kidneys are a mass of tiny tubes through which the blood must constantly filter if you are to live. Often these tubes become inflamed or clogged. This condition must be promptly relieved or disease will result.

Peck's Kidney and Liver Pills heal and cleanse the little filters and make the kidneys sound and active. In boxes, 25c. For sale only at Wade's drug store. Money back if not satisfactory.

Hot Weather Advice. Don't patronize the soda fountain too often in hot weather. Don't fill your stomach with aerated waters, sweetened with syrups, most of them adulterated. Saccharated beverages are not good for you though they may be very palatable.

You had better suck a small piece of ice. But best of all—drink a glassful of sour buttermilk. Your head will be clear, your thoughts will be clean, your body will exude sweet perspiration. Sweat all you can in this torrid weather. A good sweat is worth all the medicine a doctor can tote in his satchel. If you don't sweat you will in all probability die. God pity the poor invalid who has to take medicine to cause sweat. The Lord decreed that we should sweat; so sweat and sweat naturally. And after you sweat—wash.

Celluloid Starch

Just send us your name and address on a post-card and we'll mail you a Painting Book for the little folks and a quarter-pound package of Celluloid Starch. That means fun for the children and satisfactory starching for you.

Celluloid Starch requires no boiling. Gives a perfect finish to the clothes and never makes the iron stiff. Write to-day for this free book and sample.

The Bradford Starch Works, Limited, Bradford, Ontario.

ALCOHOL—AFTER SEPTEMBER.

May Be For Sale at 8 Cents the Gallon.

New York Times. Prof. Robert Kennedy Duncan contributes to Harper's Magazine for August a discussion of "The Problems of Industrial Alcohol." He closes with a reference to the patented processes of Simonsen and Clasen for converting cellulose into alcohol. If it can be accomplished according to the inventors' claims, Prof. Duncan predicts that in due time it may be possible to buy alcohol, unit for leverages, at from 8 cents to 10 cents a gallon.

Even at 30 cents a gallon, which Prof. Duncan thinks may be its retail price within a year or so, alcohol can still form a illuminant and heating agent. Moreover, certain industries which now depend upon the highly taxed ethyl alcohol will expand considerably when the duty is lifted from the product.

As a solvent and chemically active agent alcohol has labored under a tax of \$2.00 a gallon. It cuts shellac, which "literally paints our civilization," Prof. Duncan estimates a gain of tens of millions of dollars to industries which use this finisher, as in manufactures of furniture and all wood products.

But this is only one use in the many important industries, working under an aggregate capital of \$500,000,000, and employing 300,000 workmen, whose operation must be vastly extended by the unrestricted removal of the tax.

Not Worth While. Canadian Courier. A Canadian speaker, anxious to win feminine favors, expressed himself fervently in public in favor of granting the franchise to women, declaring that the influence of the skirted sex would purify elections and raise politics to a higher level.

After his address he was talking with his hostess. "I hope the day is not far distant, my dear Mrs. Blank, when you will exercise the voting power," he said.

A higher level, not particularly anxious, was the calm response. "I don't believe it's worth very much. Mr. Blank says that ten dollars was all that some men get in the last Dominion election."

During a brief ocean voyage near the coast of Newfoundland, one of the passengers was so seriously disturbed that he was sure his death was approaching.
