# 84 MEN KILLED BY FALLING BRIDGE

## A Terrible Calamity at Quebec—New Bridge Fell into the River.

Quebec, Aug. 30.—One of the most terrible disasters in the history of bridge building in America, took place yesterday afternoon at the Quebec bridge five miles up the river from this city, when the south anchor column and the 800 feet of the cantilever span projecting from it over the river collapsed, and came down with it scores of workmen who were engaged in the operations. The bridge structure is the greatest of its sort in the world, and the survivors of the disaster speak in terrified tones of the fearful sight and sound, when thousands of tons of steel, with a grinding noise quite indescribable, crashed down into the river. The disaster was utterly unexpected. At one moment the men were enjoying the breeze and the sun and riveting them, and at the next the vast mass was hurtling down with the poor fellows clinging to it or crushed beneath the wreckage long before the river covered them.

The total number of men killed ranges from eighty to over ninety men, the greater number being citizens of the United States and employees of the Quebec bridge company, the contractors in the vicinity of the disaster. A fire rescue corps is at work recovering the dead and aiding the injured. Sixteen bodies have been recovered. Two families have lost three members each, and in two homes three dead bodies lie side by side, while in one of them a fourth member of the family lies injured. The bulk of the injured are being transferred to the hospital at Levis.

The cause of the disaster is as yet unexplained, but survivors agree in saying that it occurred at the moment when a locomotive with three cars of steel went out upon the bridge.

According to latest reports this calamity will not interfere with the navigation of the St. Lawrence channel. Since the bridge fell vessels have already been sent through to ascertain the exact situation. The loss is estimated at \$1,500,000.

**Time of The Fall.**  
 The bridge fell exactly at twenty-three minutes to six Thursday evening, just as many of the workmen were preparing to leave. It was, however, so horribly effective an warning that the lives of the men engaged on it that very little is known as to how the disaster happened, and those who are left behind are so completely bewildered by the horror of the situation that they are unable to do more than recall the fact that the bridge collapsed, and this was rapidly reaching the zenith of the immense steel arch which was to span the river, and the massive steel structure reared an arch, with no supports but the piers from the shore and one pier erected in the river a hundred or more feet from the shore, while the outward extremity was 150 feet above the water.

**Shook The Neighborhood.**  
 Suddenly those on the northern shore saw the end of the half arch bend down a little and a moment later the whole enormous fabric began to break slowly at first, then with a terrific crash, which was plainly heard in Quebec, and which shook the whole countryside so much so that the inhabitants retired to their homes, thinking that an earthquake had happened.

At the time of the collapse it is estimated there were ninety-two men working on the bridge. Of these eight have been rescued so far, being picked up immediately after the disaster by boats. Of the other eighty-four so far sixteen have been recovered, all dead, and it is feared that all the rest or most of them are buried either drowned or crushed by the falling girders.

The horror of the situation was increased by the fact that there were a number of wounded men pinned in the wreckage near the shore. A long groan and shriek could be plainly heard by the anxious crowds, waiting at the water's edge, but nothing could be done to rescue them or relieve their sufferings, as the slightest degree of movement would have caused the bridge to fall again.

**Many Are Bereaved.**  
 The awful completeness of the catastrophe seems to have paralyzed the sensibilities of everybody near the place. There is scarcely a family in the villages of St. Romuald and New Liverpool that has not been bereaved, while in some cases five and six members of a single family have been killed. Driving through the villages from almost every house are heard the sounds of lamentations of women. Most of the men are gathered around the approaches to the piers where the bridge was secured to the shore, in order to rescue those who are still alive, and others waiting around for news, or helping to dispose of the bodies of the dead as they are found.

The disaster has produced an extraordinary effect in this city, and is regarded as a national calamity. A few minutes after the crash was heard here a telephone message came from Sillery that the whole southern half of the bridge had fallen into the river. For a long time people refused to believe that such a thing was possible, and crowds gathered around the newspaper offices waiting for over an hour. Then the original report was confirmed, with the addition that practically every man working on the bridge at the time had been killed. It was known that there were about an hundred men at work on this part of the bridge, and the tidings caused the most intense anxiety, which gradually grew to a despairing certainty that one of the most terrible disasters that

## ASYLUM CHANGES.

**Radical Changes Suggested By Report of Officials.**  
 Toronto, Aug. 30.—Medical changes in the Ontario asylum system may follow the report of Hon. Dr. Willoughby, Dr. Clarke, superintendent of the Toronto asylum, and Dr. Ryan, superintendent of the Kingston asylum, who have just returned from Europe, where they visited several important asylums on behalf of the government.

The method of treating mental diseases at Munich, Germany, was a subject of special study, inasmuch as it is proposed to adopt somewhat similar methods here. Munich has a clinic department in one of the hospitals where mental diseases are treated at their inception. In the majority of cases it has been found unnecessary to send the patient to the asylum. If such a plan is adopted in Ontario, accommodation for a hundred patients would be provided for in the new Toronto general hospital, as well as perhaps in other cities. This would mean a radical rearrangement of the work of the other hospitals, and pave the way for the removal of Toronto asylum, which has been decided upon. The commissioners have not sent in any report yet.

## LIQUOR SOLD TO INDIANS.

**Information Laid Against W. H. Darcy of Burleigh Falls.**  
 Toronto, Aug. 30.—The license branch of the provincial secretary's department has laid information against Mr. W. H. Darcy of Burleigh Falls, Peterborough county, for supplying liquor to Indians, this being the second offence. Darcy was recently convicted and fined \$50 and costs, although the liquor was supplied by his housekeeper.

The Indians created a scene on a Stony Lake excursion steamer, throwing the women and children into a panic, and were subdued by the white passengers and the crew.

## BOOKMAKERS FINED.

**Magistrate Cruickshank Deals Out Justice at Fort Erie.**  
 Fort Erie, Ont., Aug. 30.—The nine bookmakers doing business at the Fort Erie race track, who were charged with keeping a common gambling house, were yesterday found guilty before Police Magistrate Cruickshank of Niagara Falls, and were all paid, but the bookies will appeal the case. The convicted men are John Waller, Frederick Lubin, James McCallum, Roy Shipman, John Guenther, "Stony" Abrahams, "Kid" McClure, Benjamin Falke and Barney Wolfe. All are citizens of the United States.

## MAKING MONEY.

**Surplus of \$400,000 For Year Ending June 30th.**  
 Ottawa, Aug. 30.—The financial showing of the Intercolonial railroad continues to improve. A \$400,000 surplus was earned during the year ending June 30th. The year before the surplus was only \$62,000, and the year before that there was a deficit of \$1,500,000, and in 1904, the deficit was \$900,000. During the nine months ending March 31st, which composed a new fiscal period, the Intercolonial earned a surplus of \$219,000.

## Had To Come To Terms.

The captain of a schooner plying out of this port, got himself into a little trouble with the union men here, a few days ago, and as a result the schooner was tied up for a while. In the spring the skipper signed a crew, and if they were satisfactory he was to keep them for the season. A few days ago he paid them all off for no apparent reason, and this step was objected to by the Lake Seaman's Union. They would not allow any union man to take a berth on the ship, so the captain was forced to come to their terms or tie up for the winter.

## Governor-General Busy.

Toronto, Aug. 30.—His Excellency the Governor-General had a busy day yesterday. After luncheon at Government House he witnessed a polo match between Toronto and Montreal, and later laid the corner-stone of a new library in connection with the Canadian Military Institute. In the evening he was the guest of the Toronto Hunt Club, and left in his private car for Ottawa by the C.P.R. train last night.

## Went Under The Wheels.

Brookville, Ont., Aug. 30.—In attempting to stop from the rear end of a freight car at Cardinal, Theodore Shipman, a Brookville brakeman, lost a portion of his left foot, which went under the wheels. The injury was done at Cardinal and Shipman was brought to St. Vincent de Paul hospital, where about half the foot was amputated by Dr. Robertson. The patient stood the operation well.

## His Eye Injured.

Charles Gungy, an employee of the locomotive works, suffered a severe accident, while at work last evening. He was working on a lathe, when a small particle of steel flew up into his left eye, and struck the eyeball. The injury was attended to by a specialist, and it is not thought that he will lose his sight.

## Fall Informations.

Provo, Brock street, has received three cases imported goods, great variety. His \$15 suit made to order beats anything of previous years. Wear and fit guaranteed.

## Labor Day Monday.

Cheap excursion to Cape Vincent, 2 p.m., Home early, Only 50c.
