McClary's
The easiest way to remove ashes from a range is with an ash pan—the Pandora method (see illustration). Such an extra large ash pan is provided with the Pandora that it will contain more ashes than will accumulate in one day.
All the ashes are in the pan, too, because they are guided there by flanges attached to either end of the fire-pot.
Easiest, cleanest, quickest, is the Pandora way.
With the scraper and pan provided with every Pandora it's merely a matter of a minute or so to clean out the dirt in the Pandora flues.
Less dirt accumulates in Pandora flues than in ordinary flues, because they are wider and deeper, with no bolts, projections or crevices to catch the dirt, consequently you need not clean them out so often.
Saves a lot of labor, does the Pandora.
If your local dealer does not sell the Pandora write direct for Free Booklet.
S.O. to Ideals.

London, Toronto, Montreal, Winnipeg, Vancouver, St. John, N. B., Hamilton.

This Week
Will be the best time to select your New Fall and Winter wear. Our stock is low complete, but will not be very long, as many ladies already are assisting long eyes at some of the lines. They cannot be duplicated in this city at the low prices we are quoting.

Dress Goods

Are in evidence this week. Piece after piece the very latest Paris ideas are now in stock ready for your inspection.

All kinds to suit all tastes.

5c. to \$1.50 a Yard.

W. F. Gourdier & Shaw

"Stolen Fruit is sweet."—so is Malta-Vita.
Malta-Vita freshens life—gives health—makes muscle—furnishes brains without taxing the stomach.
And then—that crispy freshness—and that "nutty" flavor is always delicious.
The best cereal that ever went onto a table.
10c, all grocers.

New Fall Hats
We have received this week all our "New Fall Hats." They are all in Show Cases now. Three Specials:

"The Waring"
The Best \$2.00 Hat it is Possible to Buy.

"The King Hat" at \$2.50.
This Hat is now famous in Kingston, and we'll guarantee it to give good satisfaction.

"The Knickerbocker Hat" at \$3
This Hat has an admirable feature of fitting the head comfortably at once.

There's something about our Hats that some people call "individuality" and "character"—we say it's the "know how" in buying and the excellence of the material that gives them the distinctive air that all well-groomed men demand.

Like to Show You the New Hats.

HORSE THIEF CAUGHT
TAKEN FROM GANANOQUE TO BELLEVILLE.
A Two-Headed Adder—Factories Cannot Resume Work For Another Week—Police Court Case Settled.
Gananoque, Sept. 2.—The case of Charles Genge, market gardener, against four young men, which came up before Police Magistrate Philip Henshaw, on Thursday, and was adjourned until Friday, was decided today, the young men guaranteeing to pay Mr. Genge the sum of \$40 as damages for the offence.
Some little excitement was caused in town on Friday afternoon by the arrest of a young man charged with horse-stealing. The misdemeanor was perpetrated about a year ago at Belleville and the horse sold. The young man arrested worked in town last winter for George Genge, the proprietor of the Arlington hotel, and gave his name then as Harry Williamson and has for some time past been employed on Grandis and Hain Islands in the Gananoque village, having located his man in this section communicated with the local constabulary and on Friday afternoon Chief Ryan and Constable Thompson spotted the horse entering a barbershop on King street. Chief Henshaw was at once notified and dispatched Sergeant Patrick Ays to conduct the prisoner back to Belleville. His real name is said to be Harry Raymond and his home to be in the vicinity of Napanee.
Constable John Thompson has been appointed constable officer by the board of education.
The report which have been going all under the direction of the Water Power company have not as yet been completed and although the water is expected in for use by the middle of next week, it is possible that it will be a week longer before work can be resumed in the town factories.
The steamer America, with a large excursion party on board, passed in sight of the town this morning but on account of some difficulty she had with government officials could not call.
Robert Allan, Osborne street, has displaced his residence there to John Gray of Leeds township. Mr. Allan, who has resided here for some ten years, purposes leaving about the end of the month for New Westminster, B.C., to Ideals.
Mrs. Thomas Storrett and family, who have been visiting her sister, Mrs. William Salter, James street, left in her auto-car for Montreal and Quebec where she will take up her daughter, Miss Edna, and travelling companion, who proceeded here by a couple of weeks.
Hon. S. C. Wood, of Toronto, spent a short time in town during the past week on his daughter, Mrs. C. V. Ketchum, at her summer residence on the river front, just west of the town. Mr. and Mrs. David A. Doherty, Brock street, who have been here for several months, left during the past few days for Guelph, where Mr. Doherty has accepted a situation.
Miss Ann Tullock, Elm street, is spending a short time in town with friends at Wesley Heights, who have been spending the summer here with friends and relatives. Left on Friday for San Francisco, where he has been treated for several years, was the Misses Maura and Laura Harris, Stone street north, are spending a week with friends in Toronto and Niagara Falls.

Record of Murder.
At present we are having about nine hundred murders a year, which is from eight to twenty times as many in proportion to population as such countries as England, France, Germany and Japan have. Why all this unwarlike killing? We have about nine million negroes and a great many newly imported foreigners. The negroes kill pretty freely. Out of 7,386 persons charged with homicide in the country in 1893, 2,739 were negroes and 1,213 foreign-born whites. These two groups did four-sevenths of the murders. That left 2,608 murders to be distributed among about forty-five millions of people. It will probably be found that the ratios of 1909 were maintained in 1900. In recent years we have had a large immigration of Italians, including, it would seem, a good many that are not desirable. The Italians are very useful, and also very violent. But average Italian do not help much in keeping down the murder rate. They have very obstinate ideas on that subject. We read that only one European country has ever had a worse murder record than ours, and that is Italy.

Called It Tedious.
Lonsville, Ky. (Special Correspondent)—Teges, a little town in Clay county, Ky., got its name in rather a curious way. When a new post-office is to be established it is customary for the government to permit the people who are interested to choose the name.
"A meeting was called for this purpose and names suggested, harking away back to Grecian mythology and down to Mary Ann, and the crowd was still quarrelling over a choice when the county judge got up and remarked: "This is tedious. It is 11 o'clock and I'm going home."
"That is the very name we want," shouted several in a breath. "We will call her Tedious."
And so it was agreed, and the clerk of the meeting was instructed to so advise the postal authorities, but after being a phonetic speller he wrote it "Teges."
Price's chocolates are made fresh every day.

LAMP OF THE FUTURE.
Light Without Heat—Probably a Gas or Vapor.
Many attempts have been made to increase the efficiency of our present electric incandescent lamps, by a writer in the *Cassell's Magazine*, P. 11.
Light is only a by-product in all known illuminants, for the production of light depends on incandescence, that is, the shining of hot bodies, because they are hot.
Such a hot body radiates a variety of waves, but very few of these are useful as light. By increasing the temperature, below that of only long heat waves appear. By increasing the temperature the percentage of useful light rays increases.
As long as we only know the way to produce electric light by incandescence we can only increase its efficiency by increasing the working temperature.
Naturally there must be a certain temperature where the percentage of visible radiations reaches its lowest point, and this is supposed to be between 4000 to 5000 degrees Centigrade. But even at this temperature the efficiency only amounts to about 10 per cent.
There is an absolute limit in lighting by incandescence.
The familiar electric incandescent lamp consists of a glass bulb containing a filament of carbon. The carbon is heated by the electric current and forms our hot body. Now, carbon is apparently the most refractory of materials, its boiling point being about 3500 Centigrade.
Unfortunately we cannot use such a high temperature in the carbon incandescent lamp, for the limit is not the boiling point but the temperature at which the evaporation becomes so great as to limit the life of our lamps. The temperature at which our carbon incandescent lamps is about 1800 degrees.
The efficiency of the incandescent lamp can therefore be increased by using a material which has a lower vapor temperature at a higher temperature.
Nernst was the first to devote his attention to the problem and brought out the well known Nernst lamp. The filament consists principally of zirconia magnesium oxide and a small amount of the oxide of the yttrium group.
Great hopes were entertained when the Nernst lamp appeared on the market, but these have not been realized, for the lamp had a great disadvantage which has never been corrected, namely, the filament does not conduct and consequently does not light up as ordinary temperatures.
The success of these experiments led scientists to turn their attention to other rare metals, of which the following have been used with success: tantalum, tungsten, cerium and iridium.
The Nernst lamp has a great advantage in that it does not heat the room, but it is the most successful of all metallic filament lamps and thousands are now in use in London alone. There is no doubt that this lamp will be the lamp of the future. For as shown in the beginning of this article we are dealing with incandescent bodies for light production.
Heat, although capable of making a liquid or solid incandescent cannot here for several reasons, but merely increases its pressure. We can, however, set gas molecules in vibration by chemical reaction or electric spark, such as we know in the case of the Nernst lamp, through a vacuum tube.
Theoretically, there is no limit to the efficiency of a luminescent gas. Within the last few years the best results have been obtained with the Moore vacuum tube illumination, and this method of light production has a great future before it. The gas which will have a lamp giving light without heat and the probabilities are that this will be either a luminescent gas or vapor.

EXILED PRINCE FARDONED.
Joachim Albrecht, Who Wed Actress.
Vienna, Sept. 3.—The New Free Press states that the Kaiser has pardoned Joachim Albrecht, whom he recently banished to German Southwest Africa, to punish him for his love affair with the actress Marie Sailer.
The Kaiser wishes to return to Berlin in September. Immediately after the autumn manoeuvres he will be reinstated as a major in the army.
The full details of the amazing love affair of Prince Joachim Albrecht with Marie Sailer were published last November.
In order to make herself "noble" and a fit partner for the Kaiser's cousin, she first married Baron von Liebenberg, a needy Austrian aristocrat, in a Brighton registry office. The baron was to receive \$3750 for the marriage, and a further \$1750 when a divorce, which was arranged, had been obtained.
When the divorce against the baron for a divorce had been obtained, a marriage broker, who had the business in hand, refused to pay the baron. The Kaiser, who was very angry, married Prince Joachim Albrecht to proceed to German Southwest Africa.

Sagacity Of An Arizona Dog.
A correspondent sends the following interesting bit of testimony: "In connection with the animal controversies" being discussed by the prominent naturalists and nature-writers of the country, I am in support of Dr. Hornaday's belief in the reasoning powers of animals that they do reason from cause to effect.
"Mr. William Roberts, who drives the stage from here to Quartzsite has a dog who accompanies him on his trips. When the dog gets tired of running along beside the stage he jumps into the stage between the seats. When the stage is moving slowly he jumps into the stage from the side, just clearing the rear wheel, but when the stage is moving swiftly he jumps from a position a little to the rear of the wheel, aligns on the rear wheel, and the momentum throws him into the stage. It seems as if he has instinct or a natural impulse that led the dog to jump on to the swiftly moving wheel. But when we think of the little we know of the workings of the human brain, is it not too much to presume to analyze that of an animal?"—Harper's Weekly.

HELP WANTED—MALE.
A GOOD GROCERY CLERK, AT Henderson's Grocery.
FIRST-CLASS DRIVER WANTED. Apply to Alex. Tyo, Kingston Building Works.
A BOY TO WORK AROUND BARBER shop and bear the trade. Apply to J. M. Theobald, 297 King street.
BOYS WHO CAN WORK STEADILY, good position. Apply to Gould's Ironing Factory, King St., near Queen street.
SMART BOY TO ASSIST IN MAILING Department, on Monday and Thursday forenoon, and Saturday afternoon. Apply Business Manager, Whig office.
MALE YOCALIST WHO CAN READ music readily. Good voice required. Must be qualified in full. Address "Singer," Whig office.
GENTS—STARTLING HOUSEHOLD invention. Sells on sight. Agents everywhere. Apply to Messrs. G. W. Bradly-Garretton Co., Ltd., Desk "11," Bradford, Ont.
FARM HAND, MARRIED MAN, well-to-do family, capable of taking full charge if required. Able and willing to work. None but first-class men need apply. D. Allan, 245 King street.
FALL SUITS AND OVERTCOATS TO make, also oil suits to repair and clean, pressing and repair work done well, reasonable prices. Call on The Tailor, 131 Brock St., next to Hibby's Livery.
TO-LET.
STORES, OFFICES, SHOPS, PACKING and Drawings. McCamp. 21, Brock street.
A COUPLE OF OFFICES OVER THE G. N. W. Telephone Company's office. Uranian St. Apply to J. D. Welton.
TWO DWELLINGS, NOS. 44 AND 45A Princess St., one large and one small, suitable for rent. Apply 249 Brock street.
ROOMS FURNISHED OR UNFURNISHED, or any part of the house for light house-keeping. Apply to 409 Princess St., opposite University Avenue.
BRICK DWELLING, NO. 181 DIVISION street, twelve rooms, extension dining room and kitchen hot water heating apparatus. Also suitable for rent. Apply Frederick Welch, No. 179 Division street.
FOR SALE OR TO LET.
PREMISES, CORNER KING AND Queen streets, suitable for a grocery store. Will be let in sections to suit small business concerns. The house would make first-class residence home. Also suitable to rent. Apply James Lutzmayr, Carleton Place.

HELP WANTED—FEMALE.
GENERAL SERVANT, APPLY TO Mrs. (Prof.) Ross, 509 Alfred St.
A KITCHEN GIRL, GOOD WAGES. Apply to L. J. Williams, Royal Military College.
GIRL FOR GENERAL HOUSEWORK, in family of two. Apply at No. 2 Wellington street.
A HOUSEMAID, APPLY IN THE evening to Mrs. Howard S. Folger, 55 West street.
A GENERAL SERVANT, NO WASHING. Apply to Mrs. Jersey Taylor, 207 Alfred street.
MAID FOR GENERAL HOUSEWORK, for washing, also a nurse girl. Apply after Sept. 21, to Mrs. E. C. Mitchell, 154 Brock street.
AT ONCE GIRLS TO WORK IN dressmaking department, steady work and good salary paid. Apply to Mrs. Mitchell, 23 Brock street.
YOUNG LADY TO OPERATE A DELICATE machine, in private. Must be neat, careful, earnest, painstaking and educated. Four hours daily. Address "Student," Whig office.
LADY PIANIST; ALSO LADY teacher, who needs no experience. Health, good, and responsibility essential. Must live home. Hours very short. Address "K. V. Z.," Whig office.
LADIES TO DO PLAIN AND LIGHT sewing at home, whole or spare time; good pay; work neat. Give address, charges paid. Stamp for full particulars. National Manufacturing Company, Montreal.
WANTED—GENERAL.
BY A YOUNG MAN, FURNISHED room in vicinity of Court House. Address Box "H.C.," care Whig office.
A JOB CLEANING ASHES OUT OF yards or cellars, or other baggage carried. Prices right. Apply to S. Lytle, General Carier, 85 Main St.
FOR FIVE MONTHS FROM SEPT. 1st, or Oct. 15th, furnished house, or two or three rooms with or without board. Apply Box 42, Whig office.
BOYS AND GIRLS, 14 YEARS AND over, to work in cigar factory, light work, good wages in street. Apply to H. Oberdorfer's Cigar Factory, Ontario St. city.
MAKE \$25 WEEKLY SELLING "THE Law of Financial Success," the book that tells how to succeed and make big money by quantities; everybody wants it. 100 per cent profit. Send 10c for sample and agency. The Publishers Press, 1459 Tuscon Building, Chicago, U.S.A.

WORLD'S WHEAT CROP
ESTIMATED AT OVER THREE BILLION BUSHELS.
Nearly Three Hundred Million Bushels Less Than Last Year—Canada's Production Set Down As 93,500,000 Bushels.
New York, Sept. 2.—The Sun has received the following cable dispatch from Buda Pest:
The official estimates of the world's production of wheat in 1907 give the grand total set between 3,106,130,000 and 3,205,550,000 bushels. By countries the amounts in bushels are as follows:
Great Britain 92,500,000
France 348,300,000
Germany 122,830,000
Austria 62,250,000
Italy 181,500,000
Holland 2,600,000
Belgium 4,180,000
Denmark 13,380,000
Sweden 4,400,000
Norway 5,270,000
Spain 292,000
Portugal 110,000,000
Greece 8,800,000
Egypt 5,070,000
Hungary (including Croatia, Slavonia) 31,170,000
Poland and Rumania 11,000,000
Turkey, European Asia 47,670,000
East India 31,960,000
United States 641,670,000
Canada 93,500,000
Chile 19,500,000
Uruguay 5,260,000
Australia 73,700,000
Algeria 23,500,000
Tunis 6,230,000
Tripoli 4,400,000
Mexico 16,500,000
Japan 23,890,000

MONEY IN RUBBISH.
Glasgow Gets Good Income From Its Sale.
How money may be made from the offal and rubbish of a city is shown in the annual report to the cleansing committee of Glasgow corporation of Superintendent McColl, of that city's garbage department.
At the outset, Mr. McColl states that the estimated expenditure of £422,745 was exceeded by £266,241, an increase really due to three items, the chief of which was created by the exceptionally heavy snowfalls. The extra work in

THE PARAGRAPH PULPIT
Uttarian.
REV. C. W. CASSON, OTTAWA.
Believing the Best.
Believe the best of yourself. Hold to those conditions that result in you to highest position; refuse to entertain the mean thought of yourself. Your character will surely become just as mean as your thought. Believe that your own good, and goodness will be the natural outcome of your thought. Fix your eyes upon the fairest vistas of life that present themselves to you, and direct your footsteps toward the highest mountain peak of the ideal. Learn to think of yourself as one high and holy, and high and holy you will surely become.

Address, Mr. Casson for free literature.

TRICOT
is the food of health and strength. It is Shredded Whole Wheat, compressed into a wafer, and is immeasurably superior to white flour bread, or pastries. It is delightfully satisfying as a toast. Delicious with cheese.
MORE WHOLESOME AND NUTRITIOUS THAN MEAT.
All Grocers—13c. a carton, 2 for 25c.
