North Dakota was strictly enforced, public opinion being behind the governor of the state in the work of enforcement.

He had observed with much interest the operation of the liquor laws in all the operation of the liquor laws in all parts of Canada. In the matter of temperance legislation Canada was far in advance of the mother country, where there was no Sunday closing and no closing on election days. The liquor bill of Great Britain was about \$100

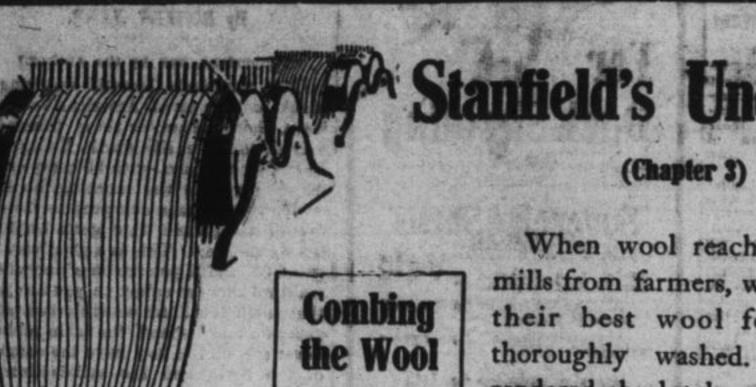

> At the approaching session of parlia-ment the Land Valuation bill, and the Scotch Land bill would be first introduced, after which education and temperance measures would be brought forward. What was proposed in England in the matter of temperance legislation was to grant to municipalities the right of local option, as has been done with great success in Australia and New Zealand, as well as in Canada.

Less than a hundred years ago mis- terms "lady" and "gentleman" is a source mindedness and genial democratic manner and this quick perception of what was fair, and his ready action of putting it in practice, without any putting off or delay. Sir Wilfrid came down to do him honor, and I am sure both had reason to be abundantly satisfied with this apring. He had been aifling for almost a year. Sharp pains in the back and through the hips. Dull headaches and dizzy spells. Appetite poor—nothing through the Lemieux act? Prof. Shortt again being their arbitrator, and a 14 percent. award being given the men, I surely think this award even more than and who was cured by GIN PILLS.

The process and genial democratic manner and this quick perception of what was source for anusement. A prominent Canadian who does missionary services were so rare that few preachers felt the need of suitable hymns to accompany them. On one occasion, Bishop Heber was staying with Dean Shipley, vicar of Wrexham, and there was to be a missionary sermon the following Sunday. On Saturday the bishop was asked to write an appropriate hymn, and, seated at a window of the old windows of the old was asked to write an appropriate hymn, and, seated at a window of the old windows of the old was asked to write an appropriate hymn, and, seated at a window of the old windows. Father Hayes at Dallas, Texas, on the

When wool reaches the Stanfield mills from farmers, who have sent us their best wool for years, it is thoroughly washed. Then it is rendered absolutely unshrinkable.

Then it is COMBED. This process consists in passing the wool through a machine that combs out all the short lengths, weak threads and snarled strands of wool-something like one combs the hair.

After the wool has been combed, all the fibres are the same length and strength. The Stanfield Combing Machines are mighty particular, too. They comb only WOOL-and they comb out everything but the longest, strongest strands.

Most Underwear is made of CARDED wool. Now, carding consists in tearing the fibres into short lengths. Mills, using carding machines, put the whole wool through-short wool, weak fibres, even cotton and shoddy-the carding machines make no distinctions.

The "cream" of the best wool-rendered absolutely unshrinkable by the Stanfield process instead of being "eaten" with lime-combed instead of carded-knitted with a lock stitch that prevents raveling-is it any wonder that Stanfield's Unshrinkable Underwear wears so well, and is so thoroughly satisfactory?
