BIG CANADIAN MEN

TO SPEAK AT ENGINEERING SOCIETY'S DINNER.

A Fine Opportunity to Hear What the Engineers Have to Say—General Notes From the Halls of Queen's.

It is now practically certain that the following prominent men will be the guests of the Engineering Society, at the annual science dinner to be held in Grant Hall next Friday evening: M. J. Butler, deputy minister of railways and canals; C. E. Hault ain, C.E.; Hon. S. E. Parent, president, Quebec Bridge Co.; Dr. Douglas, New York city, America's foremost copper expert; Charles M. Hays, general manager Grand Trunk railway; Prof. Owens, professor of electrical engineering, McGill University; Prof. W. G. Miller, L.L.D., formerly of Queen's, now provincial geologist of Ontario; Prof. Galbraith, school of practical science, Toronto; Prof. McLeod, of the faculty of practical science, McGill University. The opportunity of hearing men who have attained to so high degrees of eminence in their respective spheres of activity is a rare privilege. The value of which the practical science student of Queen's is not slow to appreciate, and the function promises from every standpoint to be a most successful one. Representatives of the city and of the various faculties of the university will be among those who will address the students.

The annual meeting of the Track Club, will be held at the regular weekly meeting of the Alma Mater Society, this evening.

"A Set Purpose" was the subject of a carefully prepared paper by H. R. Kingston, '08, at the meeting of the college Y.M.C.A. in Convocation Hall, yesterday afternoon.

An announcement of considerable importance to many of the students has just been made by the college authorities. St. John's College, Cambridge University, has offered for competition among Queen's students next spring a scholarship of the annual value of $300, tenable for two successive years. The scholarship is open to advanced students of Queen's, and the stipulations accompanying the award are similar in many ways to those of Rhodes' scholarships.

Rev. Alfred Gandier, M.A., B.D., will speak at the Convocation service on Sunday afternoon.

The hockey team officials are not biding their time until autumn has given way to winter. They are seeing to it that all who contemplate turning out for hockey are attending the regular gymnasium classes being conducted by Physical Director Palmer. This is a plausible move, as it will have the very desirable effect of doing away with the needless waste of time which has invariably accompanied the poor condition of the players at the opening of the season.

Invitations for the final year at home next Friday evening are being disposed of with unusual rapidity, and every circumstance points to unprecedented success for that ever popular event.

"Our Place in God's Plan" was the subject of discussion at the weekly meeting of the Missionary Association this morning. Rev. A. Gandier addressed the meeting.

The uninterrupted perusal of college text books, however vast and profound the learning contained within their covers, is not the true aim of a university course. The arts sophomores need not be told this. Last evening they assembled in the old arts building to rest awhile from their arduous labors and grant at least temporary realization to the social instinct which has perhaps been known ere now to manifest itself with considerable emphasis at the sophomore age. A prize was awarded the gentleman upon whose card appeared the largest number of ladies' autographs, and vice versa. The "sophs." refrain from divulging the names of the successful ones, but a little bird is authority for the statement that the number of names was nothing short of appalling.

The final year science students enjoyed an address by Prof. L. W. Gill, yesterday afternoon.

The feature of the Alma Mater Society's meeting this evening will be a debate between the freshmen and sophomore years.

Just Arrived.

What Causes Boils?

Most people say a run-down condition. The actual cause is the invasion of bacteria around the hair folicle. If in poor health the cure takes longer. No treatment is more efficient than Dr. Hamilton's Ointment. It sinks into the core of the boil, destroys bacteria, relieves the pain, dries up the humor, prevents other boils from developing. For pimples, Blackheads, and any other skin disease, Dr. Hamilton's Ointment is simply perfect. Sold by all druggists, in 50c. boxes.

To Buy Quarry Lots.

The city intends buying quarry lots so as to have its own stone supply for the streets next spring. The quarries should give work to a good number of men this winter. Of course the street improvement by-law, for $15,000 must pass in January in order that the lots be bought.

THE SPORT REVIEW

GETTING READY FOR THE HOCKEY SEASON.

There Will Be a Good City League—The Prospects of Queen's—Notes on Various Kinds of Sport.

From the present outlook there will be plenty of teams for an excellent city hockey league this winter. The senior, intermediate and junior should be full up and some good games pulled off. The Royal rink is being fitted up in fine style for the season and most of the games will be pulled off there.

To Play To-Day.

The undefeated Collegiate team clashed with the Maple Leaf bunch at the lower campus, this afternoon. The K.C.I. boys have defeated nearly every junior team in the city, even to Queen's III, whom they easily defeated. Eslie Carter deserves great credit for the way he has put his boys into shape.

"Dick" Wilson In Calgary.

Word has been received in the city from "Dick" Wilson, who went west a few weeks ago. "Dick" has got as far as Calgary and will likely stay there for some time. In all probability he will figure on Calgary's line up this winter in the new league formed there.

Rugby Season Closed.

The football season is closed. Queen's have all hung up their uniforms and are now tuning hockey and expect to put a winning septette on the ice.

Bonspiel Suggested.

Work on the new curling rink is rapidly nearing completion, and when finished, Kingston will have one of the best rinks in Ontario. The club room quarters are being made comfortable, and the alterations have made a marked improvement. A suggestion has been made, and a good one too, that the local club open up the season with a big bonspiel, such as is held in other cities. The suggestion is sure to meet with the hearty approval of all the curlers, and it would be wise to have the matter referred to a special committee. It would be a most fitting opening for the rink, and would also arouse renewed interest in the roarin' game.

Sporting Notes.

John L. Sullivan and Jake Kilrain are touring the country describing their great ring battles of the past.

'Varsity has enough players for two senior teams, and the proposal to put sevens in the Inter-collegiate and O.H.A. looks like the best solution of the matter.

Pittsburg is making inroads on Brockville hockeyists. Higgins and Muldoon, of last year's Invincibles, have agreed to take positions there and play hockey this winter. Albert Kerr is also negotiating with Pittsburg clubs.

President Hermann, of the National baseball commission, states than in his opinion "Joe" Kelley cannot manage Toronto, whether as player or bench-manager. The deadlock between Kelley and Boston is still on, with the length of the contract as the sticking point.

The ice races in Ottawa this coming winter promise to be the best on record. They will be held from Feb. 1st to 8th, and a most attractive programme has been arranged by the Central Canada Racing association. The prize list is a dandy, over $11,500 being offered in purses, which is sure to attract the fastest horses n America.

The past season was a great one for Ottawa College, as far as football is concerned, and the association is about $1,800 ahead, which is the best year in the history of College. The attendance at the Queen's game at Ottawa early in the season was 3,500; at the Varsity game on Thanksgiving Day, 4,000, and last Saturday, against McGill, 4,500.

Duluth will play hockey during the coming winter. Arrangements have been completed for the conversion of the ball park into a rink, and the work of getting things in shape will be immediately begun. The rink, which will be 200 by 150 feet, will run crosswise of the field, so that the grandstand and the bleachers can be used without necessitating alterations.

The recent amalgamation of the St. George's and the Marlboros to form one senior O.H.A. team in Toronto is dissolved. The two broke asunder because there seemed no possibility of getting the two sets of players to mix on the ice, and the position was no better for the combined club than for the two single-handed. St. George's will doubtless have a team in the senior series and it is quite possible that the Marlboros may also get going again.

Kelley transformed Toronto baseball team from a tail-ender into a winner in one season, but he will have a harder task in changing the Boston Nationals from a second division outfit into a first division club. The team is particularly weak behind the bat, though Owner Dovey thinks he has a backstop of promise in Ball, whom he found in the Chicago City league. Both Needham and Brown are due to walk the plank.

David Langford, the young Englishman, who set out to walk 138 miles, from Oshawa to Toronto to Port Hope to Oshawa, covered the distance in thirty-six hours and fifty-seven minutes. A month ago Langford made the same trip in thirty-nine hours, and on this occasion tried to reduce the time to thirty-five hours, but was unable to do so, owing to the conditions. The roads were very bad, and the last ten miles were walked in mud, and a driving rainstorm.

Where Are The Engineers?

Nothing more has been heard from the Ontario government Hydro-Electric power commission regarding the promised visit of their engineers to Kingston to consult with the city council as to power supply for this city. The engineers were to have come two weeks ago.

Reduction Of Water Rates.

The question of reduced water rates will again be before the waterworks' committee on Monday. The committee has all the information it requires, and should be able to go ahead and make a proper reduction. It is quite possible to make a general reduction of five per cent. on household rates, and also strike off the bath charge.

They All Have Them.

As to the announcement of ministers appearing in their pulpits on temperance day with palms in their hands and crowns on their heads, wouldn't they attract crowds if they had not either? Every Sunday they appear with the two things, so do all the hearers—palms to their hands, and crowns to their heads.

'Twas A Fine Event.

Under the auspices of the Sons of England, a grand assembly was held in the Whig hall, on Friday night, and the affair was a great success, reflecting much credit upon the committee of management. Sixty couple were present, and danced until an early hour in the morning, the music being furnished by McAuley's orchestra. The dance was certainly the best ever held by the local Sons of England.

Lost Faith In Engineers.

The county council has not much faith in engineers after the collapse of a pier of the Loughboro Lake bridge, and has decided to allow its own committee to do the engineering. However, it has secured improved plans from the engineers who were directing matters. The council should remember that even the greatest of engineers make mistakes. It is not very long ago since the Quebec bridge disaster took place.

Our prejudices many times makes you and me social crucifiers. Semi-Ready suits. Bibby's.

CONCERT AT THE GRAND

FINE ENTERTAINMENT GIVEN LAST NIGHT.

Was Under Auspices of Sons of Scotland—Programme Merited Much Larger Audience.

There was only a fair attendance at the concert given at the Grand, last night, under the auspices of the Sons of Scotland, but the programme merited a much larger audience. The talent was of high order, and the different numbers provided a most enjoyable entertainment. The entire programme was given by a company of three, Miss Nannie Strachan, soprano; Miss Enid Newcombe, A.R.C.M., 'cellist, medalist of the Royal Academy of Music, London, Eng., and Gavin Spence, tenor. The audience heard of Scotland in song and story, and some songs which were not Scotch, were also given to advantage. Miss Strachan possesses a rich soprano voice, and was warmly applauded. Several excellent selections were given by Miss Newcombe, who was on every occasion, obliged to respond to an encore. Mr. Spence not only proved himself to be a fine soloist, but a good story teller as well. His rendition of "A Hundred Pipers" was exceedingly good, and in this selection he gave a fine imitation of the bagpipes. Another most pleasing number was "Jessie's Dream, or The Relief of Lucknow." Miss Strachan sang several of the ever popular Scottish songs, including "The Scottish Blue Bell," "Comin' Thro' the Rye," and "Whistle and I'll Come to You, My Lad." As a duet, Miss Strachan and Mr. Spence sang "The Crooked Bawbee." Miss Newcombe acted as accompanist during the evening.

Mr. Spence has been travelling in all parts of the world for the last twenty-two years, but this is his first visit to Kingston and through the province of Ontario. Apart from his regular numbers, he told many interesting incidents concerning his travels, and proved himself to be a clever entertainer.

To-night "Uncle Tom's Cabin.

Downie's "Uncle Tom's Cabin" will be presented at the Grand Opera House to-night, by Andrew McPhee's large company. It is said that the good old play is nicely portrayed by the legitimate actors and actresses of the organization. The numerous specialty people make the plantation scenes very attractive with songs and dances.

"Mrs. Temple's Telegram."

"Mrs. Temple's Telegram" will be the attraction at the Grand on Tuesday, November 26th. It is doubtful if ever a play and players have given the satisfaction that is attributed to "Mrs. Temple's Telegram." Clean, clever, always brimming with mirth, funny situations, stories within stories and contrapuntal evolutions set a pace of action which speeds along with precise art and exact measurements, that makes one of the most delightful battles of mischief ever witnessed. Beautiful and elaborate stage settings and an excellent company has been provided.

KILLED BY A COW'S TAIL.

Binghampton, N.Y.—Wm. A. Wells, of Neward Valley, was milking, when a cow swished her tail, striking him on the forehead with the fleshy part of the appendage. Shortly afterwards, Mr. Wells returned to the house, complaining of a pain in the head, which rapidly grew worse. Physicians pronounced it apoplexy, brought on by the blow from the cow's tail. Mr. Wells died the same night.

Apoplexy is the result of poisoned blood. Bowels become constipated, kidneys get weakened, skin action becomes poor, and the blood is loaded with impurities, which produces weakness in the blood vessels.

Whenever there is headache, backache, neuralgia, rheumatism—it means blood poisoning. "Fruit-a-tives" are a certain cure for all these troubles.
