THE HEAD HUNTERS

SUFFER WHEN ASSAILED BY JAPANESE.

Japanese to Exterminate Tribe of 100,000 By Electricity, Says An American.

San Francisco, Dec. 10.—The extermination of savage, murderous head-hunters by electrification is the latest novelty introduced by the Japanese in Formosa. Walter Clifton, manager of a Formosa mercantile company, who arrived here yesterday on the Japanese liner America, is authorized for the statement that he will wipe out this tribe, which is retarding the commercial development of Formosa, heroic measures are being adopted by the Japanese. "These head-hunters," said Clifton, "number about 100,000, and inhabit the entire east coast of the island. All efforts to civilize them have failed. They recently invaded a party of three hundred Chinese and Japanese into an ambush on the pretence of showing some treasure, and killed all but two."

"In punishment for this treachery, the Japanese inaugurated a method of electrification. Large bodies of troops were sent out, and now, when a company of head-hunters is located, the place is surrounded by a wire fence. The wires are charged with electricity. The soldiers begin to shoot and the savages stampede, and then the wires get those that bullets miss."

CHILD KILLED.

Bellefonte, Ont., Dec. 10.—In an accident, which occurred here this morning, Charles D. Leavens, the eight-year old son of H. Leavens and Grandson of D. D. Leavens, was killed. He fell beneath the tracks of a passenger train while crossing the street. He was driving a horse and one of the spokes of the wheel struck his head, fracturing his brain.

MEN RAN AWAY.

Had Stolen Property in Their Possession.

As the result of a little chase, last night, in which Police Constable Thomas Mullinger and two strangers figured, some stolen property, tools belonging to the street railway company, were recovered. The officer reported the tip that two men had a couple of tapping bars and a pick in their possession, and Constable Mullinger set out after the night. He caught sight of the two with the tools near the G.T.R. freight shed, but when they saw the bluecoat, they dropped the tools, and ran as fast as they could. They had such a start on the officer that it was impossible for him to overtake them, and he had to be contented with only securing the stolen property. "Tom" Longboat was not in it with the strangers. They took just one glance at his identification, and ran like deer. Latest reports say that they are still going. The officer carried the tools to the police station, and this morning Hugh Kitchin, of the street railway, identified the tools as belonging to the street railway. They were stolen several days ago, and it appears that at various times tools have been stolen from the company.

Moving Pictures In London.

The modernity of the "motion picture world," in the world's metropolitan centers, "Hollywood," "London," and "music halls," supply the demand. As an instance of how Londoners "hustle." Within the last few days a gigantic fire raged at Gamage's High Holborn, one of London's mammoth stores. The same evening all the thrilling incidents of the fire were repeated at the Palace theatre by the bioscope.

To Protect The Buyer.

The grocers' section of the Retail Merchants' Association of Ontario have sent out printed cards to grocers and other dealers containing the following warning against "light weight potatoes." "Some are selling potatoes in bags weighing only 75 to 80 lbs., and as there is no law in the province regulating the net, ask and see that you get 90 lbs. in each and every bag. This is issued for the protection of the public in the interests of honest trade." The association will support a measure that will be introduced in the legislature to make 90 lbs. the fixed weight for a bag of potatoes.
