THE PARAGRAPH PULPIT Unitarian. REV. C. W. CASSON. The Test Of Truth. Truth is too often in its popular form the fantastic product of the imagination. Every new "ism" claims the stamp of truth, and because of our freedom and willingness to learn we are not only the potential but often the actual victims of error. However abstract a truth may be, its value appears concretely, and before its incorporation into any present system of thought, and is capable of standing the test of utility. If a so-called truth simply increases speculation, without offering any guidance in conduct, it is worthless. If it simply adds to the many rules already possessed, without adding anything of the old, it is not truth. From this negative consideration, the positive is obvious.—D. H. Ferrell.

Among The Lepers. On his way around the world for the Woman's Home Companion, "Jack" London visited the lepers of Molokai, on the Island of Hawaii. "Leprosy is not so contagious as is imagined," he writes. "I went for a week's visit to the settlement, and I took my wife along—all of which would have not happened had we had any apprehension of contracting the disease. No did we wear long, gauntleted gloves and keep apart from the lepers. On the contrary, we mingled freely with them, and before we left knew scores of them by sight and name. The precaution of simple cleanliness seems to be all that is necessary. On returning to their own homes, after having been among and handling lepers, the non-lepers, such as the physicians and the superintendent, merely wash their faces and hands with mildly antiseptic soap and change their coats."
