**COLD KILLS THE GERM.**

**Lieut. Perry Says There Are No Bald Heads in the Arctic Region.**

The people who come back from Klondike testify to the fact that no native bald heads are there. The evidence is that the cold climate kills the germs that eat the hair off at the roots. Lieut. Perry, who went to the Arctic regions, gives the same evidence. Newbro's Herpicide, it is said, kills the germ that eats the hair off at the roots; and the hair grows again. Herpicide is the first hair remedy built upon the principle of destroying the germ that eats the hair off. Its phenomenal sale demonstrates the correctness of the scalp germ theory. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich. Two sizes, 50c. and \$1. G. W. Mahood, special agent.

**NEWLY MARRIED MAN**

**WILL BE BROUGHT TO TORONTO FOR TRIAL.**

George T. Woodman served a check and a Toronto Bank Book—a charge of Theft Preferred.

Toronto, Jan. 24.—A Detroit despatch says that George T. Woodman, alias "Lord Devonshire," who, on Tuesday evening last, married a Miss Scott, of that city, and, on Wednesday, was arrested on suspicion, will be brought back to Toronto to answer the charges of paying for the worth of jewelry and a bank book. The arrest of Woodman, the despatch adds, resulted from a tip that Siegel, the Woodman avenue merchant, gave the police several days ago. Woodman called at Siegel's store and purchased gowns valued at \$300 to \$400, for his bride, but instead of paying for the gowns, offered the cheque and a Toronto bank book. Mr. Siegel kept the bank book and wired to Toronto to find out whether Woodman had funds in the Toronto bank before he delivered the goods. An answer was returned saying that Woodman was unknown. The police investigated and Woodman's arrest followed.

Hawes, Gibson & Co., mining brokers, of Toronto, have entered an action for \$5,000 damages against John J. Beatty, Toronto, for alleged breach of contract. The plaintiffs claim they were to have the sale of 100,000 shares of the capital stock of the Big Ben Mining Company, but that this agreement was not carried out.

**SENATE NECESSARY.**

**Mr. Ross Defends It From Charges of Idleness.**

Ottawa, Jan. 24.—The sitting of the senate yesterday was devoted to an illuminating debate on the question of senate reform, and to the discussion of the subject, the most cogent and authoritative contribution heard in years was given by Hon. George W. Ross. In an hour's address he dealt with the important place which the senate had filled since confederation, in promoting the legislation of the country, noted the constitutional limitations under which the upper chamber now worked, pointed out some of the cardinal objections to the present system, and urged the necessity of maintaining an upper house, evidenced by the fact that the senate had since confederation amended no less than twenty-seven per cent. of the bills sent up from the commons. Finally he suggested that the wisest method of senate reform would be to amend the constitution to make the senate partly elective and partly appointive, half of the senators being elected to represent specified provincial districts, and the tenure of office to be two terms of the local legislatures, while half the personnel should be appointed by the crown for life.

In the course of his address he also made a strong plea for bringing the senate into closer touch with the great departments of state through the appointment of parliamentary under secretaries, who could be sponsors in the upper chamber for the public bills affecting their respective departments.

**LETTERS TO THE EDITOR.**

**Gordon Staley Refutes Statements Made By the News.**

Kingston, Jan. 24.—(To the Editor.) My attention has been called to an item appearing in Wednesday's News, which says that an operator was discharged from one of the theatres since the article about the fire traps. That is another News' lie. I am the only operator who left any of the theatres during the last two months. I was not discharged. I resigned of my own free will, and before I ever read or heard of the News' article, and the News' article had nothing to do with it at all. I resigned for reasons that are private and personal. I was employed in the Bijou for about three months, as door-keeper and assistant to the operator. The fire-trap stories in the News are a pack of lies.—GORDON STALEY.

**CUT CHANCELLOR'S SALARY.**

**Must Give Suffrage or Will Fight Appropriation.**

Berlin, Jan. 24.—The socialists, in retaliation for the stand taken by Prince Von Buelow on the matter of manhood suffrage for Prussia, have decided to aim a blow direct at the imperial chancellor. When the appropriations for the chancellor's salary comes up for debate in the reichstag they will introduce a motion that his remuneration be reduced unless he promises a bill providing universal suffrage without distinction of sex for everybody over twenty years of age in every federal state of the empire.

**More Labor Disputes.**

Ottawa, Jan. 24.—The Labor Gazette, for January, summing up the year 1907, says there occurred 149 trade disputes, affecting 34,694 work people and causing a loss of 613,986 working days. This is in comparison to the figures of the year previous, which showed 138 disputes, affecting 26,014 men, and causing a loss of 452,775 working days.

**LATE JOHN HONAN.**

**Was Highly Respected By All Classes.**

Gannaque, Ontario.

The death occurred on January 18th of John Honan, at his home, Honan's Corners, after an illness of over two years. Although he was in poor health his condition did not assume a critical aspect until two weeks ago, when an operation was considered necessary, which greatly relieved his sufferings. For a time after there was hope of his recovery, but two weeks ago he began to fail rapidly until he came on Saturday last at 10:30 a.m. He was highly respected by all who knew him, honest in his dealings and always charitable. He was the son of Mr. and Mrs. M. Honan, formerly of Gannaque, and was born here fifty-eight years ago. He was one of the pioneers of this district, having lived on the farm he died on for fifty-one years. He was a Catholic in religion and a liberal in politics. He leaves to mourn his loss a wife and seven children: Lillie, a trained nurse in Chicago; Thomas, foreman for the Winnipeg Brick and Tile company; John and Michael on farms near Estevan, Sask.; Joseph, Florence and his granddaughter, Marguerite at home; and two sisters, Mrs. Brookes of San Francisco, Cal., and Helen Dunham, Buffalo, N.Y.

The funeral took place from his late residence on Monday, January 20th, to St. Barnaby's church, Brewer's Mills, where a solemn requiem high mass was sung by Rev. Father Trayner. A beautiful floral tribune adorned the coffin from Mr. and Mrs. B. Shiels, Gannaque. The casket, at his request, was borne by Messrs. P. Kelly, J. O'Neil, Richard Luker, Ab. Street, John McCallin, of Jaylor; and Daniel Kenny, of Gannaque.

**THE DREADFUL STORM.**

**People Battling in New York Against Great Blizzard.**

New York, Jan. 24.—One man was frozen to death and another, blinded by snow, walked off a ferry slip and was drowned. Many were picked up more dead than alive in the streets and had to be revived in the hospitals. James Smith, once a prosperous engineer, was found frozen to death beneath a drift several feet deep. Severe storms raged along the whole Atlantic coast. A large fishing fleet was reported in distress at Atlantic City early to-day.

**Due Notice Given.**

The result in South Huron is another intimation to the Ottawa opposition that the country takes no stock in mud-throwing, where the mud is so obviously manufactured in the opposition puddle. There is not one of the alleged "scandals" but which could be rattled before any impartial audience in Ontario. No constituency in Ontario at least, can be stampeded by shouting "Graft" or "Bulldozing" the little group of scandal-smellers should cease fouling their nest.

When the case was called on the great power he is said to hold in his optics. When the case was called on the great power he is said to hold in his optics.

**GROWTH IN ORE.**

**The Increase of Gold Since Days of Columbus.**

Gold was the substance for which all the world hungered, and yet when Columbus discovered America there was less than \$250,000,000 of it in all Europe. Surely it had been a difficult substance to find. Centuries had passed, during which this yellow metal had been carefully hoarded, and yet all of Europe held less than a quarter of a billion of it. That was a matter of 415 years ago.

When the great explorer set sail for unknown shores the world was increasing its stock of gold at the rate of less than \$4,000,000 annually. It would therefore take Europe sixty years to duplicate its gold holdings. When another hundred years had passed the output had increased to \$6,000,000 annually. This was nothing startling in such an increase. To bring this about it has been necessary to ransack the treasures of Peru, Mexico, and other new countries. Once more we move the hand of time forward a hundred years until we come to 1700, in which year the average gold production is only \$7,000,000 yearly. Certainly there was no reason to fear an over-production of gold. Another hundred years brings us to 1800, in which comparatively modern times the annual production of gold was only \$12,000,000.

That we find during the three centuries following the discovery of America, the world's average annual increase in gold was \$26,666. Had this modest ratio been maintained for the next hundred years, the total production of gold in 1900 would have been about \$15,000,000. How much do you suppose it actually was? Double that amount? Three times it? Make another guess. It was \$262,220,915.
