Facts About the American Indian's Healthy Hair.

The American Indian accustomed from time immemorial to go bareheaded in all kinds of weather is never troubled with falling hair or baldness.

The close atmosphere caused by our "civilized" head gear is conducive to the breeding of infinitesimal germs which dig into the scalp and thrive on the sap of the hair root.

This true cause of baldness is of recent discovery and explains the non-success of all hair-grows which treated baldness as a functional disorder.

Newbro's Horticaine is a direct extirminator of the germ. It destroys the cause and permits the hair to grow as nature intended.
