It established clearly the principle that united action and agreements to affect production and control prices are not, per se, opposed to good morals. At the same time it rejected the claim that trade combinations for the control of prices while not forbidden by law, still lack legal protection, and that such an organization bas no standan court. The civil code provides that anyone causing loss to another by an act contrary to good morals is liable for damages, or is liable for damages resultant from utterance or publication of a false statement tending to injure the credit or business of an other, even if the fact of its falsity

When Explosives Explode.

was unknown by the accused.

There are two ways in which an explosive may be set off-by burning and by detonation. The burning process is progressive from one particle infinitely more rapid. This process is adapted to gunpowder, requiring as it does a very short time for the burnng up of the explosive body The other form of explosion-the detonative-being at once throughout the mass, is unfitted for use in (which would be smashed to pieces), but as adapted to shattering or breaking processes, such as blasting rocks mining operations and bursting charges in shells, torpedos and submarine mines. Substances of the latter sort are termed high explosives. Some examples may be given of the safety with which the most dangerous explosives may ordinarily be handled. For guncotton (such as pure cotton treated with nitric acid) may be set and will burn quietly. But if a suffiploded. A torpedo filled with wet trate it and burst in the mass of guncotton. Even nitro-glycerine will burn without danger of barm.

Burden Of Over-Education. Discussing the problem of over-education of women, Margaret E. Sangster, in the Woman's Home Companion of March, asks and answers the question, "What Is Education, After

"Is it not ascertaining how to make sweet, quiet and fragrant influence throughout life over all whom one meets? If an advanced education cation one should seek.
