In the first place it indicates an absence from the blood of the rich, red, life-giving elements so requisite to health; and in the second place it indicates a weakened heart action. These two things act and re-act. If we pale-faced people, we would see it flabby, weak and palid. No wonder they are easily tired, get out of breath quickly, have palpitation, are nervous and down-hearted. Their muscles are poor, their stomach disordered, and their lives are seldom free from misery.

Let them take Milburn's Heart and Nerve Pills; there is no remedy to equal them for making pale faces rosy, weak hearts and shaky nerves strong, flabby muscles firm, and infusing new hope and ambition into life.
