

Nothing Did Good

Until She Tried "Fruit-a-tives"
Madame Rioux is the wife of M. Jos. Rioux, a wealthy manufacturer of lumber in St. Moise. Madame Rioux is greatly esteemed in her home town and her testimonial in favor of "Fruit-a-tives" carries conviction with it, as it is entirely unsolicited.

St. Moise, Quebec.

I have much pleasure in testifying to the marvelous good which I have received from the use of the famous tablets "Fruit-a-tives". I was a great sufferer for many years with serious liver disease and severe constipation. I had constant pain in the right side and in the back and these pains were severe and distressing. My digestion was very bad, with frequent headaches, and I became greatly run down in health. I took many kinds of liver pills and liver medicine without any benefit, and I was treated by several doctors but nothing did me any good, bloating continued. As soon as I began to take "Fruit-a-tives" I began to feel better, the dreadful pains in the right side and back were easier and when I had taken three boxes I was practically well.

IT IS FOR LADIES, TOO.
They Can Stop Their Hair Falling Out With Herpicide.
Ladies who have thin hair and whose hair is falling out, can prevent the hair falling out, and thicken the growth, with Newbro's "Herpicide". Besides, Herpicide is one of the most agreeable hair dressings there is. Herpicide kills the dandruff germ that eats the hair off at the root. After the germ is destroyed, the root will shoot up, and the hair grow long as ever. Even a sample will convince any lady that Newbro's Herpicide is an indispensable toilet requisite. It contains no oil or grease, it will not stain or dye. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. Two sizes, 50c and \$1. G. W. Tips For The Farmers

BY UNCLE JOSE.

The recent rains in this district, but especially favored the growth of the grass.

It is the best growth of grass I have known in many years, remarks one farmer on the market, this week, when asked about it.

The May Crop Bulletin, issued by the Ontario department of education, gives some valuable information.

It is claimed that more barrenness has prevailed amongst cows, and that a larger proportion than ordinary of those calving have died. The general opinion is that fewer cattle than usual will be exported this year. Fat stock are scarce, and store cattle are not as plentiful as in more recent years, although a few correspondents claim to have the usual supply of stockers on hand. One return is to the effect that it will be another year before Ontario cattle conditions will right themselves. Sheep have done better than any other class of farm animals, and have been most fortunate in lambing. Some complaints are made of "grab in the head," and the dog nuisance is referred to several times. Swine are thin, and are not to be found in as large numbers as last year. So many brood sows were sold just before the winter, owing to the scarcity of food, that it is doubtful if the fall delivery of bacon hogs will be anything near the record of more recent years. A form of crippling among swine, attributed to rheumatism, is reported in various localities. The good growing weather of the middle of May was greatly welcomed by owners of live stock, and many animals were then on the grass.

While correspondents are not nearly unanimous, the general tenor of reports regarding fall wheat is favorable. In most cases the crop entered the winter a little short in top, but snow fell early, and lay on the ground nearly all the season, thus affording good protection, except on knolls where the young plants were exposed, and in some of the fence corners where the crop was smothered. Early sown wheat did better than that put in later, and the crop did best on rolling land. The greatest injury to the growing wheat was caused by the ice forming in low places during the wet and cold days of the latter part of March and the beginning of April, resulting in a number of patchy fields. There will be only a small area plowed up, however, as most of the thin or bare spots will be sown to spring grains, chiefly barley, in order to save the catch of grass. The lesson of the year is the old one of the benefit of drainage, as several correspondents point out that most of the injury to the crop occurred on low-lying and undrained land. There is but little difference to note in the condition of fall wheat in the various districts, although the best showing must be credited to the Lake Erie counties.

All classes of live stock faced the winter with a poor prospect of fodder supply, as hay and grain were both scarce and dear. In order to meet the situation a large number of horses, cattle and swine were sold at sacrifice prices, but even then fears were expressed by some as to the possibility of bringing the remaining animals through in any form better than that of mere subsistence. It is the general opinion that the average condition of live stock is much better than was expected, and the prudent handling of fodder supplies has shown that Ontario farmers as a class are well capable of meeting such an emergency. No disease of an epidemic nature has been reported amongst live stock. Horses are described as being rather thin, but they are in fair working condition. Aside from mild forms of distemper and indigestion attributed by some to much chaffy stuff having to be eaten they may be counted as being in good general health. Some correspondents complain of too many old horses being kept. Cattle have not fared so well as horses, and, as a rule, were quite thin when tagged on the 1st of May. Some correspondents complain that lack of straw for bedding has retarded in some cattle being affected by a milking of the limbs.

Beware of Ointments For Catarrh That Contain Mercury.
As mercury will surely destroy the sense of smell and completely derange the whole system, when entering it through the mucous surfaces. Such articles should never be used. Catarrh is caused by a poisonous, mercury, and it is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., is a purely vegetable and is taken internally, acting directly upon the blood and mucous surfaces of the system. It is the only Catarrh Cure on record. It is sold by Druggists. Price 75c. per bottle. Take Hall's Family Pills for constipation.

Childhood Dangers.
No symptom that indicates any of the ailments of childhood should be allowed to pass without prompt attention. The little ailment may soon become a serious one, and perhaps a little live passes out. If baby's teeth fail to erupt in the usual order, or if they are kept in the house minor troubles can be promptly cured and serious ailments thus averted. And the tablets can be given with equal safety to the new born babe or the well-grown child. Mrs. H. Gendron, Martindale, Que., says: "I have used Baby's Own Tablets and have found them in every way satisfactory. I always feel safe when I have them at hand." Sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

NOTED SOCIETY WOMAN.

She Reigns in Philadelphia Circles

MRS. CHARLES EMORY SMITH, widow of the ex-postmaster-general of the United States, and former owner of the Philadelphia Press, is one of the most noted of society women in the Quaker city. She is very beautiful and exceedingly accomplished. Mrs. Smith was Miss Nettie Nichols, and she and Mr. Smith were married at Elberon, N. J., on October 2nd, 1897. As one of the wealthiest and most attractive matrimonial possibilities in society, Mrs. Smith's movements are watched with curiosity by the leaders of the social whirl throughout the United States.

The Crop Situation.

London Canada.
While all will rejoice to hear that, from all appearances, the wheat crop of Western Canada is likely to give a good account of itself this season, it is early yet to be too sure. The memory of the disappointment caused by last year's failure after favorable reports is so recent that we cannot be unrestrainedly optimistic. With this warning in mind, we may say that an excellent start has been made, and if no set-back occur, we are told, the harvest of 1908 will far exceed all previous records. How much depends on the "if." Spring was not particularly early, but the grain, almost everywhere, was in three to five weeks ahead of last year, and in some cases a fortnight ahead of the average season. Of course, the crop at every stage is a magnificent gamble, but at least it may be fairly said that never before in the history of the North-West has wheat been sown in better conditions. It was estimated at the beginning of the month that ninety per cent. of the wheat sowing had been finished, while many farmers were already at work on the planting of the coarser grains. The total acreage sown in wheat was estimated at fully twenty-five per cent. more than in any previous year, though no official returns are yet available.

Salt Rheum Vanishes.

Salt Rheum and other itching and scaly eruptions never cure themselves, they tend to grow constantly worse. Don't delay treatment or make a mistake in the remedy used. THE BELL TELEPHONE COMPANY OF CANADA
This point in long-distance telephoning is worth thinking over!

A Chain and Its Links.

A chain is no stronger than its weakest link.

In telephoning there are three links in the chain that constitutes "good-service": 1. The person calling. 2. The operator. 3. The person called.

No matter how much any one or any two of these links do to develop good service, the result is determined by the measure of co-operation of the third.

If the person calling fails to consult the directory and gives a wrong number, the operator inevitably repeats the error. If the person called fails to answer promptly, and the caller leaves the telephone, naturally "there is no one on the line."

Being human, the operator—the third link—is liable to err occasionally, but careful analysis demonstrates that she is not fairly chargeable with many of the difficulties frequently ascribed to her.

If Link No. 1 gives the right number and calls distinctly, and Link No. 3 answers promptly, the Telephone Company will be responsible for its part of the chain. If no higher motive actuated it, the motive of economy, or self-interest, would suffice.

From any Pay Station you can speak to anyone in Ontario, Quebec or the United States within a radius of a thousand miles.

If the party you wish to reach has no telephone, you can arrange to have him called to a Pay Station to talk to you.
