

For Your Summer Verandah

—That most comfortable spot of all—on a warm summer evening.

Cushion Tops—in every conceivable variety, and priced so agreeably and unusually, that you can afford to re-clothe all the old pillows, and add many new ones.

There's nothing so luxuriously soothing, when you're disposed to lounge, as the soft puffiness of many cushions—and these hundreds of pretty cushion tops will delight every woman who cares for beauty, as well as comfort.

Sateens and Cretonnes and every kind of serviceable wash material are shown—some are light, some dark, and many are in the soft tones between, both figured and stamped—with figures and floral designs and ideal heads.

Cushion Cords, too—hundreds of yards of the finest kind—with tassels, ropes—and everything else that can add to the beauty and charm of the cozy corner.

Want To Get Power Propose To Erect Large Pulp Mill.

Offer of American Company Considered By Kenora Council—Will Submit By-Law.

Kenora, Ont., June 13.—At a special meeting of the council the proposition of an American company to develop the Keweenaw water power was further considered. Andrew Anderson, the company's representative, was present and outlined the steps which had so far been taken. Some difficulty had been experienced owing to the fact that the present owners were not eager to sell and other parties, among them the U.P.R.R., were negotiating for the power. Mr. Anderson said he had secured an option, expiring on July 12th for the property at \$1,000,000, and had a further option on 1,000 square miles of pulp land. For business reasons Mr. Anderson refused to give any details about his company or their ability to carry out their promise except to the town's collector, Mr. McLenon, but the members of the council were satisfied that it was a bonafide proposition. After a discussion the necessary readings were given by law regarding the exemptions, which will be submitted to the people on July 7th.

The company binds itself to buy and develop the Keweenaw power, and to erect a pulp mill of 300 tons capacity per day, to start work by October 1st, and to have the mill completed and in operation by June 1st, 1911. Before taking any action, Mr. Anderson insisted that a by-law be submitted to the people authorizing the council to grant the company exemption from all taxes except school taxes for a period of ten years and to give them a fixed assessment of \$3,000 for fifteen years thereafter.

CANADIANS LIVE WELL.

Detroit Man Thinks They Need United States Flour.

Detroit, June 13.—"Canadians live well; they provide excellently for their families, and they need the flour produced by United States millers. Let us have a closer relation with our friends across the river." This was the keynote of ex-Mayor Maybury's address before the Millers' National Federation. Mr. Maybury advanced a number of arguments for bringing the people of this country, and particularly manufacturers of staple articles, into more intimate relations with the Canadians. "Present your claims to congress," he said, "and then see that some law is enacted that will free trade in this existing condition, free trade is certainly a bonafide. Let us make it fair trade, and by your actions have the conditions made with us in free intercourse in every way, and particularly from a commercial standpoint." Cheers and applause lasting nearly five minutes followed Mr. Maybury's remarks. James L. Gerry late chief of customs of the United States, and a resident of New York, spoke along similar lines.

CONFESSED IN HIS SLEEP.

Murder Re-enacted Brought Back to Justice.

Dos Moines, June 13.—Seven years delay and three appeals to the highest court in Iowa have failed to save Charles Rocker from the commission of murder he made in a nightmare. The superior court decided that the case, elaborated throughout the middle west, and against Rocker, and unless he is pardoned he will spend his life in prison.

The bridegroom was Mr. Moore, C.E., Smith's Falls. After Mrs. Pitt played the march, which proclaimed the completion of the ceremony, which took place at one o'clock, there was a luncheon at which the house party of 40, including Mrs. T. R. Carnovsky, Kingston, and forty-four guests, sat down. The affair was very quiet, but one toast, that of the bride being proposed, owing to recent bereavement in the groom's family. Mrs. Hill was a symphony in brown, when she left on the last o'clock train for Montreal a tailored suit of brown cloth with fine white stripes, having as accessories a smart brown hat, brown gloves, and tan boots. The happy pair will live in Sudbury. Among a quantity of lovely gifts was a kitchen shower outfit, which left nothing to be desired, from members of the congregation. Many old friends here send good wishes to Dr. and Mrs. Hill.

Model Home Of To-Morrow.
A house of cement; a house without a chimney, a house with plenty of artificial light and heat, and yet without a bit of fire; a house without coal, without ashes; without dangerous gases; such is to be the house of to-morrow. So writes Francis N. Basnett in the Technical World Magazine. This is indeed an ideal house, and it has been completed at Carrollton, Ill.

Wood is fast becoming too scarce and too dear to be used as common building material, and the time is already here, when, for economy's sake, architects and contractors are figuring to construct all buildings of steel and concrete. As the supply of coal diminishes the cost is advancing, so that everything possible is being done to husband the supply and to see that none of the precious stored heat is wasted. Electricity, generated by water power, is taking the place of coal as a source of power, and the time is not far distant when it will rank first as a source of heat.

This model twentieth-century home at Carrollton, is thirty-four by thirty feet, two stories high, with attic and basement, and has eight rooms on the two main floors. While Edison's idea of a concrete house to be poured into one big mould was not carried out, in its construction, yet the principal building material was of concrete. The foundation and walls are of concrete blocks. These blocks were moulded right on the ground as they were required. The floor is of hard wood and the interior is finished in plaster and oak. The style of architecture is of plain, substantial mission type.

Thaw Meets His Evelyn.

Poughkeepsie, N. Y., June 13.—C. B. McCormick, attorney, brother of J. H. McCormick, former New York Central claim agent, under arrest for embezzlement, jumped from a five-story office building, and is in a dying condition. He was arrested in connection with the railroad frauds and released on bail.

To These Growing Bald.
Prof. Doremund, of Toronto, will show the latest samples of his famous hair goods at the Randolph Hotel on Tuesday, June 16th. Everyone is invited to see these new Parisian and New York styles, which ornament the head and give a younger appearance to the wearer.

Riding For Foster.

Halifax, July 13.—Advices from Pictou say Hon. George E. Foster will be asked to contest Pictou in the conservative interest, the Tupper faction being determined to keep the nomination from Bell.

MARRIED AT CORNWALL.

Bride Was a Former Resident of

Kington.

At the Methodist parsonage, Corn-

wall, on Wednesday, there was a pret-

ty wedding with the bride's father,

Rev. George Edwards, former pastor

of Brock street church, of this city,

officiating. The pretty bride was

Miss Jennie Edwards, his eldest daugh-

ter, the groom, Dr. Hill, of Sudbury,

where the bride, who is very musical,

has spent the past year, teaching a

large class of pupils. She was given

a pink picture hat.

The bride's mother was a pearl necklace, with pendants of pearl,

and wore a robe of white point de sprit,

over white satin, made in empire

style, with yoke of fliegere lace, and

trimmings of Irish point. Long

streamers fell from a large bow fast-

ened between the shoulders, in the

back, and her veil was very prettily

arranged. The groom's gift was a

pearl necklace, with pendants of pearl,

and a pink picture hat.

The bridegroom was Mr. Moore,

C.E., Smith's Falls. After Mrs. Pitt

played the march, which proclaimed

the completion of the ceremony, which

took place at one o'clock, there was a

luncheon at which the house party

of 40, including Mrs. T. R. Carnovsky,

Kington, and forty-four guests, sat

down. The affair was very quiet,

but one toast, that of the bride

being proposed, owing to recent bereave-

ment in the groom's family. Mrs.

Hill was a symphony in brown, when

she left on the last o'clock train for

Montreal a tailored suit of brown

cloth with fine white stripes, having

as accessories a smart brown hat,

brown gloves, and tan boots. The

happy pair will live in Sudbury.

Among a quantity of lovely gifts was

a kitchen shower outfit, which left

nothing to be desired, from members of

the congregation. Many old friends

here send good wishes to Dr. and Mrs.

Hill.
