To Analyze Whiskey Before Action Begins Against Walkers.

The Yankee Government After the Canadian Firm—Samples of the Seized Booze Taken By Food Inspector.

Detroit, Mich., June 27.—Another move in the case of the United States government against Hiram Walker & Sons, limited, was made, Friday afternoon, when an United States food and drug inspector obtained permission to enter the warehouse where \$60,000 worth of Canadian Club whiskey is stored for the purpose of obtaining a larger number of samples of the whiskey, which will be analyzed before proceedings are begun for the confiscation of the liquor now being held. The seizures made in Detroit is not the only action taken against Walkers, as a large quantity of liquor was taken possession of by United States authorities at Milwaukee a few days ago.

Robert H. Allen, special assistant in the service of the United States attorney general's office, is here conferring with local government officials.

TROUBLES AMONG THE BANDMEN.

Ottawa, June 27.—The military arrest of seven bandmen, a petition for the resignation of the band master, a police court case, a band turnover, which was a farce, the resignation of one of more of the band, the threatened resignation of over half of the bandmen and the possibility of a formation of an independent band are features of the troubles which have been brewing for some time in the 43rd D.C.O.R. Regimental band, and which now assumed a critical stage, and may require straightening out by the military department. The men are taking these steps to rid themselves of Bandmaster Biscott, who came here from London.

Will Not Recommend Him.

Ottawa, June 28.—"Bones" Allen, brought in by the Capital increase team on the understanding that he would be given another government job, has been refused a recommend by the liberal association. They refuse in future to ask a position for a man in the civil service because of his ability in sport.

WOOD AND PEBBLES

Found Far Down in Old Mother Earth.

Spokane, Wash., June 27.—While sinking a 3,000-foot well for oil on a farm near Lenox, Wash., thirty miles south of Spokane, workmen operating a heavy drill encountered pebbles and wood at depths of 560 and 585 feet. The wood is in a fair state of preservation, though it has the appearance of having been charred by fire. With it and the pebbles was a substance resembling beeswax. The pieces will be sent to the Washington State College at Pullman for examination.

Waldo G. Paine, who is custodian of a \$25,000 fund contributed by business men of this city in the search for oil, says it is the belief of prospectors that the drill has encountered what was once a forest, leveled by the force of a mighty river in the remote part, when the country tributary to Spokane was turned over by a tremendous seismic disturbance. The drift which struck the wood recently dropped fifty-eight feet in less than three seconds and was followed by a foot of water.

Recent discoveries confirm the geological theory that the earth's crust in this part of the country probably to a depth of 2,000 feet, has been built up through the ages of successive eruptions of lava from great fissures in the earth and that the thick covering of basaltic ash was laid by the winds following the eruptions.

TO HOLD AQUATIC EVENTS.

On Dominion Day—The Programme Arranged.

The Kingston yacht club regatta committee held a meeting last evening to arrange for a series of aquatic events for Dominion Day. It was decided to have a handicap race for sailing yachts over a windward and leeward course and a race for power boats. A tough race will also be held as well as canoe racing and tilting events, and possibly a swimming race.

Prizes will be given for the different events and a good day's sport is expected. The sailing race will start at 10 a.m. and the power boat race at 10:15, and the dinghy race at 10:30, followed by the canoe events.

BATTERY TEAM DEFECTED.

The R.C.H.A. baseball team defaulted to the Young Irishmen, so this afternoon there was only one game.

Decades were appointed a committee to arrange a handicap for the motor boats. A tough race will also be held as well as canoe racing and tilting events, and possibly a swimming race.

Prizes will be given for the different events and a good day's sport is expected. The sailing race will start at 10 a.m. and the power boat race at 10:15, and the dinghy race at 10:30, followed by the canoe events.

MAKING IMPROVEMENTS,

Of Minor Nature to Tete de Pont Barracks.

H. P. Smith, architect, is supervising repairs and improvements to Tete de Pont Barracks buildings in order to make them more habitable.

Only the most necessary things are being done, as the militia department intends to spend as little as possible on these old buildings, the proposal being to erect new barracks on the rear site in a couple of years.

Tete de Pont has been in bad condition for a long time, and devoid of all modern improvements, even in the officers' departments.

MINING IMPROVEMENTS,

THE PARAGRAPH PULPIT

Unitarian.

REV. C. W. CASSON.

A Challenge To Thinkers.

The Unitarian church does not make any attempt to shape the mould for religious thought, it merely endeavors to stir the mind that it may do its own religious thinking. Hence there is found in it not the least suggestion of mental compulsion. That a man is exercising his faculty of rational perception in the search for the truth is the fact of chief importance. That he may arrive at that or that conclusion as a result of such exercise is entirely secondary. Let any man really cut free and think his own religious thoughts, and he will become Unitarian in his belief.

Address, Rev. C. W. Casson, at 25 Beacon street, Boston, Mass., for the literature.
