This shows the Fused Joint idea in "Hecla" Furnaces

No dust can escape through "Hecla" Fused Joints. They are absolutely tight and will remain so. That is what makes the "Hech" the safest and most sanitary furnace to buy. It supplies only pure and fresh warm air, without a trace of gas or dust.

The "Hecla" is economical in the consumption of fuel. The Steel Ribbed (Patented) Fire Pots, which have twice as much radiating surface as any other style of fire pot, draw a great deal of heat from the fire that in other furnaces would be sent out of the chimney.

Our catalogue tells more about these and other exclusive features of "Hecla" construction.
