

OUR GROWTH

It Has Been Phenomenal Since King Came

SINCE KING CAME ON A VISIT LESS THAN 50 YEARS AGO.

An Incredible Increase in Trade For the Period—Dominion Outshines Many a European Monarchy.

New York, July 25.—The King says: "The Prince of Wales has crossed the Atlantic to dedicate the Plains of Abraham to united Canadian people, and as he plays his part in the impressive ceremony, there can hardly fail to sweep across his mind a vision of the tremendous changes that have taken place on both sides of the great lakes since his father, then bearing the same title, paid a visit to North America. Less than fifty years have elapsed since Edward VII, then a boy of nineteen, was welcomed in Canada and the United States, but not only in the world's history has a similar period been fraught with more momentous events."

The paper then briefly reviews Canada's history, and continues: "To-day the monument erected to Wolfe and Montcalm symbolizes the conversion of Canada into a consolidated and self-sufficing nation, who asks nothing but friendship of her southern neighbor, and whose surviving tie to Britain is one of sentiment alone. Extraordinary has been the growth since 1860 of the provinces comprising the Canadian Dominion, in population and in wealth. The inhabitants are now computed at about six millions, about as many as England contained when Quebec was surrendered. In 1905-6 the foreign trade of the Dominion had reached a volume which would have seemed entirely incredible forty-eight years ago, for the total exports exceeded \$246,000,000, and imports \$294,000,000. At the same date deposits in the banks reached \$831,000,000 and deposits in savings banks \$87,000,000. The total mileage of Canadian railways in June, 1906, was upwards of 20,000 miles, and it has since been increasing rapidly. We add that the yearly value of Canadian fisheries is now not far from \$25,000,000, and that in 1906 the national revenue exceeded \$80,000,000. In a word British North America, whose unification is celebrated to-day, is aptly called a 'dominion,' for the number of its citizens, in the plenitude of its financial resources, and in the high level of its civilization, it outshines many an European monarchy."

MISCARRIAGE OF JUSTICE.

Innocent Man Six Years in Jail.

Berlin, July 25.—A terrible instance of the miscarriage of justice has just come to light. Nearly six years ago a wealthy land owner, named Herman Liechtenstein, of Pasterburg, Prussia, was charged with setting his house on fire with the object of defrauding an insurance company. His wife was also charged with aiding and abetting him. Both strenuously protested their innocence, but they were found guilty. The man was sentenced to six years' penal servitude, and the woman to two years' penal servitude. The man's sentence would have expired in August. A peasant named Henry Meyer has confessed, however, that he set fire to the house, and deliberately allowed Liechtenstein and his wife to be condemned, as he had a grudge against them. Liechtenstein's immediate release has been ordered, but he is completely broken by six years of convict life. Mrs. Liechtenstein, who was released four years ago, has suffered severely owing to a boyhood imposed by her neighbors, who insulted and mocked her.

INVESTIGATE SOCIAL EVIL.

Clergyman Suggests Appointment of Committee.

Chicago, July 25.—The Rev. Morton C. Hartwell, of Park Avenue Methodist Episcopal church, who has been strongly in the public eye lately as a crusader, has a novel idea for curbing the social evil in Chicago. He proposes an organization of a committee of 100 prominent men of the city to be selected from the various walks of life, to study the evil scientifically and make recommendations to the city for legislative action. Believing conditions in the city are worse now than they ever were before, Mr. Hartwell desires the investigation to be made from every aspect—physiological, economic, social and legislative. He wants physicians, lawyers, editors, ministers, business men, settlement workers and college professors to co-ordinate their efforts as members of the committee.

TICKLED TO DEATH.

Daughter Elopel With Washington Young Man.

Kansas City, Mo., July 25.—"Tickled to death," said Thomas F. Walsh, the millionaire Colorado miner, when informed that his daughter, Evelyn, had eloped with a young man named "Ned," the finest young man in the country, he said. "They've been engaged, you know, but I had not figured on giving my daughter away just yet. They eloped to save me the trouble I suppose. Mr. and Mrs. McLean, after the ceremony in Denver, received Mr. Walsh's blessing. Dialke of publicity, they say, prompted the elopement."

Boy Coughs Up Tick.

Athens, Ohio, July 25.—Dale Gander, aged seventeen, yesterday, in a spasm of coughing, ejected from his throat a carpet tick that he had swallowed the day before last. His parents decided his story at the time the tick appeared, but since that time the lad has been suffering severely with bronchial trouble. He has now resumed his work and is apparently in good health.

DRINK CAUSES TRAGEDY

PARIS MAN KILLS DAUGHTER AND SELF.

Paris, July 25.—A dreadful family tragedy has occurred in the Rue des Gobelins, where a man named Helio Boutelle shot his young daughter dead and committed suicide in the presence of his wife. Helio Boutelle is an artisan, was only thirty-four when he married, and eight years ago, he was a man of good conduct, but recently became compulsive, could not work, and took to drink. This, in addition to his physical depression, soon turned him into a household terror. He thrashed his wife daily, and finally she threatened to leave him. Knowing how attached she was to her six-year-old daughter, he told his wife if she left him he would kill this child. The poor mother fell ill two days ago, and was taken to the hospital. She would not leave her daughter alone with her drunken father, and had to be taken to her parents. Yesterday afternoon Boutelle discovered where the child was and took her away, under the pretext of going for a walk. At the same time the wife received a note from him saying that he was able to keep his promise. Mrs. Boutelle, terror-stricken, left the hospital and rushed to the police. The commissary and two policemen accompanied her to the house, but waited on the staircase ready to come to her help if necessary. When she opened the door her husband took her by the arm and locked the door. Then, before the poor woman had time to see what he was about, he seized a revolver and shot his daughter, who was asleep in bed. Then placing the revolver against his temple, he shot himself dead. The unfortunate woman has gone out of her mind.

FOOT SPIKED

Accident To a Gananoque Section Man.

SPIKE WENT THROUGH HIS FOOT, MAILING IT TO A PLANK.

Death of James Lappan at Schenectady, N.Y.—Excursions of Friday—Kingston Arrivals at Some of Gananoque's Summer Boarding Houses.

Gananoque, July 25.—Irving Stolliker, sectionman on the Thousand Islands railroad, met with a painful and what may prove serious accident while assisting in making repairs near the railroad bridge. Some old planking in which there were long spikes were being removed, when one of them fell, and a spike was driven through the unfortunate man's foot, with such force, as to drive the spike into another plank under his foot. Medical assistance was at once summoned and the injury dressed, but as the spike was rusty it may prove more serious than it appears to be. James Lappan passed away at his home in Schenectady, N.Y., Thursday evening, in the fiftieth year of his age. He was a native of Lansdowne township, a blacksmith by trade, well known and highly respected. Two brothers reside in town, Michael, King street, and Peter, Wellington street, and also his mother on Wellington street. He leaves a wife, one son and three daughters. The remains were brought here this morning and the funeral took place from his mother's residence, Wellington street, to St. John's church and thence to the Roman Catholic burying ground. The Gananoque Yacht Club held another of their popular dances at their club house last evening. The kees or chestra furnished the music, and the attendance was large. MINISTER BADLY SCARED.

Threatens to Seize Warships For Debt.

Paris, July 25.—The whole French navy has escaped seizure by a Cherokee lawyer for a debt of \$25,000. The Matin tells the amusing story. Letellier, a dockyard workman, lost a hand during his employment in November, 1906, and in an arbitration was awarded a pension of \$100. But the ministry caviled at the decision, and in March, 1907, Letellier, through his lawyer, M. Lehoucq, sued the admiralty and won his case. Still, he did not get the money. M. Thomson, minister of marine, or his subordinates made protests and delays till \$25 of the pension was in arrears. It was the admiralty office at Cherbourg, and announced that, in default of payment, he would be compelled to seize the furniture of the building, as well as the warships, torpedo boats, and vessels of smaller importance, in the docks at the moment of his frantic protest. He was patched to M. Thomson, who forthwith capitulated and sent \$2,000, the capital necessary to supply the workman's pension.

CONSCIENTIOUS SENATOR.

Hon. Josiah Wood Accepts Only Board Money.

Ottawa, July 25.—Canada has a senator who does not accept his seasonal indemnity and who has not increased from \$1,500 to \$2,500, and there is the greater part of \$7,500 coming to him. Senator Josiah Wood, of Westmorland, N.B. For three years he has not taken his cheque. Senator Wood was opposed to the increase when it went into effect. He took it that the money given to a member of parliament was not a reality an indemnity and not in any sense a salary. Acting on that principle he has drawn from the treasury only enough to indemnify himself for expenses—that is, he has drawn "board money" or about \$700 or \$800 a year. The balance lies in his credit.

ACCEPTED CALL TO MONTREAL.

Rev. W. J. L. Major, Peterboro, Will Be Assistant.

C.P.R. IS NOT IDLE

PREPARATIONS TO HANDLE CROP.

The Double-tracked Line Between That Point and Winnipeg Will Probably Enable the Road to Handle Six Hundred Cars of Grain Daily. Fort William, July 25.—Prospects for a rush fall were never better in Fort William than at present. With only eighty miles of double-tracking between here and Winnipeg to complete, the C.P.R. is preparing to move a greater amount of wheat this fall than ever before in its history, and will no doubt break all previous records in handling grain. In the fall of 1905, the C.P.R. made a record of moving an average of 404 cars per day for seventy-seven days, a feat never before surpassed on this or any other single-track railway in the world. With 340 miles of the same road, double-tracked this fall, officials of the company are looking forward to moving 600 cars per day, and one of the high officials of western lines is heard to say only recently that if there were not an average movement of 600 cars daily between Fort William and Winnipeg for a time equal to seventy-seven days, it might reasonably expect to see an other man filling his shoes. Terminal facilities in Fort William will be increased by the addition of a new working house to elevator D, which has been out of business for two years. The contract with the company erecting this working house is that it will be capable of handling 400 cars every twenty hours, and the railway company has a big bond from the erecting company to that effect. The C.P.R. is this year spending \$250,000 in improving the terminals here, and still it is not content. Plans for an entire re-arrangement of terminal facilities at this port are now in the hands of the operating officials that will still more than double the capacity, and is estimated to be equal to handling the wheat crop of western Canada for thirty years.

SIR WILFRID LED CHEERING.

Swung His Hat and Stirred Up Enthusiasm. The N.Y. Herald's Quebec correspondent begins his story with an incident that the rest of the press men may have missed: "Gentlemen, let us give three cheers for the prince." The prince's hair-shirted friend swung his hat and led the shouting with all the enthusiasm of a boy, and in this fashion Canada took her future king to her heart. The official ceremonies of arrival and landing were carried out with all the pomp and etiquette due to British officials, but that was not enough and Sir Wilfrid Laurier added just the touch that roused his people. Mother Endures Agony to Save Baby.

Marion, O., July 25.—Exhausted and almost unconscious, Mrs. W. H. Collins of Letourneau street, was found by neighbors with her baby part way into a cistern. The woman was clinging to the skirts of her five-year-old son. The baby was crying lustily as the mother held him in a vice-like grip above the water. The child fell into the open cistern. Mrs. Collins heard her screams. She ran to the cistern and in reaching down into the opening her arm caught in such a manner that she could not remove it without releasing her hold on the babe. For an hour she held the child above the water before neighbors heard her cries. Predicts Brilliant Future. ARE AFTER A FORTUNE

ENGLISHMEN JOIN MOROCCO'S PRETENDER.

London, July 25.—The Express says half a dozen active enterprising young Englishmen, backed by a British syndicate, have penetrated Morocco and attached themselves to Mulai Hafid, the pretender, whom they are doing their utmost to establish on the throne. Mulai Hafid has undertaken to require them by giving concessions for mining, the construction of railways, and for the reorganization of the finances of the country. They will also be given important political posts and partial control of the customs. The Englishmen, according to the Express' story, beat German and Portuguese competitors in this venture, apparently by their skill in getting to close quarters with Mulai Hafid, their rivals not getting any further than Tangier. If the story of the Express contains any truth whatsoever, Mulai Hafid must have changed his views very materially recently. His great hold upon the Moors has been gained through his energetic opposition to foreigners and all their works, the influence of which upon Sultan Abd-Allah, Mulai Hafid asserts, has been represented as being strongly opposed to the modern conveniences of civilization and has repeatedly declared that should he gain the throne no foreigners would be permitted to serve under him in any capacity.
