DR. SHILLINGTON

APPOINTED BY CANADIAN MEDICAL ASSOCIATION.

The Organization is One of the Oldest in Existence—A Journal May Be Established at An Early Date.

The Canadian Medical Association held its 41st annual session in Ottawa recently and there was a large attendance of medical men present from all parts of Canada. The organization is the oldest of its kind in Canada and was formed in the city of Quebec in 1867 and has held annual meetings ever since. It is the parent medical association of the Dominion and its conventions are held in the big centres of population. Last year a new constitution was introduced by which the work was broadened and made more national in character. The Ottawa doctors had an entertainment committee and the visitors were well looked after and given a very pleasant time. The convention was held in St. George's Hall and the Racquet Court was also engaged for the display exhibitions of specimens and other things of interest to the medical profession. Sir Wilfrid Laurier addressed the convention and made some interesting references to his own health and the means he had taken to recover it after he had been practically given up by the leading doctors of Canada and Europe. Rest, simple food, and moderate exercise were the only medicines that did him any good and his splendid health at present speaks eloquently in behalf of the prescription.

As a result of the deliberations of the convention a journal for the benefit of the profession may be shortly established in Canada. Dr. Montzambert delivered a very interesting paper on the question of the preservation of health and gave many practical hints on the subject. The basis of health in families he argued was cleanliness, simple food, and proper rest. He advocated for people advanced in years at least one hour's sleep before midnight, and he severely criticized the dangerous habit prevalent among women of kissing when meeting and parting and the promiscuous kissing of children as causes that did much to spread disease. He also contended that all plumbing should be carefully inspected by a municipal official and all plumbers should be compelled to take out a license after a proper examination. He argued that active measures should be taken to exterminate rats, a great source of spreading disease, and advocated a Federal health bureau to take charge of the education of the public in regard to proper sanitation and also the establishment of the National Tuberculosis Sanitarium.

The association will meet in Winnipeg next year and Dr. R. J. Blanchard of that place was recommended for president of 1908. Dr. A. T. Shillington of Ottawa was appointed chairman of the Committee on Medical Legislation. The new chairman is one of the best known medical men of the capital. He is popular in military and athletic circles and has been for some years an enthusiastic promoter of clean athletics, having identified himself particularly with the great winter sport, hockey, being a great lover of the game.

Caught Beaver at Work.

With priceless moving picture films and data procured in the wilds, of the habits, haunts and activities of the busy beaver family, caught for the first time in the history of nature study, sets of films depicting bird, animal and insect life and information on the effect of music upon the denizens of the wild, Prof. C. R. Kellogg, a New York naturalist, recently came to make, after a month's work far from the haunts of mankind.

This region is the habitat of numerous large colonies of the interesting beaver family. With his special apparatus carried far into the woods where neither roads nor trails penetrate, Prof. Kellogg set up his establishment, made friends with food giving the colonists, and was able to procure a most wonderfully interesting series of motion pictures of the beavers at work and at play in and around their spacious houses fringing the ponds they artificially create for their dooryards.

He caught them taking large and good sized logs, rafting them down the streams with the bill of river drivers, adjusting them with intelligence remarkable for dam construction, and photographed them at work on tree felling. Interesting experiments to get the effect of music on the fur-bearing animals were made. Otter, fisher, foxes, skunks, and even bears—were made. The flute, Prof. Kellogg says, seemed to have the most attraction for these animals, who fled at the sound of a violin. At twilight, when the beaver families were about to retire, he had no difficulty in drawing them to their doorways with the softly-played strains of the flute, and they would invariably retire when the violin was sounded.

He obtained valuable pictures in various of clouds of beautiful colored butterflies, with his phonograph he got wonderful animal sounds, and songs of birds, the like of which he says man scarcely ever hears near civilization; a record of the bull moose calling to his mate, the weird night cries of the Indian Devil, the almost human cries of wounded rabbits and at the prowling leopards.

Wolf Hunter's Record.

Ninety-three timber wolves killed in less than a month's time is the record made by James Macintyre of Quabbin, who has presented a bill to the Government asking for \$1,395, the amount of bounty at the rate of \$15 a head.

An examination of Mr. Macintyre's account showed that some of the wolves were killed before Feb. 1, the date on which the increased bounty came into effect, and on these he will be allowed only \$5 per head, but he has evidence enough of February's work to make his claim when revised amount to about \$1,000.

It is reported that Indians up the coast, who have learned of the increase in bounty on panthers and wolves to \$15 a head each, have taken to the woods on a hunt, and it is expected that they will soon have a large sum to collect from the Government.

CANADA, OUR HOME.

There is a land of broad expanse,
Of boundless wealth and honored name;
Its landscape doth the eye entrance,
Its lakes and rivers give it fame;
A people of heroic blood
Within its lengthened borders dwell;

The progress of the passing years
With truth its noble history tells.

In this Dominion, side by side,
In harmony and friendship live
Gaul, Celt and Saxon, who with pride
All to our Sovereign homage give;
We all are Britons to the core
And Britons we will ever be;
From north to south, from shore to shore,
From centre to each bounding sea.

Should danger threaten, or foe assail,
Strong hearts and hands would ever be found

To bear the weapons that prevail;
And face the evils that surround;
For God and right and native land,
For truth and liberty and light,
We would not fear to take our stand
But boldly rally to the fight.

Yet choose we not the gory field,
To peace and labor we incline;
We crave the honor toil doth yield,
The wealth of forest, farm and mine;
Let others rank and title seek
And win, through strife, the world's applause.

Give us a good Canadian home
'Neath Britain's flag and Britain's laws.

Ye men of every clime and tongue
Come, find a home 'mid pleasures rare;

We have rich treasures to bestow,
Enough for all and much to spare;
We love our country, King and Queen,
We love the banner of the free,
And blend with yellow, red and green,
The maple leaf and fleur-de-lis.

A NOVA SCOTIA SCHOLAR.

Distinguished Career of Dr. E. G. Bill—Honored by Yale University.

Earl Gordon Bill of Wolfville recently received the degree of Doctor of Philosophy in mathematics at the commencement exercises at Yale University.

Dr. Bill is one of the most brilliant Canadians that ever attended American universities; and Nova Scotia has reason to be proud of such a son, who will doubtless win greater renown in the future in his chosen subject of mathematics. Dr. Bill is only 24 years old. He was born at Billtown, in Kings county, and is the son of C. R. Bill, collector of customs at Wolfville. At 17 years of age he graduated from Acadia University, having taken honors in mathematics. He then spent a year at the Massachusetts Institute of Technology, Boston, after spending another year in the west, in engineering work, he went to Yale University to further pursue the full mathematical course. In 1907 he won the De Forest prize of \$400. The past year he has been teaching in the university and also writing his Ph.D. thesis, which will be published in the transactions of the American Mathematical Society. During the coming year he has a permanent instructorship at Yale, and will also give a lecture course in the graduate school. His success as instructor and tutor has already given him very high standing at this university, so much so that although he has been asked to go to McGill University as teacher and lecturer, he was strongly urged to remain at Yale as a member of the staff.

Dr. Bill proposes in the course of two years to go to Germany and Italy and further pursue his mathematical researches and studies.

In the West.

The dark pines swarming up the mountain sides dripped fire tinged dew to the wet earth. The snows high up in the soft pale blue sky shone with a hard radiance. The little dew-drenched chapel and the wooden chalets and lectures at the forest's edge smoked in the bright air. The only sound was the liquid ceaseless rush of a distant waterfall.

An Indian passed me on the narrow trail; his breath came from his mouth like an incense. For a mile I met nobody, and saw neither bird nor beast. I wondered if the earth had been more quiet and solitary for Adam. In the midst of my wonder I came upon an ancient game, seated upon a mossy rock, busy with her needle. At a little distance from her, just where a tangled path sloped abruptly to the ravine three thousand feet below, strayed a child nursing a doll. The grandamma looked up from her work. "Boss!" she called in a low voice. "Boss! do not go too far away." I looked about me at the foreign grandeur of the scenery. I recollected that five thousand miles separated me from England. And then the miracle of the British race came home to my soul. Here, in this unspoiled forest, here in the uttermost parts of a New World, the language, the love and the old sweet motherly solitudes of England—Harold Begbie in The London Chronicle.

Canadian Officer Dead.

Lieut. Walter Young, 67th Punjab, attached to 57th Rifles, was wounded in the fighting with the Khoda, Khel on May 20 and died the following day. The young officer, who was 25 years of age, was the son of the late Right Rev. Richard Young, D.D., Bishop of Yukon, and of Mrs. Young, St. Michael's Rectory, Gloucester, Eng.

He was born at St. Andrew's Parsonage, Manitoba, and joined the Royal Marine Light Infantry as 2nd Lieutenant Sept. 1, 1903, being promoted to Lieutenant July 1, 1904. He transferred to the unattached list for appointment to the Indian army as 2nd Lieutenant Sept. 1, 1906, and only two months ago was gazetted as lieutenant in the 57th Punjab, with effect from June 1, 1906. He was attached to the 1st Batt. Lincolnshire Regiment before joining the 67th Punjab. He met his death in an attack on a stronghold of the Khoda, Khel in the Bohai Dag.

Tell Hay Fever Friends.

Let them know, if they have Hay Fever or Asthma, that Catarrhogen cures permanently. Relief is instant and results guaranteed in the worst cases. All dealers sell Catarrhogen for \$1. Try it.

Chase & Sanborn's
HIGH GRADE COFFEE

Of course, there's a lot in making coffee right. But do your part right, and you need have no fear of the results as long as you use Chase & Sanborn's Coffee.

All Our Oxfords Must Go.

Our Windows this week show our determination not to carry over one single pair of Oxford Ties.

- 3 gross Lily White Shoe Dressing, regular 10c. Now -- 5c.

J. H. SUTHERLAND & BRO.
The House of Good Shoes.

Anty Drudge Joins the Painters' Union.

First Painter—"We've called to inform you, Anty, that you are elected an honorary member of the Painters' Union."

Second Painter—"That's because you told our wives how to save us money by washing our white suits with Fels-Naptha instead of sending them to the laundry. The suits last three times as long."

Anty Drudge—"Thank you, gentlemen. That makes nine unions I belong to for the same reason. The others are the machinists, printers, butchers, blacksmiths, shoemakers, miners, railwaymen and plasterers."

In all households there is a deal of cleaning and scrubbing to do at the end of the week. Use Fels-Naptha. It does the cleaning easily, and makes the house cleaner and brighter.

Fels-Naptha whitens floors, brightens painted woodwork and brings out the colors in oil-cloth and linoleum. It cleans polished hardwood floors and varnished surfaces without dulling.

It cleans and polishes windows, and the glass in china closets or bookcases. Makes the glass shine like sparkling crystal.

Every woman knows that a porcelain bathtub is hard to keep white and clean. Fels-Naptha and a soft cloth keep it shining and spotless with very little work. Same for tiling or mirrors.

And Fels-Naptha does all this in cold or lukewarm water. No need of fire to heat water; and you don't need a scrubbing brush. Sounds easy, doesn't it? And it is as easy as it sounds.

Try it in your cleaning this week. Follow directions on the red and green wrapper.

Synopsis of Canadian Northwest

HOMESTEAD REGULATIONS.

ANY seven-hundred section of the Indian Lands in Manitoba or the Northwest Provinces, excepting a and B, B2, B3, B4, may be homesteaded by any person the sole head of a family, or male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Application for homestead entry must be made in person by the applicant at a Dominion Lands Agency or Sub-agency. Entry by proxy may, however, be made by the Agency on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

An application for cancellation must be made in person. The applicant must be eligible for homestead entry.

DUTIES. (1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of the homestead, or upon a homestead entered for him in the vicinity. Such homesteader may perform his own residence duties by living with the father (or mother).

(3) If the father (or mother, if the father is deceased) of a homesteader had permanent residence on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of the homestead, or upon a homestead entered for him in the vicinity, such homesteader may perform his own residence duties by living with the father (or mother).

(4) The term "vicinity" in the two preceding paragraphs is defined as meaning not more than nine miles in a direct line.

SYNOPSIS OF CANADIAN NORTH WEST MINING REGULATIONS.

COAL.—Coal mining rights may be leased for twenty-one years at an annual rental of \$1.00 an acre. Not more than 2,000 acres can be leased to one applicant. Royalty, five cents per ton.

QUARTZ.—A person eighteen years of age and over having made a discovery may locate a claim 1,500 feet by 1,500 feet. Fee \$5.00. At least \$100.00 must be expended on the claim each year, or paid to the Mining Recorder. When \$500.00 has been expended on said claim, other requirements complied with, the claim may be purchased at \$1.00 an acre.

PLACER MINING CLAIMS generally, 100 feet square. Entry fee, \$5.00.

DREDGING.—Two leases of five miles each of a river may be leased to one applicant for a term of 20 years. Rental, \$10.00 a mile per annum. Royalty, 2 1/2 per cent after the output exceeds \$10,000.

W. W. COLEY,
Deputy of the Minister of the Interior.
