Selections HAWAII'S GOATS.

They Eat Up the Mountain Forests and Cause Floods. The wild goat of Hawaii in recent years became a serious menace to agriculture in various parts of the territory.

Secure among the almost inaccessible cliffs of the mountains, thousands of these nimble animals find a congenial home, and although no systematic efforts have as yet been inaugurated for exterminating them, they are nevertheless extremely wary and difficult to approach.

California and Australia have had their scores of rabbits, and various western states still have their troubles in combating prairie dogs and gophers, but these pests injure the agriculturist directly by attacking his growing crops, while, on the other hand, the goats of Hawaii do the same thing indirectly by ruining the mountain forests, which conserve the rainfall on which the water for irrigation purposes is dependent.

Goat hunting is a popular diversion in some parts of the territory and as a sport is by no means to be despised. Although the animals are numerous, it requires some hard tramping and climbing to get to their haunts, and then a true aim and good eye for distance in order to have much success.

Occasionally parties are organized and a week or more spent in goat shooting, with the result that sometimes several hundred are slaughtered. Were it not for the injurious characteristics of the little animals the slaughter would seem wasteful in the extreme, for no value is placed on the carcass, and it is usually left where it falls.

Photographing the Stomach. An improved apparatus has been made by Dr. Fritz Lang of Munich by which the "inside of the stomach" can be clearly photographed.

Court Clerk's Big Fees. The Chicago Bar association has declared war on the fee system of paying clerks in the supreme and appellate courts.

The Man's Turn to Laugh. A man in Berlin who paid \$1.75 for a ticket to hear Mlle. Labia, the Italian contessa prima donna, sing in "Carmen" tried to get the managers to refund his money when the prima donna failed to appear in the role, as advertised.

To Banish Insomnia. Chloral, morphia and the poppy must look to their laurels as aids to "nature's sweet restorer," for, according to a French contemporary, a recent invention will banish insomnia.
