**SASKATCHEWAN ELECTION.**

Based on calculations on field reports, the liberals assert that the Saskatchewan government, in to-morrow's election, will carry at least twenty-five seats, and have every chance of making the number of wins nearly thirty. In preparing the estimate of twenty-five seats, every doubtful seat was marked as a conservative win. On the other hand, the conservatives have spread the rumor abroad that they expect to capture twenty-two seats. In the inner circle of Haultain organizers, however, the conservative hopes are fixed on the possibility of splitting even with the government.

**LACK OF MONEY.**

According to the Belleville Ontario it was the lack of money that prevented protests being entered against the return of conservatives in the last provincial elections. "If the amount of money spent in the last elections on behalf of the Whitesites they would be simply astounded at the extent of the corruption which was practised and would be at a loss to imagine where all the money came from. Never, during the last twenty years at least, had there been such open and notorious vote buying as was done by the tory heeled. It was not the popularity of the Whitney government, its policy, its personnel or its candidates that won in the last election. It was money—money, money everywhere, that gave to the Whitesites their sweeping majority."

**WHITEFISH IN LAKE ONTARIO.**

According to a recent consular report whitefish are again making their appearance in Lake Ontario. During the past season 120,000 whitefish were received at Cape Vincent from Kingston against 300,000 in the same period of 1907. Owing to the fact that the natural feeding ground of the whitefish is on the Canadian side of the lake they are more plentiful there than elsewhere. Canadian fishermen assert that the fish now being caught are different from those which originally inhabited the lake in great numbers. The recent increase, says the Rochester, N.Y., Chronicle, is attributed to the efforts of the United States Fisheries Commission to restock the lake. The plantings of fry have been made chiefly from the Cape Vincent hatchery, but the fish seem to congregate on the Canadian side. While this is a case of sowing that others may reap the success of the attempt to restore the lake to its old-time plenitude of fish is gratifying.

**LAW ENFORCEMENT.**

After all the blare of tory trumpets and the beating of tom-toms about the right enforcement of the license laws, and the wonderful comments of all the conservative papers that whiskey was no longer king and temperance was winning golden opinions in the minor municipalities, and local option with a string to it was all the go, says the Post Hope Guide, we find that all over the province the license laws have been so ineffective that the government was forced to have swarms of whiskey detectives abroad in the land, and here, there and everywhere, hotelmen are being prosecuted by the ubiquitous and unsavory whiskey spotter.

What's the matter with Hanna, anyway? Is it not a fact patent to all that there has been a very lax enforcement of the license laws until public opinion became so thoroughly aroused that this unedified for action became actually necessary. What a commentary upon all the pretence of the Ontario government that it would enforce the laws of the land without fear, favor or affection; and then take a retrospective view and see the many, very many, flagrant shortcomings of the law officers of the crown in Ontario.

**DUST PREVENTION.**

The city of Newton, Mass., has begun some experiments on the treatment of the driveway on Commonwealth avenue, which has been given over to automobiles, and the current number of Municipal Engineering gives the figures of the cost of the different methods of treatment used, all but one of which are intended at the same time to prevent the flying of dust and to prevent the tearing up of the road by the swift-flying rubber tires of the automobiles. The last method described below merely supplies two cement concrete trackways for the automobile wheels to travel on and pays no attention to the dust

forming on them or on the rest of the roadway. The city's experience shows that a macadam road will not stand the automobile traffic for a whole year without requiring extensive repairs under the speeding which results from the separation of the automobiles and horses. Several methods of hardening the roadways were tried and the city engineer has computed the cost of the work as follows:

Treatment with cement plaster, made one part cement and two and a half very coarse sand, swept on the surface about one-quarter inch thick with brooms. The average cost per square yard for the 9,939 square yards treated was:	
Cement .....	3.36c.
Sand .....	.38
Labor .....	2.03c.
Teaming .....	1.56
Total .....	7.33c.
Treatment with tarvia:	
Tarvia .....	3.70c.
Stone screenings .....	.71
Labor, placing .....	4.29c.
Teaming .....	1.86
Rolling .....	.69
Total .....	11.16c.
Treatment with asphaltolite, 11,947 square yards by contract at six cents a square yard.	
Granolithic automobile tracks, 423 feet long, at eighty cents a linear foot, equivalent in cost to a surfacing thirty-six feet wide, at twenty cents a square yard.	

**EDITORIAL NOTES.**

Let Laurier finish his work.

The federal government has put the one cent rate on drop letters again. The change will commend itself to every business man. Score one for the liberal government.

Our friend Mr. Roosevelt, says the Montreal Herald, has invited a commission, composed of good men, too, to see what is the matter with life on the old farm, and how it could be made more enjoyable. All Teddy wants is that "the farmer should get the largest possible return in money, comfort and social advantages from the crops he grows"—of course after the tariff fed trust magnates have taken all they need for their "swollen fortunes."

There is trouble among the conservatives of West Hastings. The recent convention renominated the sitting federal member, E. Gus Porter, but R. J. Graham, who was defeated, has been endeavoring to secure from the executive a ruling that the convention proceedings were irregular, because Mr. Porter was not elected by ballot. The executive, last week, considered the objection and threw it out. It is not known what Mr. Graham will do next.

The Hamilton Herald sees the tory plans being developed by which Sir Wilfrid and his colleagues will be assailed for having fastened the separate school system upon the two provinces in violation of "the principles of provincial rights. The premier will be attacked in Quebec for having betrayed the interests of the Roman Catholic minority in consenting to the amalgamation of the educational clauses of the western autonomy bill. He will be attacked in Quebec for being a modernist, a tool of the Orangists, and goodness knows what besides. It will not be the first time in his political career that the premier has been between two fires.

**The Late Susan Carter.**

Pictou Gazette.

The death of Susan Carter, wife of the late J. N. Carter, occurred at the residence of her daughter, Mrs. W. H. Wright, Wellington, on Thursday. Deceased had gone up to Wellington, about six weeks ago, to spend the summer, and was enjoying her usual health. The remains were brought to her residence, King street, to await interment, definite arrangements of which have not yet been made, owing to the unavailability of her son, J. N., who is travelling in the lower provinces. Her husband, the late J. N. Carter, predeceased her about eleven years ago. Three daughters and one son survive, Mrs. H. S. Willocks, and Mrs. W. N. The Men Arrested on Charge of Robbing a Bank Messenger Were Forced by Police to Divulge Names of Companions Who Escaped.

Pittsburg, Pa., Aug. 12.—Police officials here have received news of the torturing of two local men who were arrested recently in Mexico City, Mexico, on a charge of robbing a bank messenger. William Moffatt and Edward Maloney are the men, and the police here say they were well-known to them before leaving for Mexico. Two companions escaped the officers when the Pittsburgers were arrested, and the Mexican police demanded their names. Refusing to betray their companions, the men allege that they were strapped by the wrists to the bars of their cell while the officers with forceps tore the nails from their fingers. Unable to bear the agony the men gave up the names of their companions. "I suppose," said Captain of Detectives McCough, to-day, "if it were not for the record of the men their torture would cause international complications."

To Draw Bond Closer.

London, Aug. 13.—Keir Hardie, M.P., who is going to Canada to attend the congress of the labor party and a series of labor demonstrations, speaking at an Avonshire meeting, said there was a growing desire on the part of organized labor here and the colonies to come closer together, and he was going to Canada as a labor missionary of the empire to try to draw closer the bonds of working class organization.

David P. Russ, Cobourg, was drowned while trying to recover the body of a Finnish boy.
