BIG RECIPROCAL TRADE IS basted together. GROWING BIGGER.

Direct Steamship Communication to and From Chnada is Badly Needed.

Montreal Witness. That a big reciprocal trade between Canada and Brazil can be obtained if Canada cares to take advantage of the from Brazil by William T. Wright, who represents one of the largest commercial houses in that country. He tised to cure stomach and bowel further says that all that is wanted to troubles and summer complaints conbuild up such a trade is a direct steamship service between Canada and the

Mr. Wright is one of two representatives sent to Canada by 'La Societe Fill nanciere et Commerciale Franco-Bresilienne, of Sao Paulo, in the hope of making a start not only in importing products from Canada, but also in exporting Brazilian products to this countroubles, if they come unexpectedly. try. Mr. Wright was in Montreal Give the well child an occasional dose yesterday, and he said that the business of these tablets and they will prevent began working up business.

that the first cost was lower than we liams' Medicine Co., Brockville, Ont. could get the same goods in Germany, the net cost worked out much higher because of the high transportation charges that resulted from the goods having to be brought to Brazil via the United States transportation lines It is the same with the coffee, etc., which Canada gets from Brazil, but through United States channels, which makes it come dearer. A good deal of Canadian trade with Brazil also passes through England or Germany, which of course increases the cost and hinders its de-

"Now let me tell you some of the openings that there are in Brazil for Canadian manufacturers. First of all, there are tremendous opportunities Brazil for the sale of agricultural implements, in the manufacture of which Canada is so far advanced. When I tell you that two-thirds of the world's supply of coffee is grown in the stateof Sao Paulo, and that despite this two-thirds of our farmers have never seen an ordinary plough, you will undertand what an opportunity there The land is cultivated by laborers with hoes, and this despite the fact that Sao

leather belting, also manufactured very largely in Canada, but at present shut out from Brazil through the high transportation charges in its passage through America. And thus I might go on, enumerating almost everything that Canada produces. If only there were tween Canada and Brazil, the steamships carrying Canadian products to Brazil might come back loaded up with cofcandy, bananas, pineapples, tobacco. which Canada would get so much the pordinary factories.

"Even American trade with Brazil is handicapped owing to the very unsatis- Chicago Newsfactory steamship service-so much so

COST OF SCHOOL BOOK.

in Policy.

Canadian Couriera There has been considerable discussion in the West over the contract made by the Alberta and Saskatchewan governments for school readers. The contract was made with the Morang Company of Toronto and as the time was short for delivery, they were allowed to print the first edition in New York. The agreement was attacked because the work was not done in Canada and because it was thought to be extravagent.

As to the first charge, there is n doubt that it is well that Canada should print her own school-books. Neverthe-less it is also true that these can be produced in New York or Boston more economically and more quickly than in Canada. There are firms there with special equipment and better machinery guarantee of a government analyst who can produce the books at a speed that this medicine contains no opiate utterly impossible here. They have or narcotic. And she has the assur- case-making machines, for example which make cases faster than twentyspeedily cure stomach and bowel five case-makers can produce them by hand. The same is true of other details of manufacture. Canadian bookbin deries are poorly equipped and their work does not compare with those of the United States or Great Britain. Our school-books are, generally speaking, vastly inferior to those made in the other two countries.

As to the question of value, the two governments concerned seem to have made a good bargain. The books have been examined by the writer, who has also an intimate knowledge of nearly all the best readers, American and British, and he cannot but admit that speech exhibit the arrogance of the sex cases are well made; each book is which has usurped, etc.? But the day bound front and back with a linen hinge; the stitching, paper and type are first-class in every respect. Mechanically the books are splendid specimens of the book-maker's art. Their cost style, anticipates the dawn above al- to the governments, who will supply them free, is as follows; Primer, 13.68 While the ejillulations of victory are cents; first book, 16.53 cents; second still ringing in our ears, and the sex, book, 18.91 cents; third book, 23.75 cents; and fourth book, 27.36 cents. -the true source of the old master- Considering the quality of the work and the publisher must deliver the books

In passing it may be mentioned that spread has now become the eweifica- the estimated annual cost of readers for the Province of Saskatchewan is \$4,000 a year. The outlay the first year will Creations Of Human Ingenuity. be large, but in the second, third and One of the many attractions at fourth years it should be small enough the Canadian National Exhibition, and to bring the average down to this the principal attraction in the indus- figure. On this basis, the annual cost Paulo is the most advanced of the trial section, is the Process Building, of free school-books to all city, town or a magnificent structure in which are rural schools in Ontario would not be more than \$30,000 a year. If the Government paid for the preparation of the readers and the making of the first set of plates, this cost should be reduced to \$25,000 a year. Toronto has long been supplying these books pupil. It will thus be seen that free readers in all public schools is not such a terrible item as some conservative and time-worn educationists would have

Colors As Radiators. Nearly everybody has noticed that some colors appear to be cooler than others, but does he or she really consider that there is a real and perceptible difference between some colors and others. It is not only a difference of On passing the hand over the colors who becomes a bride by a "rearing mar- white, green, blue, red and black suc-

> the light more than others. White, for instance, reflects about 95 per cent. of the light thrown upon it. The heat con-tained in the light therefore passes off in a nearly like degree. The colors green, blue, red and black range down from about 75 per cent. to zero, and the heat is thrown off in like gradients. Colors, like metals, are good and bad conductors of heat, and the fact is that a person not only looks cooler in 'awhite dress, but also is cooler by several degrees than one dressed in red or black, even though the dresses are of

the same material and weight, How To Remember Dates. The following lines, committed to memory, give an easy method of stat-ing off-hand the day of the week of

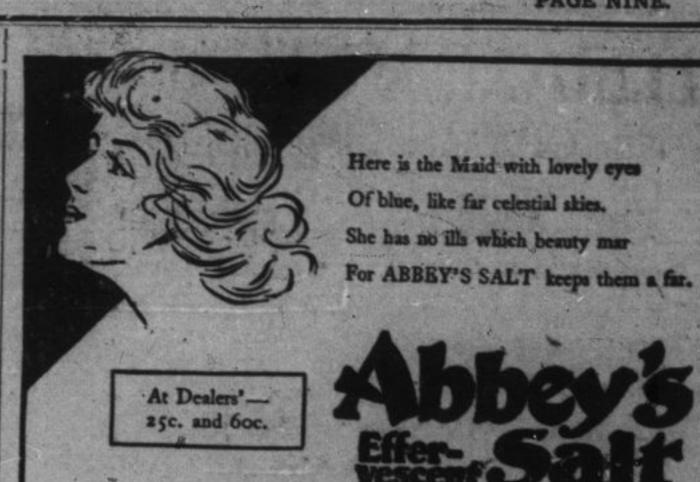

Just a mother's arms, my jocund Jean: A spell o'er nature's dream. The number of letters in each word represents the date of the first Saturday in the particular month to which it corresponds; thus, "Just," for January, has four letters, because the first Saturday in January is the fourth of that month; "a," representing February is the first day of that month; and so on through all the twelve months. Each word of the 12, excepting the first "a," begins with the same letter

as the month it represents. Thus, "Just" begins with "J"; "mother's" begins with "m" because March begins with "M," and so on all through, with the exception of "a" for February. Having obtained the dates of the first Saturdays, the date of every other Saturday in the month is got by the addition of the necessary number of any intermediate day. For example to know the day on which Christmas day falls this year, "dream," standing for December, has five letters, so the first Saturday in December is the 5th of that month; the second Saturday is the 12th; the third the 19th; the 25th, being six days more, gives Friday, six days on from Saturday.

Mrs. Youngwife-"Charley's covered the table-cloth with fruit and coffee stains, and it's my very best cloth, and because I spoke of it at breakfast, he slammed the door when he went to work, and he he he didn't kiss me good-bye."

Anty Drudge-"Never mind, dearie, don't cry. Get a cake of Fels-Naptha soap. It'll take every stain away with a little cold or lukewarm water."

It isn't the wearing, but the washing that sends light clothes to the rag-bag before their time. The way to stop that is to wash them with Fels-Naptha soap in cold or lukewarm water. No boiling to weaken their fabric; no hard-rubbing to wear and tear them. And Fels-Naptha won't harm the most delicate lawns or laces.

Say you have a lot of white shirtwaists and things to wash. Just wet them, soap with Fels-Naptha, roll and soak for a few minutes in cold or lukewarm water. Then rub lightly, rinse and hang on the line. Easy, isn't it? And the clothes will be cleaner and whiter and sweeter than you can get them any other way.

Follow directions on the red and green wrapper for using Fels-Naptha.

Fels-Naptha does all kinds of housecleaning quicker
